For **Stratford**—Daily, at 8 a. m., and 2 p. m.
For **Madoc**—Daily, at 8 a. m., and 2 p. m.
For **Baldwinsville**, **Tweed**, &c.—Daily, at 2 p. m.
For **Trenton**—Daily, at 3 p. m.
For **Picton**—Daily, at 3 p. m.
The stages arrive in Belleville about noon each day.

Daily Intelligence.

BELLEVILLE, SATURDAY, JULY 3.

City and Vicinity.

SUNDAY SCHOOL PICNIC.—Arrangements have been completed for the Union Sunday School picnic, which is to be held on Friday next at Massena Point.

RECOVERING.—Private Tammage, of the 49th Battalion, who was sun struck whilst in charge of a firing party at the range on Saturday last, is recovering. He had a relapse, and is still very weak.

THE WEIGHTS AND MEASURE ACT.—The Inspector of Weights and Measures was busy in the market this morning where he captured a number of measures that were not according to the legal standard.

SUNDAY SERVICES.—On account of special services being held in a number of churches, the exchange of pulpits which had been arranged to take place to-morrow has been postponed for a week. The pulpit of the Bridge Street Methodist Church will be occupied by Dr. Jeffers.

HOME FROM CAMP.—The 49th Battalion returned from camp yesterday afternoon, having performed their six days' drill. The steamer *Mary Ethel*, which conveyed the men to the city, reached here at 3:45, but the Grand Junction train had started, leaving the Stirling Company behind. The officers and men were in consequence very much annoyed.

YACHTING NOTE.—The *Oswego Times* says: "It is proposed to arrange for a grand regatta at Oswego July 20, and to raise a purse of \$500 for that purpose. This can be done, the owners of 9 first-class and 7 second-class boats from Ontario have signified their intention of entering their boats. There will also be a number of third-class boats. The subscription paper will be started immediately, and if the purse is raised, we will have one of the largest regattas that has ever taken place on this lake."

THE LATE JAMES HAGGERTY.—The *Stirling News-Arrow* has the following notice of the sudden death of Mr. James Haggerty of Huntington (not the former Reeve, but another gentleman of the same name): "The day previous to Mr. Haggerty's death he had been to Belleville, and at night was taken ill so seriously that the family set up with him, but death took place before morning. The remains on Saturday were followed to the family burying-ground in West Huntington by a large cortege, consisting of seventy-five vehicles, and were interred with Orange honors."

OBVIOUS COINCIDENCE.—The assessments of the County of Hastings for the present afford a remarkable instance of numerical coincidence. The total equalized assessment for 1879 was \$11,937,000.00 and the amount levied for ordinary purposes was \$42,973.20. The total assessment for the present year is \$12,095,000.00, and the levy for ordinary purposes is \$43,542.00, but those municipalities the equalization of which remains the same as last year, viz: Sidney, Thurlow, Tyndensing, Rawdon, Hungerford and Elzevir, are assessed at precisely the same amount of ordinary County tax, as last year; the proportion between the rates on the total taxation and the increase of the total assessment being the same as before.

DOING WELL.—The *Chicago Industrial World*, in a recent issue contains a notice of the city of Brunswick, Missouri, in which the following reference is made to Mr. Allen T. Kennedy, formerly a resident of Belleville: "Among the business men of the place Allen T. Kennedy occupies a prominent position. His heavy-lifted business house occupies two floors of a building 27 by 150 feet. His annual sales of dry goods, hats, caps, boots and shoes, carpets, millinery, etc., amount to \$50,000. He carries ordinarily a stock of from \$18,000 to \$25,000; sells for cash and discounts his paper. Mr. Kennedy came from Canada to this place in 1868 with very limited means and established in trade here. Financial sagacity and strict attention to business, and his to-day one of the most prosperous and substantial merchants in the country."

LATER.—The mail from the west was four hours late to-day.

RAILWAY NEWS.—That the freight traffic on the Grand Trunk is increasing rapidly is shown by the fact that the number of cars passing through the station yard here was 3,864 in excess of the number for the same month of last year.

SUDDEN DEATH.—Mrs. Mack, a woman about 50 years of age, who had been employed as a nurse, and lived in Mrs. Barry's house, Church street, was found dead in her bed this morning. An inquest was to be held this afternoon before Coroner John P. McDonald.

CRICKET CLUB.—An eleven of the Belleville Cricket Club will leave for Oswego to-morrow night by the steamer *Hastings*. They will proceed to Syracuse and there play a match with the Onondaga Cricket Club of that place, which organization will play the return match here in the early part of next month.

A RAIN.—Constable Cook made a raid last night on a disorderly house near the western end of the foot bridge. He captured one man and two women, and one male and one female inmate of the place escaped. The officer, in reconnoitering the house, fell into a dry ditch and hurt his shoulder so badly that he was obliged to go off duty for the remainder of the night.

HAY BAY.—This everwile great duck shooting ground, which has of late year been so devastated by persons from Toronto and other distant places, who do not possess the instincts of true sportsmen, that the ducks which visiting there have been few in number, is at length to be preserved in the same manner as is Long Point, Lake Erie. A company, composed of the owners of lands bordering on the bay, some residents of Napanee and one or two denizens of Belleville, has been formed, and the shooting ground will be carefully protected, wild rice planted, and other means taken to induce the ducks to frequent the bay again.

RUNAWAY.—An exciting runaway occurred on the market this forenoon, but fortunately was not attended with any serious damage. A farmer's team which had been left unattended started from the butcher's market, and by the time they got to Front Street were on a full gallop. Mr. Norris L. Reed, standing on the corner, took in the situation, managed to grasp the lines as the horses turned the corner, and heroically held on, although dragged on the ground for some twenty or thirty feet. Beyond a slight scratch on one of his hands, he was uninjured. Mr. Reed deserves a great deal of credit for his coolness and courage. A lady who was in a wagon near which the runaway passed, fainted from fear.

Forepaugh's Show.

THE GREATEST SHOW ON EARTH.

The Toronto *Globe*, always exceedingly chary of its amusement-memories, eulogize Forepaugh's great exhibition as follows:

YESTERDAY.

The entry of Forepaugh's great show into the city yesterday created widespread interest, and the subsequent procession through the principal streets increased that interest. It was not to be wondered at, then, that the monster train, plied on College street, were thronged with spectators eager to examine the menagerie and witness the circus performance. So great was the crowd at night, indeed, that the door-keepers had to refuse the people's money, and turn them away—there was no more room. Mr. Forepaugh's pavilions—the one occupied by the collection of wild animals, the other used for the circus performance—are certainly larger than any that have hitherto been put up in Toronto.

The show is, taken altogether, an excellent one. The feature which first claims the attention of the visitor is the menagerie, than which we have never seen a better. The collection of animals is very large and very choice also. The denizens of the cages do not represent that half-starved appearance which is too often observed in travelling shows; they are in good condition, and remarkably clean and well kept. An hour can be pleasantly and profitably spent in admiring the splendid collection of wonderful creatures here gathered together.

At 2:30 p. m. the first performance in the circus tent commenced in presence of between 6,000 and 7,000 persons. At eight o'clock the place was literally packed, there being over 7,000 people under the vast stretch of canvas. The programme was long and interesting, yet by having two rings in the tent the different features were all presented within a reasonable time. While the performance as a whole, is to be commended, there are quite a number of features which are remarkably good, and one or two of them which may be said to be unequalled. For instance, the collection of fifteen trained elephants has not been equalled in any previous show which has visited this country. The feat of firing a human being from a monster cannon up to a lady suspended from a trapeze near the top of the tent is another remarkable item in the programme, and one which excites feelings of wonder and admiration. The human projectile was shot upwards with remarkable precision, and was deftly caught by the lady on the trapeze. The bare-back riding, the jumping, the tumbling, the funny sayings and doings of the clowns, and the other items which go to make up the programme, are all more or less attractive. It might be mentioned that the horses introduced into the ring are in splendid condition, and most of them are pretty animals.

On the 12th of July the establishment will exhibit in this city.

Cheese Market.

The heavy depression in the cheese market which we noted a few days since has, happily for the present at least, passed away, and a rebound in prices, as rapid as the last fall in rates, has taken place. Cheese which fetched 43 shillings in Liverpool on Tuesday last, shot up to 44 yesterday, 51s at 11 o'clock this forenoon, and 54s at 2:30 p. m., a rise of 11s in four days. As the first sign of a rise cheese buyers who had been indifferent, became alive to purchase, securing the country in every direction, purchasing nearly the entire amount of cheese made at from 7½ to 7½ p. lb.

Police Court.

(Before Ald. Holden and Farley.)

SATURDAY, JULY 3.

DISORDERLY HOUSE.

Donald Barney, Mary A. Morgan and Nancy A. Barney were remanded till Tuesday.

ALLEGED FORNICATION.

David Connors was brought up on remand, charged with administering poison to Matilda Frisone. The woman testified that the prisoner had boarded her house since about the 1st of April, and that he asked her to clothe with him; but her husband, who said not to be coaxed; prisoner said he would murder her husband unless she went with him or he would have her life if she did not go with him; this was about a month before he gave her the powder, which was on Friday, June 26th; on that day about noon she gave him the powder, saying it was something for her mouth; took it and swallowed it dry; her mouth was very sore, becoming stupified a few minutes after taking it; prisoner went and picked up his clothes and went out of the house; sent for Wilkins' hired girl; was out of her mind for two days after the powder was given.

In cross-examination by Mr. Dickson, the witness denied having drunk whiskey; the powder which prisoner gave her was about as much as would lie on the point of a knife; had blue vitriol for coloring, but kept it out of the way of her child.

The case was here adjourned until 2:30.

BELLEVILLE CHEESE MARKET.

SATURDAY, JULY 3.

The weekly cheese market was held to-day, and as cable showed a marked advance and a strong upward tendency, buyers were much encouraged and held at 9½ to 9½. The offerings up to 2:30 p. m. comprised 1,634 boxes, from the following factories:

Mountain View.....	100 boxes.
Springfield.....	150 "
Ashley.....	400 "
Thompson.....	200 "
Thompsonburg.....	200 "
Hungerford.....	150 "
Thompsonburg.....	200 "
Sidney Town Hall.....	250 "

Liverpool market 51s at 11:30 and 54s at 2:30—a rise of 6s since yesterday and of 11s since Tuesday.

Marine Notes.

The steamer *Armenia* is again running on her route.

The scho. *Richmond* is at Mill Point where she will receive a new foremast.

AFTERNOON DISPATCHES.

ST. PETERSBURG, July 3.—Berge forebore to send an amnesty to political offenders abroad extended only to such as solicit permission to return to the coming measure, is attributable to Gen. Loris Melnikoff, chief of the Supreme Executive Committee.

PARIS, July 3.—The Prefect of the Department of Nord having taken further steps in the case of the suit instigated by the expelled Jews at Lille tribunal, declined to proceed with the hearing. This leaves the question of jurisdiction to go through the ordinary judicial stage, and refrains from interfering, as it might do, the temporary reinstatement of the Jews.

The famous brigand chief, Camillo Girondino, who in 1861 was the terror of the Benevento district, Italy, and who defied capture, but voluntarily emigrated to America, has returned to his old haunts and occupation.

QUERETZOW, July 3.—Arrived, the *Abysinia* and *Baltic*.

A Constantinople despatch says the executive committee of the Muslims is producing anxiety and apprehension in European quarters of the city but it may be confidently predicted that they will not move unless instigated by the authorities on the latter hand, with that any serious disturbances in the capital would immediately produce active European intervention. It is hardly conceivable that they would visit satisfaction on such a line of action; still there is a certain amount of danger. The Government evidently wishes to frighten the Muslims away, by using means for this purpose, but also inadvertently some unforeseen catastrophe.

The cotton operatives of Preston and Ashton-under-Lyne have decided not to join the strike threatened this month by the Bolton, Stirling and Rochdale operatives. The strike therefore will be only partial and local.

NEW YORK, Arrived, the *Baltic*, from Liverpool.

LONDON, July 3.—It is understood that the Bishop of London notified the Rev. Alexander Mackenzie, of St. Alban's Church, Holborn, that he was determined to enforce the sentence of excommunication against a certain member of the city but it may be confidently predicted that they will not move unless instigated by the authorities on the latter hand, with that any serious disturbances in the capital would immediately produce active European intervention. It is hardly conceivable that they would visit satisfaction on such a line of action; still there is a certain amount of danger. Poverty and Distress.

That poverty which produces the greatest distress out of the misdeeds of the blood deprived of its juices, it becomes weak and watery, a condition termed anemia in medical writings. Given this condition, and a host of ailments and aches, general and nervous debility, loss of flesh and appetite, weak lungs, throat disease and consumption, are among the common results. Therefore, if you are a sufferer from thin, poor blood, do not hesitate, but employ Golden Medical Discovery, which enriches the blood and radically cures these affections by striking at the root of the evil and removing the cause.

For all bronchial, throat, and lung affections, severe lingering coughs, weak lungs, consumption in its early stages, asthma, and kindred affections, Dr. Pierce's Golden Medical Discovery is the sovereign remedy, and has outvalued all its competitors. It is harmless in any condition of the system, yet powerful to cure. Druggists sell it.

A Wonderful Discovery.

For the speedy cure of consumption and all diseases that lead to it, such as stubborn Coughs, neglected Colds, Bronchitis, Hay Fever, Asthma, pain in the side and chest, dry hacking cough, tickling in the throat, Hoarseness, Sore Throat, and all chronic or lingering diseases of the throat and lungs, Dr. Kitch's New Discovery has no equal and has established for itself a world wide reputation. Many leading physicians recommend and use it in their practice. The formula from which it is prepared is highly recommended by all medical journals. The clergy and the press have complimented it in the most glowing terms. Go to your druggist and get a trial bottle free of cost or a regular size for \$1.00. For sale by J. C. Clarke & Co.

BUCKLEN'S ARNICA SALVE.

The Best Salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Itch, Eruptions, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by J. C. Clarke & Co.

MARRIED.

On the 29th June, at St. Michael's church, Belleville, by Rev. Father Farrell, V. G., the marriage, to Miss Nellie Slavin, both of Belleville.

Commercial.

Arrive from Macdonald and way stations at 10.30.
Arrive from Hastings, Campbellford and Stirling, at 10.30.
Trains are run by Belleville time.
E. H. BRENNAN, Superintendent.

MANHOOD—HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excessive sexual indulgence.
Price, in a sealed envelope, only 5 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.
Address
THE CULVERWELL MEDICAL CO.,
41 Abbot St., New York.
Post Office Box 4586

1880. 1880. SUMMER SERVICE.

DETROIT, MICH.

M. Hiltz Williams, M.D.
(Graduate of Victoria College at Toronto, and Member of the College of Physicians and Surgeons of Ontario.)
PROPRIETOR.

(PERMANENTLY ESTABLISHED SINCE 1870.)
Over 16,000 cases successfully treated since the establishment of our Institute in Detroit.

ON THE INFLUENCE OF COLD IN THE PRODUCTION OF DISEASE OF THE LUNGS AND ON THE COMPARATIVE MERITS OF THE DIFFERENT PLANS OF TREATMENT.

The state of the atmosphere impresses itself directly on the mucous lining of the nasal passages, throat, windpipe, bronchial tubes and cells of the lungs. Sudden changes in the temperature of the air are immediately felt in the general condition of the system. Coldness and humidity render the air irritating to the mucous membrane, irritate the mucous membrane, and produce a congestion of the vessels of the lungs, which is the first stage of inflammation—the parent of all those chronic catarrhal affections of the nose, throat, windpipe and lungs which ultimately end in consumption.

Nearly eighty per cent. of the cases of consumption begin by congestion of the mucous membrane of the nasal passages, throat and bronchial tubes produced by colds. To this extent, the consumption springs from the damp and changeable weather of autumn and winter. It is inflammatory and produces local inflammation of the mucous membrane of the nose, throat, windpipe and lungs, so that inflammation of the eyes or quinsy of the throat, may be treated in the same direct

It is a rule of medical practice, established by ages of experience, that every disease which is local—that is to say, has its seat in any one organ or part of the body—requires for its cure the direct application of remedies to such organ or part. When this is done, the disease is generally curable, and when it cannot be done it is, in fact, generally fatal. The same principle is applied to the treatment of the eye, the nose, the ear, the throat and internal surface of the nose, throat, windpipe and lungs. When cold produces inflammation of the mucous membrane of the nose, throat, windpipe and lungs, the cause, the disease, and the membrane affected are alike in every respect. When the inflammation is in the eye, the eye is the cause of the disease, and the membrane affected are alike in every respect. When the inflammation is in the eye, the eye is the cause of the disease, and the membrane affected are alike in every respect.

Physicians treat these similar diseases in the same manner by different means, and as a consequence, cure one and utterly fail to cure the other. To the eye they apply eye-washes and ointments directly to the eye, and to the nose, throat, windpipe and lungs they apply nothing to the diseased parts, and catarrhs become sealed and are thought to be incurable. As applied directly to the throat, and generally curable. For the same disease a liver is down in the windpipe and bronchial tubes, they make no direct applications, but straightway begin to treat the disease by the use of the same remedies, and as a consequence, cure one and utterly fail to cure the other. To the eye they apply eye-washes and ointments directly to the eye, and to the nose, throat, windpipe and lungs they apply nothing to the diseased parts, and catarrhs become sealed and are thought to be incurable.

For an inflamed throat they prescribe gargles and applications directly to the throat, and generally curable. For the same disease a liver is down in the windpipe and bronchial tubes, they make no direct applications, but straightway begin to treat the disease by the use of the same remedies, and as a consequence, cure one and utterly fail to cure the other. To the eye they apply eye-washes and ointments directly to the eye, and to the nose, throat, windpipe and lungs they apply nothing to the diseased parts, and catarrhs become sealed and are thought to be incurable.

They do not treat the disease by the use of the same remedies, and as a consequence, cure one and utterly fail to cure the other. To the eye they apply eye-washes and ointments directly to the eye, and to the nose, throat, windpipe and lungs they apply nothing to the diseased parts, and catarrhs become sealed and are thought to be incurable.

They do not treat the disease by the use of the same remedies, and as a consequence, cure one and utterly fail to cure the other. BELLEVILLE, MONDAY, JULY 5.

West Toronto.

The Toronto Telegram is professionally independent in politics, but its inclination for Mr. Blake, its consequent leaning towards Liberalism, and its advising the holding of a "Liberal" Convention, all tend to show that in reality it is now in accord with the radical wing of the Reform party. It is cruel, therefore, of the Telegram to thus twist the party which is led by its friend Mr. Blake, in the following sarcastic manner:

"It is pleasing to learn from the Globe in its comments on West Toronto, that the coming election will have an important influence on the next session of Parliament, and 'happily the Reform party was never in a better position to take advantage of every opportunity to further the public interest.' The only fact in the case that is really not encouraging is that while the reformers have such good cause with which to go the polls, they can find nobody willing to carry their flag. A baker's dozen of gentlemen were asked, all with one accord began to make excuse, and as far as can be learned, the willing man has not yet been found. Having a good cause in politics and no standard bearer, is like having a good cause in court and no lawyer to present it; judgment goes by default. Perhaps Mr. David McKee will be induced to run. He would not doubt be quite agreeable to being sent to Ottawa again."

The Telegram is surely forgetful, or it would name the defeated but undaunted Dymond, who, if asked to run, and his expenses guaranteed, would doubtless adjourn his profitable Agricultural Commission for a few days, make his canvass and return to his employment after having gone through the electoral mill. Dymond is a good man, "Liberal," more advanced even than Mr. Blake, and would make about as acceptable a sacrifice as his party could offer.

The Central Committee.

The London Advertiser, through Gerrit of the Grits, has a long article in its issue of June 25th, condemnatory of the course of its friends of the Ontario Government in educational matters. It says:

"Argument on such a matter is out of the question. The first glimmering of honorable instinct would show that such an arrangement is too disreputable to be thought of for an instant. Some of these Central Committee men are not only text-book teachers, but are inspectors of schools. They can serve teachers, local inspectors and even school trustees in any way. Their favorable notice means money; their frown implies professional death. It is known—Mr. Young says that nearly every body knows it—that every copy of certain books which may be sold means just so many pence put into the pocket of this benevolent or most pestiferous fairy. And is not that the fact sufficient to make those books go like hot cakes, especially when the big man pulls them furiously and makes the most disparaging references to all competing wares? Why, that one fact turns such Central Committee men—whoever they are—into the most miserable book-bustlers and mercenary go-betweens that any one can either think of or imagine. It is enough to make the very name of such committee stink in the nostrils of any honorable man, and so long as even one of the company is even suspected of the proceedings, the whole body has a tainted discredited reputation, which all that is honorable in them will kick against and deplore."

We are strongly of opinion that the principle of private copyright has very much to do with the present phase of the evil, but whether it is or not, our educational authorities, if they don't want their own credit compromised, will set about, not a process of whitewashing, but of rigid reformation, and see to it that at any rate there should be no department of the public service in the working of which "the white-headed bee" shall be so impudently and so palpably as a dream."

This scandal, which is thus so vigorously denounced by a Grit organ, is, be it remembered, purely a "Reform" in its inception, and in its workings. The Educational Department was reorganized by Mr. Mowat's Government, and the result is now partially before the public. There are evidently many details yet to learn, but the popular voice will call on an investigation so thorough that the whole facts must be brought to light. Mr. Mowat has always done his best to screen his friends, but in this case he will scarcely dare to apply the whitewash brush, or if he does he will be held to a strict accountability for his action.

SPRING WHEAT SCOURGE.—The Ottawa Free Press says: An insect has attacked the spring wheat in Iowa, according to the Courier, and is doing great damage. There is scarcely a farm where the grain is unharmed. It is said that the insect came with the seed wheat, which was nearly all imported from the west. If farmers would take the precaution of soaking their seed grain in a solution of some kind so as to destroy the eggs of these vermin the evil would either be greatly lessened or done away with altogether. In a great many instances wheat which was expected at one time would yield twenty bushels to the acre has been destroyed to such an extent that not more than half that quantity will be realized.

Belleville and North Hastings Railway.

What was said of the condition of the Grand Junction Railway to Hastings, in our issue of a week ago, may be said of the Belleville and North Hastings Railway to Madoc. The same careful supervision of this line has been made by the Superintendent, Mr. Breman; gangs of men have been placed on the road, and the work of repairing in the most thorough manner. Any one who has travelled over the line to any extent during this spring and summer, will have no difficulty in noticing its changed and improved condition. Strange as it may appear, and not very creditable to the parties who built it, the joints of the rails in many parts of the road come together in the most thoroughly producing a very uneven surface. Wherever this was found to exist, the rails have been lifted and tied placed under the joints, giving them a solid foundation to rest upon. A considerable portion of the road has already been gone over, but it is calculated that it will take two months yet to finish it. From what is being done it is evident the contractors intend to make thorough work of it.

A considerable quantity of rolling stock has been recently added, so that now there is sufficient to supply all demands for freight traffic. Two new passenger cars are being made at the Cobourg works, and a number of new box, coal and flat cars are also under way. The Superintendent expects to have by the first of October not less than one hundred cars and six locomotives, which will be sufficient for all the traffic to be done.

We understand that recently the Superintendent has succeeded in making satisfactory rates with a large number of these factories in different parts of the county, so that hereafter instead of being taken to Belleville by train, cheese will be shipped from Stirling, Campbellford, Madoc, Holliday and other points, direct for Montreal, which will be a considerable saving in the handling, and also in time and expense.

The Elevator at Madoc is rapidly approaching completion, being ready for the work. It is a very substantial building, considerably larger than the one destroyed by fire last fall, and will be the largest elevator on either of the lines of railway. At Stirling, there are two elevators nearly completed, two under course of erection at Campbellford, and one at Hastings, the whole having a capacity of over 200,000 bushels. At all these points it is expected the bulk of the grain in the surrounding country will be handled by local buyers, and that intended for foreign shipment will be conveyed to vessels by our local railways.

The prospects of the iron trade are improving, and although it is not anticipated that prices will reach anything like what they were a few months ago, still it is believed by shrewd dealers that rates will somewhat improve, and there will be a steady market. Mr. Pusey, who has just returned from a three weeks' trip to New York and other places, informs us that he intends to increase the production at his various mines, and it is probable other operators will also develop still more largely under the influence of a more favorable market. And with the prospects of an increased iron traffic, the assured trade in cheese and grain, and the general traffic which is assured to grow larger under favorable rates and good management, there is every prospect that the Grand Junction and Belleville and North Hastings Railways will do a good business during the remainder of the season.

Customs Revenue.

MONTREAL.—The receipts at the Montreal Customs for the month of June, 1880, were \$73,363.56 against \$73,370.61, during the corresponding month last year, an increase of \$225,153.25.

The Inland Revenue receipts for June 1880, are \$86,982.93 against \$83,147.97 during the corresponding month in 1879, an increase of \$50,834.96.

TORONTO.—During the month ending June, the receipts at the Inland Revenue Department were \$79,751.79, in the same month last year they were \$25,162.20, showing an increase for 1880 of \$54,589.59.

The returns of Customs at this port show the amount collected during June to be \$130,557.31. In the same month last year the amount collected was \$105,403.32.

HAMILTON.—The Customs receipts for Hamilton for June were \$74,724, being an increase of \$33,062 over June of last year.

The Inland Revenue receipts were \$29,416, being an increase of \$9,216 over June of last year.

LONDON.—The customs receipts for London, for June, show an increase of \$1,282, over June of 1879.

The value of imports and exports, with the duty collected thereon at the Customs House during the month of June, 1880, is as follows:—Imports, \$122,542; exports, \$112,676; duties collected, 12,666.37. The collections at the Customs House during the fiscal year ending June, 1880, are—Import duties, \$155,628.92; steamboat tonnage, 724.08; report and license fees, \$302; other collections \$500.20; total, \$157,219.20. The June collection at the inland revenue office were \$12,179.45. For the same month last year they were \$6,204.81.

HALIFAX.—The receipts at the Halifax custom house during the month of June, 1880, amounted to \$69,665, being an increase over June, 1879, of \$17,049.

Receipts of the Inland Revenue office during June amounted to \$22,409, being an increase of \$6,065 over the same month last year.

The customs receipts in June were \$68,879 against \$64,687 in June last year.

Campbellford Notes.

CAMPBELLEFORD, July 2nd. Our volunteers, forty-two in number, under Capt. H. H. Housheer, returned on Tuesday evening last, after six days drill at Cobourg. They were camped on the Agricultural grounds. Their pay was 50c per day instead of \$1.20 as before stated. They were allowed 14c per mile both ways, for travelling expenses, and 25c per day each man for rations. Col. Smith, commander of the Battalion with the other officers expressed themselves highly pleased with the manner in which the men behaved, and for their steady march on foot, and on horseback. Campbellford was especially complimented for his roll corresponding so well with the names. Several members made their appearance on the parade for inspection who had not been seen before in camp on any of the previous days. Should this meet the eyes of the public, it might be thought to be the well known remarks of the immortal Nelson, "England expects that every man shall do his duty."

The whole battalion was greatly praised for their neat appearance. The inspection lasted from 9 a. m. until 1 p. m.

Stirling News.

(From Our Own Correspondent.) Our natal day was rather quiet, many persons taking advantage of the lovely weather and going to Trenton's birthday, when it is to be hoped a bouncing healthy baby "town" came into existence; and many of our male population being in "Camp" under the command of Captain Fidler. How the "ladies" missed their Stirling boys that day, as it is the last holiday for so long a time. Perhaps the most pleasant party wended their way to the foot of Mount Murray on the banks of the Trent, and outed it for the day, to the number of some 80 under the genial leadership of Mrs. Milne. Some from Belleville, joining the party, and with boating, fishing and lounging, the holiday was here most pleasantly spent.

A rumor was current in Belleville and elsewhere that two of our nicest young ladies were injured by a runaway horse, in fact one killed. Letters of condolence reached the family of the supposed deceased from Trenton and Belleville. The principals in the matter are much pleased to know that the rumor is a mistake. The one not being ready to throw off this mortal coil, and the other has a decided objection to doctor's visits.

News Condensed.

—The Lachine Canal was to be reopened to-day.
—The wheat harvest has commenced in the Niagara district.
—A branch railway is to be built from Hull to the iron mines, Ottawa.
—Mr. Joseph Hickson and family have gone to Caccana.

—Wm. Deamores, of Dundas, dropped dead on the street in Hamilton on the 4th inst.
—The Hon. Mr. Mason will act as President of the Council until his successor is appointed.

—Duke's Theatre, High Holborn, was entirely destroyed by fire on the 4th. Loss \$25,000.

—Hon. Messrs. Mackenzie-Bowell and James Macdonald left Ottawa for Halifax on Saturday night.

—Sir Leonard Tilley is to lay the cornerstone of a new Methodist church at Morrisburg to-morrow.

—300 excursionists from Alabama, Georgia and other Southern States arrived in Toronto on Saturday.

—John Allen, of Chelsea, near Ottawa, attempted to commit suicide on the 3rd by shooting himself. He may recover.

—Mr. Collingwood Schreiber, Chief Engineer of the Canada Pacific Railway, left last night for British Columbia.

The Pall Mall Gazette understands that a second confirmation has been received of the repulse of General Skobeloff.

The rain on Friday night put out the extensive forests on Long Island. The space burnt over is eight miles long and five wide.

The statue to Robert Raikes, the originator of Sunday Schools, was unveiled on the same bank on Saturday by Lord Shaftesbury.

The receipts of the Great Western Railway for the week ending June 25th, show an increase of \$20,477 over the corresponding week of last year.

In the cricket match between Montreal and Ottawa on the 1st, Montreal made 402, and of this Bowling made 209, the highest score in the history of the game.

George Ripley, a well-known American writer, and literary editor of the New York Tribune, died in New York on the 4th inst., in his 78th year.

Much anxiety exists in the European quarters of Constantinople at the attitude of the Mussulman population. Fears of an outbreak are entertained.

A Boston Company has purchased 1400 acres of wood land near Glen Sutton, Que., and proposes erecting a large sawing thereon for the manufacture of butter.

Two convicts, named Wm. Gilbert and Jas. Butler, escaped from the Kingston Penitentiary on the 2nd and got to the city, but were finally run down and captured.

RUN OVER.

Horrible Death.

What Strong Drink Will Do.

(By the Dominion Line).

CONTOUR, July 1st, 1880. One of the saddest accidents that has taken place within our district for some time past happened between five and six o'clock yesterday morning. Thos. Canally and Patrick O'Connell, both 16 and 14 respectively, went with a horrible death, being run over by a west bound freight train. Young Canally was so frightfully mangled that he could not be recognized, parts of his body being picked up for some yards along the track. Canally hearing the train coming managed to get off the track and ran some distance, but was struck on the head and is supposed to have lived for some time afterwards. The young fellows, who were paid off the night before, had indulged too freely in liquor and are believed to have been lying on the track asleep about a mile above here.

Coroner Ewing empaneled a jury to try their bodies yesterday morning. The inquest was adjourned until 7 o'clock this evening. It has cast a gloom over the town, being the conversation of all, and it is to be hoped that this will be a warning to all who indulge in intoxicating drinks. Canally was interred yesterday afternoon and Canally will be buried to-day.

Correspondence.

Whilst correspondents will be accorded space for the expression of their ideas on topics of public interest, they are in cases where the views so expressed are simply those of the correspondents themselves.

For the Intelligence.

Mr. EMBRO.—It appears to me as well as to most of the ratepayers of the City that the information given them by the City Fathers as to their manner of conducting the business of the City is very meagre. Except such information as your reports of the meetings of the Council furnish, the ratepayers are left almost entirely in the dark as to the manner in which the city business is carried on. In view of the heavy rate of taxation, the tax payers are naturally anxious to obtain the fullest possible information as to the way in which the city money is expended and expect from the Council a yearly account of their financial stewardship in the most open and above board manner.

Understanding that the Receipts and Expenditures for the year 1879 were to be published in the City papers, as required by law, I have been watching your columns to see what kind of an exhibit would be made, but have watched in vain. A friend, however, showed me this morning a copy of the Receipts and Expenditures which very few of the people see or read, which contained an Abstract of the Receipts and Expenditures. Now, Mr. Editor, as the City Clerk is required by law to advertise the Receipts and Expenditures of the City Council in the City papers, I should like to ask if the Clerk of the Council gave any directions as to the publication of such Abstract, or if the Clerk did it upon his own responsibility.

I cannot believe that the Council would sanction the concealment of matters of such vital importance from the tax-payers, and I am sure that the Clerk of the Council should not be allowed to do so.

Can you give any explanation to the ratepayers?

July 5, 1880. MARY RATEPAYERS.

Wants.

Twenty-five words under this head 25 cents first insertion. Each additional insertion 10c.

WANTED.—An experienced general servant wanted, apply to Mrs. JAS. CONRY, corner Hotel and William streets. July 5th. 61454.

Twenty-five words under this head 25 cents first insertion. Each additional insertion 10c.

BOARDERS.—Vacancy for a few boarders at Mrs. Martin's, Front St. d. t.

PROCLAMATION.

WAR DECLARED.

AN indignation meeting will be called on or about the 1st day of August, at head quarters of the manufacturers and dealers in Kid Gloves at Belleville, to see what measures will be taken to resist a servile and unchristian sale of such goods, namely, Kid Gloves.

PROCLAMATION.

Whereas, Thos. A. Smith, of Campbell St., Ottawa, has opened a Steam Laundry, and whereas, the persons who get their clothes made to look new for 10c, or their old clothes done over to look new for a trilling cost, and whereas, the dealers in and manufacturers of Kid Gloves, have been doing an unchristian and unchristian business.

Resolved, we the undersigned have declared war against the said Thos. A. Smith, and will fight until on this line of action, we have secured the clothing of the people in the battle.

Mr. Thos. A. Smith wishes to inform the people of Belleville, that he is not afraid, and is ready to and will (die) either for his country or for any one who wishes him to (die).

Moirs L. O. L. No. 727.

THE Regular Monthly Meeting of the above named Lodge will be held on Monday, August 1st, at 8 o'clock, evening, the 1st July, at 8 o'clock sharp. Every member is expected to be present, as there is business of importance.

Visiting brethren are welcome.

DAVID SERVIS, Secretary.

NOTICE.

I HEREBY notify the public against buying or negotiating for any notes against me in favor of William Henry, as I have not received value for such notes, and will not be held responsible for the same.

THOMAS HENRY, 222d St. Marlbank, July 2, 1880.

TENDERS WANTED.

TENDERS will be received up to the 12th July for the erection of a parsonage in the Village of Madoc. Plans and specifications to be had at the office of Evans & Bolger, Belleville, and at the store of Sydney Ross & Co., Madoc.

Sealed proposals must be handed to accept the lowest or any tender.

E. L. WEISS, Sec. Treas. 626104

VALUABLE MILL PRIVILEGE.

Premises for Sale.

THE subscribers offer for sale one of the best Mill sites and water privileges on the River Minto, just outside the limits of the City of Belleville, a few rods from the Grand Trunk Railway station. The main travelled road from Belleville to the Northern Township and village runs through the premises, leaving three acres on the west side, embracing canal, excavated at a large outlay, 400 feet long, 25 feet wide and 10 feet deep, with water level foundations, walls 100 feet long, 56 feet wide and 4 feet thick, foundation depth 6 feet with necessary opening for water to pass at any point in a length of 150 yards on the river. Any amount of water power available in some of the year, and from 30 to 40 horse power the rest of the year. On the east side of the road are 63 acres of land capable of being laid out in building lots or being used in connection with any mill or manufacturing for yard purposes or for both.

The above is one of the most valuable property of the kind ever offered for sale in this Province.

For terms and particulars apply to BELL & PONTON, Vendor's Solicitors, Belleville, July 2, 1880. 431

IN CHANCERY.

MUCKLESTON VS. DAVIS.

PURSUANT to the decree and final order for sale made in this cause, and dated respectively the twenty-second day of September, A.D. 1879, and the twenty-fifth day of May, A.D. 1880, there will be sold with the approval of James Alexander Henderson, Esquire, Master of this Court, at Kingston, by Ralph Purdy, Auctioneer, at his auction block, at the corner of Bridge Street, in the City of Belleville, at the hour of noon on

SATURDAY, THE 10TH DAY OF JULY next, the following lands and premises, in one parcel, namely, lot number eleven on the east side of Cedar Street on the plan of Glass' Block, laid out as part of lot three in the first concession of Thurlow, now in the City of Belleville.

The said lot is centrally situated and has a frontage of forty feet on Cedar Street, a half an acre and twenty-five feet eleven inches. The lot is fenced and on it is a frame building used as a carpenter shop.

There will be no reserve bidding as fixed by the said Master.

Terms ten per cent. cash, balance in one month.

In all other respects the terms and conditions of sale will be the standing conditions of the Court of Chancery.

Further particulars can be had from Messrs. Kirkpatrick and Rogers, Solicitors, Kingston, and Ralph Purdy, Auctioneer, Belleville.

Dated Master's office, Kingston, on 7th June, A. D. 1880.

(Signed) JAS. A. HENDERSON, Master.

Auction Sale.

OF VALUABLE CITY HARBOR PROPERTY.

UNDER and by virtue of the power of sale contained in a certain indenture of mortgage from Joseph Garrett Vandusen and Mary Jane Vandusen, his wife, to the Consolidated Mortgage and Investment Co., dated the 23rd day of January, A.D. 1878, and registered on the 17th day of February, A.D. 1878, which will be produced at the time of Sale, default in payment having been made, there will be sold by Public Auction, on the premises (formerly known as the Jones & Vandusen Sawmill property, next to the City of Belleville, formerly known as the Farmers' Warehousing Company Elevator), in the City of Belleville, on

Saturday, the 10th day of July A.D. 1880, at the hour of 12 o'clock, noon, that valuable Dock and Wharfage property described as follows, that is to say:

All and singular the certain parcel or tract of land and premises situate, lying and being in the Town of Belleville, in the County of Hastings, consisting of W. Water lot, situated on the west side of Pinnacle Street, in the Town of Belleville, and lying directly south of the piece of land lately leased by the Corporation of the Town of Belleville to the James Henry Simpson, which said piece or parcel of land is bounded and bounded, or may be known as follows, that is to say:

Commencing at the south-west angle of the premises heretofore leased as aforesaid to the said James Henry Simpson, thence southerly following the western range of the wharf originally built by one Henry Pretty three hundred and sixty-five feet, more or less, to the south-east corner of the said wharf, thence north fifty-five degrees east more or less, to a point on range of the west side of Pinnacle Street, and at right angles to the said Street, thence north thirty-three degrees west, following the west side of Pinnacle Street more or less to the south-east angle of lot leased to said Simpson, thence south eighty-two degrees west, following the southern limit of the said James Henry Simpson premises two hundred and four feet more or less, to the place of beginning. Reserving out and from the above described premises, for public use and purposes, the Light-house with the appurtenances now erected on the pier or wharf on said premises, together with the lands on which the same stands, and the right of way at all times for the north and south wharves of the Municipal Corporation of the City of Belleville, with horses and vehicles or on foot to go across the above described lands and premises to and from the said Light-house, and also reserving thereout and therefrom that portion thereof reserved in the patent from the Crown.

The purchaser shall pay the full amount of sale deposit of ten dollars for every hundred dollars of the purchase money, another ten per cent. in four weeks from the date of sale, and the balance to be secured by mortgage upon the premises, bearing interest at eight per centum per annum, together with collateral security, if required.

Abstract of title and title deeds can be seen, and all information obtained at the Law office of George Dean Dickson, Vendor's Solicitor, Bridge Street.

GEO. D. DICKSON, Vendor's Solicitor.

Daily Intelligencer.
 BELLEVILLE, TUESDAY, JULY 6.
 The Tariff and the "Necessaries of Life."

The Ottawa organ of the Opposition, finding it impossible to sustain its reckless and untruthful assertion that the price of the necessities of life has increased from 25 per cent to 50 per cent, and that the N. P. has tried to crawl out of the pitfall in which it has placed itself by placing the burden of proof on the INTELLIGENCER. This will not do, however, as the *Free Press* made and reiterated a statement which we challenged to prove, and which having failed to do, it tacitly confesses judgment, but asks the defendant to prove a negative. Even this has been done, so far as market reports are concerned. The final assertion, with which our opponent seeks to vary the issue and founder out of the matter is equally false with its original assertion, namely that the tariff shows an increase such as is indicated—that is to say, an increase of from 25 to 50 per cent. on the necessities of life. It is not incumbent on us to prove a negative as to this last assertion, but just to oblige our courteous, well informed and veracious adversary, this shall be done to a demonstration. The comparison here made is between the Mackenzie-Cartwright tariff, which was in force up to March 14th, 1879, and the tariff now in operation:

Grain Tariff.

The articles above enumerated comprise all the "necessaries," which the *Free Press* asserts have risen in price from 25 to 50 per cent under the N. P., and as to which it reiterates that "the tariff shows the increase we have indicated in black and white. If a writer so reckless can thus see his statements put to the proof and utterly disproved without blushing, he must be utterly shameless. The theory of the *Free Press* is that the price of articles charged with duty rises to the extent of the duty, so that the "25 to 50 per cent," increase of price of which the *Free Press* prates so glibly could not, according to free-trade contentions, even if it were true, as asserted, which we have abundantly shown from official documents it is not, to be chargeable to the N. P. Further, we venture to say that a number of articles on which the rate of duty has been increased have not been increased in price one cent since the N. P. came into effect, and the reason is that home competition has kept prices at their former level. This is in accordance with the experience of the United States and other countries which have adopted a protective policy, and the same result, and to a larger extent, has also been felt, may be expected in Canada in the future, as the extent and variety of our manufactures become greater.

TORONTO AND OTTAWA RAILWAY.—The *Toronto Telegram* says:—"There is really no ground for all the suspicions the *Globe* is keeping aloft in regard to the intention of the new owners of the Toronto and Ottawa railway scheme to hand their newly acquired charter over to the Grand Trunk. The gentlemen now at the head of the enterprise have publicly given their word that they are acting honestly and above board, and that they will keep faith with the municipalities that granted bonuses if the cost of construction is found to be within reasonable limits. Their word should be accepted without reservation, for they are gentlemen of honor and public standing. It will be time enough for the *Globe* to abuse them when it finds that they have sold out to the Grand Trunk. In the meantime the public is satisfied with their assurance."

EXPLORATION.—An Ottawa report says: Mr. Bailey and party have been making an exploratory survey of the line between Peterborough and Ottawa, and after leaving here will survey the line between Peterborough and Toronto; an instrumental survey will afterwards be made. For sixty miles west of this place the projected line is said to be very favorable for railway construction and beyond that it is more difficult. Mr. Gooderham on being questioned said that the company would build the road, providing they found it feasible and could secure the necessary municipal aid. When asked if the Grand Trunk had any connection with the road, he said that any people would not believe him if he denied it, and thought the municipalities interested, instead of hampering the efforts, should give them every encouragement. Mr. Lyle, the Solicitor, denied that the Grand Trunk had at present anything to do with the enterprise, and that the present promoters were desirous of building the road. Until they know the result of the present negotiations, they could scarcely tell precisely what they could do.

IRON TRADE.—The exports of iron from Great Britain to the United States during the five months ending May 31st, 1880, was \$90,272, against \$92,534, during the corresponding period of 1879.

Nothing Done.

A week or two ago the attention of the Board of Health was called to the fact that the sanitary regulations issued by them early in the season had only been observed by a small portion of the people—that the system of inspection which the Board are expected and pledged to carry out had been nearly entirely neglected—that privies and cesspools, and dirty yards, in many parts of the city remained unclean—and that in fact they had failed to perform the duties entrusted to them by the people; and yet nothing has been done to remedy the evils complained of.

We do not wish to be alarmists, nor do we desire to find unnecessary fault. But this is too serious a matter to trifle with. Should an epidemic break out in this City at the present time, lacking as we do effective sewerage and drainage, there would be a rich harvest for the Doctors, and a richer harvest for Death. And who can say what moment, fever or cholera or some other malignant disease will carry death to our households? By the neglect to enforce the wise sanitary rules of the Board of Health, we have offered a premium to epidemics, and we will have only ourselves to blame if the penalty of our neglect is incurred. The Board of Health are possessed of arbitrary powers. Let them exercise them or abdicate their position.

Grand Black Chapter of Canada.

KINGSTON, 2nd.—The annual session of the above chapter was held in the Orange Hall, in this city, on Dominion Day, a large number of delegates being present from Toronto, Ottawa, Pembroke, Renfrew, Lanark, Pontiac and Kingston. The Grand Chapter opened at 9 o'clock a. m., Sir Knight A. F. Graham in the chair. After transacting the usual routine and other important business, the Council adjourned at 2 o'clock p. m.

At the evening session the following air knights were elected officers for the current year:—

A. F. Graham, Right Worshipful Grand Master.
 J. Marshall, Deputy Grand Master.
 William Shaw, Jr., Deputy Grand Master.
 James Morris, Grand Chaplain.
 J. C. Wilson, Deputy Grand Chaplain.
 Geo. Ford, Grand Registrar.
 Thos. Dagg, Grand Treasurer.
 H. O. Wood, Grand Lecturer.
 Ed. McMullen, Grand Censor.
 W. J. Brown, Grand Standard Bearer.
 H. Kerr, Grand Pursuivant.
 S. Thornton, Deputy Grand Registrar.
 D. Brown, Deputy Grand Treasurer.
 Thos. Stewart, John Clanson, F. Morrison and A. Hodgins, Deputy Grand Lecturers.
 H. Bobbs, R. Dolan, J. R. Donaldson and J. Brown, Deputy Grand Censors.
 W. J. Agrest, A. McConaghy, W. Coffey and W. Hogarth, Deputy Grand Standard Bearers.
 John Alexander, Grand Deputy Pursuivant.
 A. Parker, Geo. H. Pidgeon, J. L. Shaw, E. B. Read, W. Smith, J. P. Johnson, M. Cowley and J. Graham, Grand Committee.

A DOCTOR'S DOINGS

A YOUNG MONTREALER'S LOVE INTRIGUES IN MINNEAPOLIS.
 Young Dr. Hammond, a native of Montreal, who finished his medical education here, settled some time since in Minneapolis. His name soon became associated with that of a handsome young lady there, and that they were engaged to be married was little doubted by all who knew them. To the intense surprise of the circles in which they moved, about a month since Dr. Hammond married another young lady of fortune. Many were the expressions of sympathy which the doctor's first love received from her friends, who were never exhausted in pouring abuse upon her perfidious lover. But they were all compelled to admit her fortitude in the trying situation, for she simply answered to all their commiserations, "If he loved her better let him have her, I don't care."

This strange independence, however, was fully explained when, after living with his wife for several weeks, Dr. Hammond suddenly left her and eloped with his first love and \$15,000 of his wife's fortune. The detective agencies throughout the States were quickly communicated with, and the young practitioner was traced to Montreal. Here he spent two days, and then left again for parts unknown.

MILITARY GRADUATES ON A TOUR.—Ten of the Royal Military College Cadets have left Kingston for a two week trip east, in charge of Major Walker. R. E. It is intended that they shall visit Montreal, Quebec, Halifax, and other places, and examine the great military positions and fortresses, and the chief civil engineering works in progress, taking a type of each. At Halifax the cadets will examine the military position generally, inspect the magazines, fortifications, barracks, dockyard, torpedo establishments, war ships, &c. They will be under the usual control and discipline during the tour.

INSECTS IN CLOVER.—The farmers of New York State are much alarmed at the depredations of two new insect enemies of the clover plant. The worst of the two is a midge which attacks the blossoms of the clover and destroys them. In the neighborhood of Ithaca no clover seed has been obtained for two or three years in consequence of this pest. At present whole fields which should be blossoming are failing to show flowers, the insects having done their work completely. The other pest is a borer which attacks the roots of clover and destroys the plant by the acre.

STEAMSHIP WRECK.—On the 24th ult. the iron steamship *F. W. Harris* went ashore at the north end of Chance Cove, Newfoundland, and became a total wreck. The passengers and crew were all taken off, and the Captain, remaining to the last, saved his life by jumping into the water as the steamer gave the final plunge, after rolling off the fatal reef. Chance Cove has been the scene of a great many shipwrecks, accompanied with great loss of life.

News Condensed.

—Prince Leopold is in Quebec.
 —The population of Chicago is 400,000.
 —737 emigrants arrived by the Canadian.
 —The Lachine Canal was re-opened yesterday.
 —The Midland Railway is now 142 miles long.
 —Burglaries are of nightly occurrence in Toronto.
 —Chief Justice Moss is recovering from his serious illness.
 —Wire fences are coming into more general use in the country.
 —Sawdust floating will take up his residence in Nova Scotia.
 —Hon. H. R. Prince's Louie and suite returned to Quebec yesterday.
 —Rev. Henry Ward Beecher is to lecture in Kingston on the 24th inst.
 —A large quantity of smuggled jewelry was seized at Montreal on the 5th inst.
 —Hon. John O'Connor, Postmaster-General, arrived at Winnipeg on the 5th inst.
 —Peter Hols, of Barton Township, near Hamilton, died suddenly on the 5th inst.
 —A vein of silver ore has been struck in connection with the iron mines in Hull Township.

—There is a lad in East Nisourai named Thorwald, aged four years and a half, who weighs 100 lbs.
 —Mr. James Shields, of Sheffield, has discovered a lead of gold bearing quartz on his farm.
 —A despatch from Copenhagen states that a severe small-pox epidemic is raging in Christiania.
 —Judge Clark, of Oshawa, has been elected Chairman of the Canada Pacific Railway Commission.
 —Henry, the Bearbrook murderer, is said to be in the lumbering districts of Northern New York State.
 —The distinguished traveller, Claudio Jannet and Count de Foucault, arrived at Ottawa on the 5th inst.
 —A steamer was run down at Philadelphia on the 5th by a steamer, and several persons were drowned.

—On the 4th inst. the premises of Toos Coats & Co., were broken into by burglars and a quantity of goods stolen.
 —Prince Demidoff, who recently sold his estate of San Donato, has just left at play in one night, at Madrid, \$1,693,073.
 —The *Oka Indians* will, it is believed, be shortly removed from Oka settlement to the neighborhood of Perry Sound, Ont.
 —The French Chamber of Deputies have unanimously adopted the bill reducing the duty on sugar to 30 francs after 1st Oct.

—An old man, name unknown, was killed by a freight train running over him near Kingston on the night of the 4th inst.
 —Mr. Gladstone's expenses in the Midlothian election are returned at \$2,704, and those of Lord Dalkeith at \$4,078.
 —Mrs. Bering, of Lewis, Quebec, attempted to light a fire with coal oil on the 4th inst. She will never light fires any more.
 —Latest intelligence from Buenos Ayres announces peace has been concluded, Buenos Ayres having submitted to national authorities.

—The Credit Valley Railway is said to have expended \$20,000 in fitting the other roads and securing an entrance into the city of Toronto.
 —During a row between river drivers and Indians at the Desert, near Ottawa, on the 3rd, an Indian Chief named Michel, received his death-blow.
 —Lord Dummer, who, it is said, represented the syndicate of English capitalists regarding the C. P. Railway negotiations, left on Saturday for New York.

—On the 5th inst., a yacht containing 14 persons was capsized at Wheat Lake, Minnesota. One man and seven women and children were drowned.
 —The *Spaniards* severely deprecate the increasing trade in America that Italian sold the recent race. The writer attributes Man's illness to the overtaxation of his constitution.
 —On the 4th inst., Hugh Hannah, a farmer, living near Bryant, Indiana, attempted to cross a submerged bridge over a stream near his home in a wagon with his wife and five children. The strong current swept the wagon from the bridge, and all except Mrs. Hannah were drowned.

—The ocean vessels arriving at Montreal from the opening of navigation to the westward, with 183 for the summer period, the clearances number 169, against 137 last year. These figures show a gain of twenty-five vessels inward and twenty-three outward.
 —After a recent heavy thunder shower, Mr. D. W. Augustine found in the centre of a corn field on his farm in the 4th concession of Malahide, nine small Catfish, and as there is no water containing fish of any kind within two miles of the place, he feels confident they came down with the rain.

Terrible Warning.
 The following "terrible warning" appears in the telegraphic despatches:
 New York, 3rd.—The sudden death of Susan B. Anthony, a girl of 29, Trinity Mission, New York, was investigated by the coroner, who found reason to believe the girl died from taking too tightly the previous day.

Will the warning be heeded? Not likely. Women will lace and throw themselves under the Juggernaut of Fashion as long as waters run and rivers flow. And the more warnings, the more necessary there will be for warnings, for who ever knew a devotee of fashion give up her cherished darlings, even though sickness, deformity and death stared her in the face!

CABINET CHANGES.—The Ottawa correspondent of the *Montreal Gazette* says: "The following further rumors of changes in the Cabinet, although not official, are not far from being correct, the latest being that no change will be made until after the close of the session at Quebec, when Mr. Chaplain will succeed Mr. Masson, whose resignation has been accepted, and Mr. Caron will also enter the Cabinet, as the successor of Mr. Baby, who will accept the judgeship recently vacated by the resignation of Judge Pothier. It is also said that the members of the Cabinet, several changes of portfolios will take place amongst others that of the Interior, Sir John taking the Presidency of the Council. The rumor of Hon. Jno. O'Connor's resignation to accept the Chief Justiceship of Manitoba has also revived, and the names of Messrs. Dalton McCarthy, Daly, of Halifax, and Jno. Costigan are mentioned in connection with his successorship."

TERRIBLE GAS EXPLOSION

30 PEOPLE KILLED AND WOUNDED
400 HOUSES DEMOLISHED.
 LONDON, July 6.
 A terrible explosion of gas occurred this evening at seven o'clock in a street in the vicinity of Tottenham Court Road. For some time past gas had been noticed escaping in large quantities and a man was sent to examine the pipes. He applied a light and a series of explosions occurred. Four hundred houses are injured and one demolished. Many having large rents are rendered untenable. All the windows along the line of the explosion were demolished, the chimney pots thrown down, and the shock was felt as far as Regent Street. A dense volume of gas issued from the trenches, and the air was charged almost to suffocation. The performance of "Forget-Me-Not" at the Prince of Wales theatre had to be suspended. The streets and buildings in the neighborhood are in total darkness. Vast crowds are flocking to the scene of the disaster, and a body of police and firemen are on duty. An eye witness, who was standing at his door in Charlotte street, says he noticed a cloud of bricks and stones shot up a hundred feet into the air, followed by a loud report, which rolled down the street like artillery fire. He observed people stagger and fall, and the ground shook as if there was an earthquake. The workmen who applied the light in search of the leak was blown a great distance away and killed. The greatest excitement prevails in the neighborhood.

Wants.
 Twenty-five words under this head 25 cents first insertion. Each additional insertion 10 cts.
WANTED.—An experienced general servant wanted, apply to Mrs. Jas. Conroy, near Hotel and William street, July 5th. 6345.
WANTED.—At once a general servant girl, with references. Apply J. A. Brock & Co., 279 Front St. 53445.

MORNING DESPATCHES.
EUROPEAN.
 PARIS, July 6.—The anniversary of American Independence was celebrated last night by a grand banquet, Minister Hayes in the chair. The principal toasts were by ex-Governor Hoffman, Judge Black, Gov. Stanford, and others.
 At Havre, on Sunday, a crowd assembled to witness the departure of the *Jeune* for Paris. Several persons laughed at the emigrants; Col. Espe, 119th Regt., took offense, and a violent altercation ensued. The Col. ordered a detachment of troops, and charged the people twice with fixed bayonets. There was rioting, but no excitement and indignation were aroused. The behavior of the Colonel is accounted for by the fact that relative of his was among the *Jeune*.
 Near Leeman, on Sunday, a balloon burst in mid-air, and two lives were lost.

AMERICAN.
 NEW YORK, July 6.—The deaths of fifty children here from heat has been reported in the 24 hours ending on yesterday. At the Chambers Street Hospital last evening the doctors attended thirty cases, mostly boys who shot themselves while celebrating the 4th. None were seriously injured. Seldom has there been so little drunkenness as was seen on the streets yesterday. Four cases of drowning are reported.
 Conrad Karl, aged 64, suicided by hanging at 148th St. last night.
 Patrick Merry yesterday shot Chas. Schicks in the left saloon. Schicks' wound is possibly fatal.
 Rufus Sawyer was arrested last night while attempting to kill his wife, Narcissa Sawyer, an actress, during a quarrel.

The total receipts of grain for this port from Jan. to June 30th were 55,584,000 bush, against 47,138,283 bush, the corresponding period of 1879.
 Cubans here report that Gen. Garcia, the insurgent leader, recently defeated the Spaniards at Manzanillo, and claim several other successes in Cuba. He declared that eleven officers, including Prado, Dominguez, Guevara and Rosado, will sail from the United States, within a month for Cuba. On their arrival they will find men waiting to join them, and will take the field at once.
 The Tribune's Washington special says that Commissioner Lusk expects to break ground on Wednesday to lay the foundation for the new experimental sugar mill, in order more thoroughly to test the saccharine possibilities of cornstarch and sorghum. The Commissioner has samples of American grown cane which he will soon exhibit.

Jersey City, July 6.—Laurence Fitzhugh was killed and Jas. Kennedy seriously injured by a locomotive here yesterday.
 BELLEVILLE, N. J., June 6.—La Sing, a Chinese coolie, was yesterday probably fatally, it is supposed by a white man employed in a S. C. Laundry.
 COLUMBIA, S. C., July 6.—A severe cyclone passed here yesterday. The Penitentiary, a massive brick building, was almost demolished.

THE PACIFIC RAILWAY.—In further confirmation of the report that English capitalists are ready to take the Pacific Railway into their own hands, the Government, we take the following from the *Montreal Gazette* of the 5th inst.—"In connection with Sir John Macdonald's remarks at Bath pipin and the editorial in the *Gazette*, the following will be of interest. It comes from good authority. It is said that the reason of Sir Chas. Tupper's delay in going to Manitoba, and the probability of his visiting England first is that for some time past Government has been in treaty with representatives of a syndicate of English capitalists who are now in Ottawa with a view to forming a company with \$20,000,000 capital, to build the whole Pacific Railway, the Government giving a land subsidy and taking no further responsibility. Negotiations are said to be very nearly completed; Sir Chas. is only waiting advice from the other side before going to England to ratify the agreement with the principals."

CAST ON THE WORLD:

The Border Marriage.

A STORY OF THE GREAT GLASGOW

BANK ROBBERY.

CONTINUED.

He stood some moments motionless, gasp-

ing at Charles. Then he recoiled a step

and his look expressed astonished inquiry.

"You here? I slowly articulated, in a

husky voice, so different from the rich,

clear tones which he usually spoke.

"This meeting is not designed on my part,"

Mr. Ravensworth, answered Charles.

I did not expect you to be here, and I

cannot say that I should have taken another

step. I have the unfortunate impression

I will relieve you of my presence instantly.

And as he spoke the youth turned to enter

the door belonging to the Grange.

"Stay," said Philip. "Since we have so

much to say to each other, we may as well

say what we have to say. What am I to

suppose by your presence here at this

moment? But what an extraordinary

meeting! What an amazing effect was produced

on both sides and pleasure kept you far

from this."

"I have business in the neighborhood,"

replied Charles, rather surprised to see that

Ravensworth was not disinclined to con-

verse with him. He would have been glad

of the bank for what Philip might further

say.

The latter stood gazing at him with that

expression of face which was to Charles so

familiar, and he was not without the feeling

that he could not behold without anxious pity.

"You have come to see Lydia?" said

Ravensworth at length.

Charles was hesitating to disclaim this

purpose, but the other hastily interposed

him by a gesture.

"No, do not hesitate to own it. I am

not displeased to find so. Come down

to my room, and we will talk. Your

mind and heart have been so embittered

against me that you cannot force

yourself to continue the interview."

"Oh, Mr. Ravensworth," said Charles,

"how can I have any feeling of bitterness

towards one who has been such a generous

benefactor?"

And as he spoke he descended the bank,

and stood beside Philip on the road.

Ravensworth seemed to be struggling

under the power of great emotion. He

pressed his lips together to keep them

from quivering, but his firm drawn features

and the troubled gleam in his bloodshot

eyes proclaimed the force of his inward

feeling.

"Charles," he said, and his voice was

deep and hoarse, "I have been in hell

since the day we parted."

"Mr. Ravensworth?"

"A man's pride works desperately to pre-

vent him from saying that he had done

wrong, and my pride has done this for

months back. Look at me. Am I the

man you once knew in Scotland last sum-

mer? I am I like the man you have known

during the last ten years?"

"Indeed, sir, you are greatly altered,"

answered Charles. "It was much struck by

it the moment I saw you and grieved at the

change."

"Mental suffering has done it—the war

in my soul has done it. For months

I have been going on—passion and pride

on one side, and consciousness of gross

conduct and injustice on the other. Pride

has kept its ground till now, though the

suffering I have endured is not a secret

in words. You and every one can see the

effects on my frame. I was not even to be

broken by the powerful force of Lydia—

the girl who was my wife. I have rushed

No; though what I say may well give

you that impression. Incredible though

the statement appears, I have not the

slightest doubt but it is true.

"How on earth do you come to have such

a suspicion? I fear, however it may

have been given to you, credence

to it. Evidently to do him justice

was not likely to make a slip of that kind. He

was too proud to fall into such a weakness.

His sin was entirely of another sort. Her

loyalty has no cause of complaint other

before or since their marriage."

"You mistake me so far," returned Charles

"If his loyalty be my father, her loyalty

is my mother."

"Heaven and earth what mystery is this!"

exclaimed Ravensworth. "This is a suspi-

cion which must be explained or expland

instantly. Tell me the grounds on which

you speak."

"I have taken no other step," answered

Philip, and told him Mrs. Fairweather's

story as far as he could remember it, and

we may be sure that he remembered it very

particularly.

The effect was electrical. At the very

first Philip caught the secret of identity,

and he, as Charles had done, could run his

finger through the mystery, and in the

new light, pointed conclusively to the

truth of his suspicion. But what an extraor-

dinary what an amazing effect was produced

on both sides and pleasure kept you far

from this."

"I have business in the neighborhood,"

replied Charles, rather surprised to see that

Ravensworth was not disinclined to con-

verse with him. He would have been glad

of the bank for what Philip might further

say.

The latter stood gazing at him with that

expression of face which was to Charles so

familiar, and he was not without the feeling

that he could not behold without anxious pity.

"You have come to see Lydia?" said

Ravensworth at length.

Charles was hesitating to disclaim this

purpose, but the other hastily interposed

him by a gesture.

"No, do not hesitate to own it. I am

not displeased to find so. Come down

to my room, and we will talk. Your

mind and heart have been so embittered

against me that you cannot force

yourself to continue the interview."

"Oh, Mr. Ravensworth," said Charles,

"how can I have any feeling of bitterness

towards one who has been such a generous

benefactor?"

And as he spoke he descended the bank,

and stood beside Philip on the road.

Ravensworth seemed to be struggling

under the power of great emotion. He

pressed his lips together to keep them

from quivering, but his firm drawn features

and the troubled gleam in his bloodshot

eyes proclaimed the force of his inward

feeling.

"Charles," he said, and his voice was

deep and hoarse, "I have been in hell

since the day we parted."

"Mr. Ravensworth?"

RELLEVILLE, WEDNESDAY, JULY 7.
What is to be Done?

Men of Belleville, and men of Hastings! you who have money in bonds, and in stocks, and in banks, and hid away in old chests, lying comparatively idle, do not want to put it where it will not only bring you a handsome dividend, but will at the same time, make your City and County the centers of mammoth manufactures, and the most prosperous and wealthy City and County in the Province! Capitalists of Belleville, and of Hastings! you who have so deep and personal an interest in the future of this City and County, upon whose prosperity depends your prosperity, in whose welfare your growth and success, whose downfall and ruin will be your downfall and ruin, will you not awake to the necessities and opportunities of the hour, and take advantage of, and use them while you may?

For manufacturing purposes Belleville is most advantageously situated. Its central location, is easily accessible to the great markets of the world, has railway communication with the great mineral deposits of the North, and the wealth of the immense lumbered lands of the North West to our doors. With manufactures we become the great commercial centre of Ontario—our population would very soon be doubled, trebled or quadrupled—taxation, which is now felt to be a burden, would become lighter—property would greatly increase in value—immense elevators would occupy our docks, and dozens of vessels would be seen where there is now none. Belleville would become the centre of a great whole—sale trade—one factory would follow another, one enterprise stimulate the establishment of another—our city would become the Sheffield or Pittsburgh of Canada, and our capitalists would find a handsome return for their investments. Without manufactures there will be no growth, no prosperity, no bright future for Belleville—property will become still more depreciated in value—taxation will be higher—our artisans and mechanics will migrate to more favorable localities—our capitalists will have no chances for profitable investment. Our city will become a one horse town, and we can write upon our walls that its glory hath departed. This is the history of hundreds of places all over this continent. The towns of push, of enterprise, which rise and prosper by golden opportunities will go ahead and prosper, while the place with its slow-going policy, which is waiting and pondering, and never grasps until the golden opportunity has passed, will sink into inevitable ruin.

This golden opportunity is ours. Shall it be grasped and held fast? It is for you, men and capitalists of Belleville and Hastings, to say. There are manufactures of various kinds which might be established here, which would give profitable employment to thousands of operatives. There are the woolen and the cotton trade, which will admit of still greater development—there is the boot and shoe trade, which would be certain of realizing a handsome profit to the manufacturer—there is the furniture business, in which there is a chance to make large profits—there are a number of other manufactures which might be profitably established—but notably those of Smelting and Iron or Steel Works, for which we have all the natural advantages, and which beyond all others anything else, should at once engage the attention of our business men, property holders, and men of wealth.

To-morrow evening at the City Hall there is an opportunity of hearing the views of practical men with relation to Smelting and Iron Works. Come, then, men and capitalists of Belleville and Hastings, and let us reason together, and see if some scheme cannot be devised by which Belleville can be put on the high road to prosperity and affluence, and the County correspondingly benefited.

REV. MR. HANFORD AGAIN.—It is said that the Rev. Mr. Hanford had finally accepted the offer made by fifty young men to hold Sunday evening services in Albert Hall, Toronto. The Deacons of the Bond St. Church, took upon this step of Mr. Hanford in an unfavorable light, as in all likelihood it would end in the breaking up of that congregation, many of whom still cling to the ostracized clergyman. For his own sake, as well as the interests of Christianity, it is a pity Mr. Hanford had not left for parts unknown.

A REMARKABLE MEDICAL STUDY.—A Chicago reports: "The physicians of this city are puzzled over the case of a woman from whose thigh they have just removed a large tumor, which upon being laid open was found to contain a skull with jaw perfectly formed, and containing some sixty teeth, some rudimentary and some matured, while not a few were partially decayed. On top of the skull was a growth of hair over an inch long."

A London miser, worth \$40,000, is dying of gangrene, arising from the filth in which he wallowed.
The house and sheds of Nathan Brickwell, Ernestown, were burned on the 6th. Loss \$3,000.
Amongst the Canadians registered at the office in London, England, last week, was W. F. Kelso, of Belleville.
The boot and shoe firm of Young, Chapman & Co., Montreal, have suspended. Liabilities \$100,000.
Gen. Sherman arrived at Winnipeg on the 6th. He met with a brilliant reception, the militia taking part.
Canal authorities estimate the damage, direct and indirect, arising from the Lachine Canal disaster at \$40,000.
A boy named Wood, inmate of the Pentagone Reformatory, was drowned on the 6th while bathing.
A telephone has just been tried at Le Mans. The inventor claims to be able to transmit sound to America by cable.
The Mayor of Kingston has authorized the burial of the dead fish that have so long disgraced the public place of that port.
A despatch from Calcutta says a large force of British attacked the village of Mirgool and dispersed the hostile Afghans.
The Canadian team in England defeated a team of the 15th Lancashire Volunteers at Atherton on Monday, by a score of 1,422 to 1,396.
Messrs. A. & C. H. H. of the Senate debates, have been appointed official reporters to the Canada Pacific Railway Commission.
Dr. Cowan has been elected a Conservative candidate for Marquette in place of Mr. Ryan, who intends to retire from public life.
The Canadian has announced his intention of contesting the Ontario election at the coming election, and will run as an Independent.
Two inches of rain fell in the vicinity of New York yesterday and last night, refreshing the country and replenishing the reservoirs.
At a meeting of the City Council of London, Ont., it was resolved to erect a floating bath house in the river Thames at a cost of \$600.
Mr. Scott, Chief Architect of the Public Works Department, left on Saturday on a tour of inspection to Quebec and the Maritime Provinces.
It is stated that West India firms at Lunenburg, N. S., have shipped 34,000 bushels of potatoes to the West Indies since the 1st of August last.
On the 5th Joseph Meyer, a mail carrier between Berthier and St. Herbert, was drowned in the Bayonne river near Berthier, while crossing with a horse.
The contract for the iron superstructure of the railway bridge at the Chaudiere, embraces ten spans of 163 feet each, one of 160 feet, one of 135 feet and one of 235 feet.
Active preparations are being made for the reception of the Masonic Grand Lodge of Canada, which assembles in Guelph on the 14th and 15th inst.
The Chapter is to meet at Guelph.
A boiler of a threshing machine engine exploded on the 6th, at Dunkirk, Ohio, killing seven men and wounding eight others. Two of the eight have since died, and three others, it is said cannot recover. It was a new engine, and had never been used before.
Turkey has finally decided not to accept the recommendation of the Berlin Conference, and a strong party in the country favors sending an immediate declaration of war to Athens should the Greeks effect any military concentration on the frontier.

LT. GOV. ROBINSON.—The Globe announces that Hon. J. B. Robinson has received his commission as Lt. Governor, and will be sworn into office to-day.

THE INDIAN DEFICIT.—In the House of Commons on the 5th the Marquis of Halifax made a speech stating that full information had been received concerning the Indian finances. The excess of the war expenditure over the estimates was now ascertained to be \$9,000,000, the greater part of which was disbursed before 31st March, although not brought forward in the accounts. The deficit to be met in the year 1880-81 was \$3,307,000.

EMPLOYMENT.—A daughter of an insurance agent of Toronto, eloped on Saturday night with a commercial traveller while the parents of the girl were spending the day at Oakville. The acquaintance only existed for two weeks and there was no suspicion of any untowardness. She left the following, "Dear father and mother—Do not be uneasy about me, I will be taken well care of. Should any letter come from Bob send them to Mr. T. on Yonge Street and I will receive them."

A GREAT METEOR.—The meteor that fell near Macon, Ga., on Tuesday night is said to have looked as big as a barrel, and as it rushed down the sky it lighted up the whole sky. When it exploded the earth shook, and the frightened negroes dropped on their knees and began to pray, recalling the scenes of the Southern plantations during the great meteor shower of 1833. It is estimated that the meteor struck the earth about twenty miles from Macon. It is thought in the light of astronomical theories, to contemplate the possibility that this mass may have been hurled from the sun during some disturbance of its surface, like those that are now visible through a telescope. It is fortunate that the great central orb of the solar system doesn't often amuse himself by throwing a million pound shot at some one of his fleets of worlds. Still more interesting is the fact that such meteors have been shot from a distant star, Sirius or Alderabon, perhaps, and have fallen to rest upon our earth after a journey through space whose length makes arithmetic nod.

ADVERTISING CHANCE.
It has become so common to write the beginning of an eloquent interesting article and then run it into an advertisement that we avoid all such chicanery and simply call attention to the merits of the goods. It is a pity that any such thing is done, to induce people to give them our trial, as no one who knows their value will ever use anything else.

Trenton Notes.

A large excursion under the auspices of C. M. Sunday School, of Pictou, arrived here on Tuesday by the P. E. Co. R.R. There were between 700 and 800. They picnicked at Wilkin's Grove, which is nicely fitted up. Parties then strolled around town.
The celebration here on the 12th promises to be largely attended by neighboring Orangemen.
The contractors of the new iron swing bridge are making arrangements to commence after the 15th inst. A scheme is proposed which will not interfere with traffic.
The intermediate examination commenced yesterday. There are 18 candidates, all from Trenton High School. Rev. Finn of Trenton, conducts the examination.
At the entrance examination at Trenton High School 21 pupils were examined and the following passed:
Elinor Hickey, 393, Trenton P. S.
Flora Austin, 307, Trenton P. S.
Margaret Robinson, 351, Trenton P. S.
Addie Bettes, 338, Trenton P. S.
Arch Chisholm, 335, Trenton P. S.
Bernard Connolly, 318, Separate School.
Fanny James, 313, Trenton P. S.
Franklin Hagerman, 306, No. 2, Separate School.
Flora Holch, 280, Trenton P. S.

Campbellford Notes.

CAMPBELLFORD, July 5th, 1880.
Mr. Jas. Fellwell, of Warkworth, took the steamer of 11th inst. belonging to Mr. H. Ross of this township in 21 hours. The last three were shown in 30 minutes.
Mr. Wm. Whitten, butcher of this village, sold Mr. Charles Acker, of Colborne, on Saturday last, 52 sheep, live weight 8,238 lbs., bought in the Township of Seymour. Mr. Whitten has 100 more on hand, which will be sent off to the English market next week.
The celebrated picnic ground near our village has been renovated, and is now ready for the reception of picnic parties. This picturesque grove, so easy of access from the C. J. Railway, about half a mile from our village and some few yards from the station, so conveniently situated for these parties has been recently the rendezvous of many a party. The owner, the Rev. Mr. Getty, who has thrown open these grounds for the reception of these public meetings, deserves the thanks of the community at large.

Ameliasburg Correspondence.

The ferry excitement still continues. Stock is being taken to the amount of \$85,500; the shares amount to 1,125 at \$20 a share, the amount will soon be raised; the Mayor of Belleville heads the list with 20 shares. The license has been received; it is thought the boat will start soon.
The dinner at the Union on Saturday was not a great success. The picnic and convention to be held at Redenerville on Wednesday promises to be very interesting.
The hop crop will not be so large this year—the open winter hurting the yield, the same as last year.
The friends of Miss S. E. Vair will be pleased to learn that she passed an examination successfully at the O. L. College, Whitby, on the 24th, and has returned home with the degree of M.E.L.
Mr. Walter S. Morden, late of this place, now in Michigan, has passed his examinations, and is now classed among the M.D.'s.

Tweed Notes.

DROWNED AT TWEED.
Drowned on Monday evening, the 5th inst., Charles Lindsay, about 21 years old. The deceased in company with two other young men named Gonolus and Beatty went to swim at what is known as "Widow Paul's Dam," about a mile north of Tweed. I am informed he could not swim and got beyond his depth. Beatty did all in his power to rescue him but could not; his friends live some place in the vicinity of the "Stone Mills" below Pictou; he was in the employment of Joseph Woodcock, Jr., as a laboring man. He has an uncle living in Hungerford named Henry Monckey. No inquest.
His body was not recovered till Tuesday morning the 6th inst. He was found by Thos. Hawkins and Thos. Woodcock, son of his employer.

FROZEN VEGETABLES.—The English correspondent of the Farmer's Advocate says:—A prospectus has been issued of a scheme for sending frozen vegetables from Australia to India, the Australians believing that, when thawed, they will be as good as anything which can be bought in England. In India, it seems, turnips, carrots, peas and even potatoes speedily change their character when cold, and become useless.
If the Australians succeed in their venture, there is no reason why Canada should not try the experiment to some of the tropical countries to which her ships trade.

WINNIEPESIMENTS.—The importations from Eastern Canada at the port of Winnipeg for June, 1880, was \$391,433; for the year ending 30th June, the value of imports from the same source were \$8,509,980, against \$2,268,085 for the previous year.

THE TRENT VALLEY CANAL.—The Montreal Star says: "The deputations from the Montreal Board of Trade, Corn Exchange and the City Council, appointed to inspect the route of the Trent Valley Canal, leave town for the trip on the 14th inst."

CROPS IN IRELAND.—A cable despatch of the 6th inst. says: "The weather all over Ireland up to the present has been most favorable, and it is expected the potato crop will be enormous. It promises to be anything seen in Ireland since a period anterior to the famine of 1847. The root and cereal crops are also luxuriant."

It has become so common to write the beginning of an eloquent interesting article and then run it into an advertisement that we avoid all such chicanery and simply call attention to the merits of the goods. It is a pity that any such thing is done, to induce people to give them our trial, as no one who knows their value will ever use anything else.

Correspondence.

While correspondence will be accepted space for the expression of their ideas on topics of public interest, it must be in all cases understood that the views expressed are simply those of the correspondents themselves.
For the Intelligencer.
DEAR SIR:—I think would be greatly in the interest of the volunteer force of the city if carried out, namely, that the volunteer force be confined to one battalion, the City Battalion. It is the opinion of all who have given the matter any attention that this city cannot supply the requisite number of volunteers to fill the ranks of nine companies, and that it was a mistake in the interests of the force that the headquarters of two additional companies of the 49th should have been brought to the city.
The city should maintain one efficient Regiment of six companies, and I have no doubt if the energies of those desirous of supporting the force were confined to one battalion we would have an organization that the city and the citizens would be proud of. I understand the 15th Battalion is the City Battalion, having the head quarters of all the companies and the battalion here. Great improvement has been made lately in some of the companies, namely those of Captains Bleeker and Simpson, and it is generally understood that the good example set is about to be followed by the 'captains of other companies. If the volunteer interest of the city could be confined to this battalion it would soon become as efficient as any corps in the service. The officers of the battalion at a large expense maintain an excellent band, a first and almost absolute necessity for an efficient battalion.
One thing greatly to be desired in the interest of the volunteer force here is a Drill Shed—and it is a disgrace to this flourishing city, that more assistance and encouragement has not been given to the volunteer force in this way than there has been. The Government must understand it is half (if not more) of the expense, and it is to be hoped that some action may be taken by the volunteer officers and the City Council towards obtaining that absolute necessity for a successful volunteer organization—a Drill Shed—at an early day.
Yours,
AN OLD VOLUNTEER.

TO THE EDITOR OF THE INTELLIGENCER.
DEAR SIR:—A report carefully prepared was placed in your last evening's issue, setting forth the advantages of having work done by the Street Surveyor. I say, let the surveyor do the whole thing.
Two tanks of 25,000 gallons capacity cost \$425 each. The lowest tender for one tank of 50,000 gallons was \$395. Where is the saving to the City?
Belleville, July 7. A RATEPAYER.

MORNING DESPATCHES.

EUROPEAN.
LONDON, July 8.—A Berlin despatch says the removal of Prince Krapotkin is supposed to have disclosed the names of all the principal nihilists to the Russian Government which has thus been able to arrest all the ringleaders.
AMERICAN.
NASHVILLE, July 7.—The incessant rain storm of the past two weeks has done incalculable damage to the crops in low lands in Tennessee and Kentucky.
New York, July 7.—Mrs. McCourt, aged 35, and her children aged 9, 7 and 1, were found yesterday in a shed 4 feet long by 3 feet wide in the yard of the Jewish synagogue on 115th street. They had been living there three weeks, daily begging their food. The woman was the wife of a former well to do mechanic. The children were sent to a charitable institution and the woman will try to support herself.
An article in the Tribune, Gen. Wm. F. Smith confirms the statement that Hancock declared his intention in 1877 to obey the order of Tilden as President of the United States, should that gentleman take the oath of office.
The Sun's Harrisburg special reports a sensational scheme of a number of leading politicians to divide Pennsylvania at the next session of the legislature into two States, the eastern portion to retain the present name and the western portion to be called West Pennsylvania.
The Herald's Washington special says it is understood among his personal friends that Hancock will, prior to the publication of the letter of acceptance, tender his resignation as Major-General.

NEWARK, N. J., July 7.—Last night Jacob Minnerly was struck by a fire truck and killed.
LEADVILLE, July 7.—Early yesterday morning as Wm. Carter was escorting Mrs. Dillon home from a ball they were met by the latter's husband. A quarrel ensued and Carter shot and killed Dillon.
NEW YORK, July 7.—Arrived, the Haver, from Hamburg; the America, from Havre; the Athens, from London.

HASTINGS LOAN AND INVESTMENT SOCIETY.

NOTICE is hereby given that a dividend of four cents and a half per cent has been declared for the half year ending 30th June, (being at the rate of nine per cent per annum) and that the same will be payable at the office of the Company on and after the 1st of August next.
By order of the Board,
J. P. C. PHILLIPS, Secretary.
July 7, 1880.

MANHOOD.

HOW LOST, HOW RESTORED.
We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excess.
Price, in a sealed envelope, only 6 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure as simple and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.

BELLEVILLE, SATURDAY, JULY 10.

The Auditors' Report.

In reply to the enquiry of "Many Ratepayers" through our columns, asking by whose authority the Receipts and Expenditures of the City were published in the *Free Press*, that journal, in its issue of the 7th inst., fully exonerates the City Clerk from any responsibility in publishing the Report in question without the authority of the Council, and says that the publication was ordered by the Chairman of the Printing Committee. No doubt our correspondent could not think it possible that the Chairman of the Printing Committee, who is such a great "stickler" for red tape, should assume the powers of the Clerk and the whole Council by so pointedly disregarding the law, which says that "the Council shall publish the Auditors' abstract and report (if any) and shall also publish the detailed statement in such manner as the Council shall direct." Yet in the face of the statutory law, the Chairman of the Printing Committee, without any direction from the Council, and without even the authority of his Committee, ordered the advertising of the Receipts and Expenditures as he saw fit.

The *Free Press* says, in referring to the Chairman of the Printing Committee, "He obtained our price for the report, and afterwards the price of the *Intelligencer*." In the first place the Chairman of the Printing Committee never as much as hinted to us that there was such a Report for publication, and therefore it is impossible that he whose only "office" is in the direction of impartiality, should have given the *Free Press* the price we asked for publishing the Report.

We have no objection to the *Free Press* publishing the report in question, nor have we the slightest objection to its claiming a larger circulation than all the papers in the city combined for that matter, but we know that the letter of "Many Ratepayers" expresses public opinion. What "Many Ratepayers" justly find fault with, is the fact that these important details of the Council's financial transactions are not made public in the proper channels—those channels which supply the taxpayers of the City with everything of importance concerning the City's affairs. The *Intelligencer* and *Ontario* are the two representative papers in the City—they give special and lengthy reports of the proceedings of the Council—and their subscribers naturally look to these papers for information such as is furnished in the Auditors' report. And we agree with "Many Ratepayers" that confining the publication of such an important document to such a journal as the *Free Press*, looks very much as if the City Council were afraid of letting their financial exhibit being made known to the taxpayers. But as the City Council have had nothing to do with directing such publication as required by law, we may be doing them an injustice, and until they give their sanction to such a high-handed proceeding, we will refrain from further comment.

CUSTOMS RECEIPTS.—The *Ottawa Citizen* says: The Customs revenue for June was unusually good. The estimate of the Finance Minister for Customs was originally \$14,000,000. Last session he was able to say that his receipts would probably be \$14,700,000. At present, it looks as if it would be over \$14,900,000, and on a survey of the whole field we are inclined to believe that the deficit, if any, will be exceedingly small.

THE HERO OF THE SHAWANASHA.—The hero of the Shawanasha, who stood to his post until his boat was full of dry shrapnel, is thus described by the *Free Press*: "The hero of the Shawanasha, who stood to his post until his boat was full of dry shrapnel, is thus described by the *Free Press*: "The hero of the Shawanasha, who stood to his post until his boat was full of dry shrapnel, is thus described by the *Free Press*:"

CAPTAIN OF AN IMPERIAL HORSE MARCHER.—A Halifax dispatch says: The schooner "Ellen," of Herring Cove, fishing for mackerel off Meagher's Beach, yesterday, was much annoyed by a large horse mackerel. The crew succeeded in catching the monster by the following method: They threw over a number of dead mackerels, and when the eel came close to the vessel to devour them, succeeded in cutting it by the head and then throwing a noose around its tail and hauling it on board. The fish is over nine feet long, and turns the scales at 600 lbs.

TORONTO AND OTTAWA RAILWAY.—Mr. J. C. Bailey, engineer, has completed the preliminary survey of the Toronto and Ottawa Railway, and has gone to Toronto to present his report to the Manager.

GRAND TRUNK RECEIPTS.—The Grand Trunk receipts for the week ending July 2nd were \$197,218, as against \$152,910 the corresponding period last year. Adding the River de Loup receipts the week's increase is \$45,008.

Sabbath School Centenary.

The celebration of the hundredth anniversary of the inauguration of Sunday Schools by Robert Raikes, the Gloucester printer, has been very generally observed throughout Christendom. Since young Raikes made the philanthropic raid on the town, wonderful progress has been made in the methods of instilling religious principles into the young, and it is a small congregation indeed which is not a Sunday School with a zealous staff of teachers attached. In Canada there are no fewer than 5,400 Sunday schools, with 310,170 pupils attending which are taught by 42,712 teachers. The United States has a Sunday school population of 6,233,125, attending 82,301 schools and receiving instruction from 876,368 teachers. The latest statistics from other English speaking communities are given as follows:

England and Wales	422,250	3,800,000
Scotland	47,792	494,583
Ireland	59,548	384,027
Australia	3,910	37,915
New Zealand	9,387	93,870

Belleville celebrated the anniversary on the 9th inst., by a picnic at Massawaga. All the Sabbath Schools in the City, with the exception of those connected with the Church of England, united in commemorating this memorable event, and made a grand turn out. The weather was fine—hot enough in the city, but out on the water the freshening wind made the air delightful, and at Massawaga, with the cool breezes sweeping over its park-like grounds, and sheltered by the shade of the beautiful grove from the sun's rays it was comfortable and enjoyable. The picnic was in the old fashioned family style—each family, or group of families, or particular sets, by themselves. One would hardly have known that it was a Sabbath School picnic had the fact not been previously announced, for our ideal of a Sabbath School picnic is to get the children all together round one table—those of low degree, mixed with those of low degree, putting the choice cakes and pies and biscuits furnished by the rich with the plainer food furnished by the poor, inviting all to gather around the one table, whether they be clad in homespun or fine linen, and allowing all to share alike—then sing all together some of the grand old hymns, and separate to indulge in the various amusements provided. It may not have been convenient to have had it arranged in this manner on an occasion like this, but every one seemed to be happy. A variety of games and amusements had been provided—croquet, swinging, quoits, base ball, and with these and fishing and boating the day was passed pleasantly away.

It had been announced that addresses would be delivered in the afternoon, and at about 3 o'clock a few people gathered about the platform on the grounds, when the Rev. W. Maclean, Chairman, gave out the 100th Psalm: the singing, led by Mr. Turnbull, "Rock of Ages," followed a short prayer, and Mr. Maclean announced that Dr. Jeffers, who had been expected to have delivered an address, was unable to be present, and that Rev. Mr. Mitchell would address them on the "History of the Sabbath School Movement." The Rev. d'Arden occupied about thirty minutes in an able address which was listened to with great attention. After the address the doxology was sung, Rev. Mr. Lane pronounced the benediction, "God Save the Queen" was sung, and the audience dispersed over the grounds.

The arrangements on the grounds were very satisfactory. Mr. Pretty by an arrangement with the Committee closed his bar for the day—he furnished ice and hot water for the party and with his assistants did everything possible to make the day a pleasant and enjoyable one to the company. It is estimated that between 2000 and 3000 people were on the grounds. The *Free Press* made two trips down and up, and the *Silver Spray* and *Amie Gilbert* made a number of trips during the day. We have not heard what the receipts of the Committee were, but any surplus there may be will go to aid the Home for the Friendless.

Madoc Notes.—Madoc, July 10. Our mining interests are on the move again. Mr. Munson has commenced and will ship at least sixty tons a day from the Sarnia mine, which is looking well and is likely to improve.

A Duncan McKenzie, who lives about one mile from this village, was driving home yesterday, his horse took fright and ran away, breaking the carriage and throwing himself and sister out and bruising Miss McKenzie pretty badly. The horse ran about a mile before they were captured.

The farmers are busy in their haying, which is only an average crop. Spring and rye are all that could be desired. Pioneering is the order just now, our lake being visited every day by large parties. There will be no truce here on the glorious twelfth, as the Orangemen are going to Queensboro to hold their celebration.

A Big Gold Specimen.—Mr. H. Phillips, Vice-President of the Colonial Mining Company, recently acquainted to work mines in the Beauce district, has telegraphed to Mr. Hubert of Montreal, from St. Joseph de Beauce that a specimen of gold weighing one pound has been found in the Colonial mine.

CANADIAN CRICKETERS WHIPPED.—A dispatch from London says: The Canadian team played a match on Tuesday with the Gentlemen Cricketers of Derbyshire. The Canadians were defeated by one innings and 179 runs. The Canadians in their first innings scored 140, and in the second 154. Derbyshire made a total of 478.

Pulpit Exchange.

The following are the appointments for tomorrow morning, in the exchange of pulpits connected with the celebration of the Sunday School Centenary:

Rev. D. Mitchell—Baptist Church.
Rev. M. W. McLean—M. E. Tabernacle.
Rev. Dr. Jeffers—St. Andrew's Church.
Rev. J. Locke—United Methodist Church.
Rev. B. Lane—Bridge St. M. C. Church.
Rev. A. Turnbull—Bible Christian Church.
Rev. O. R. Lambly—John St. Presbyterian Church.
Rev. A. Schuster—Bleeker St. M. C. Church.
Rev. A. O. Coar—Holloway St. M. C. Church.

News Condensed.

—Hon. Edward Blake has left for the sea-side.
—San Francisco has a population of a quarter of a million.
—Sir Leonard Tilley will absent some time from the week.
—The suspension of traffic still continues on the Credit Valley Railway.
—A heavy thunder storm passed over Toronto yesterday evening.
—David & Son, contractors, advertise for 200 laborers to work on the Indian Canal.
—A vein of rich barrelling rock has been struck at a depth of 900 feet in Silver Island.
—An unknown man fell into a well near London, on the 9th inst., and was drowned.
—Two million feet of lumber have been destroyed at the Guelph Company's mill Perry Sound.
—Whitish are more plentiful in the Ottawa river now than they have been for many years past.
—A woman named McGinnis, was killed at Goderich on the 9th inst., by being run over by a passenger engine on the London and Erie Railway.
—A young girl on the 9th inst. a little girl, daughter of Patrick Doyle, fell from a cherry tree and was drowned.
—A number of surveying parties are now leaving for the North-West for the purpose of exploring townships.
—Reports from Sheffield, Sandbury County, Nova Scotia, say that the army worm is doing a great deal of damage there.
—A heavy thunder storm passed over the country around Stratford on the 9th, doing a great deal of damage to the crops.
—A picked team of the Toronto Locomotive Club has gone to New York to show the Gatons how to play the game.
—The City of Montreal to-day sold the first instalment of the remaining five per cent. loan, at 3 per cent. net premium, for \$5,000,000.
—Three hundred and eighty one vessels have passed through the Rideau Canal this season, against 274 for a similar period last year.
—The total amount of cattle shipped from Montreal this season per Dominion Line to date, is as follows:—Cattle, 5,261 head; sheep, 8,385.
—A brakeman named Joseph Belanger was accidentally drowned at Montreal on the 8th. He fell into the water while stepping from one baggage to another.
—An extensive fire occurred at the North American Chemical Company's salt works, Goderich, on the 9th, which were entirely consumed, with about 3,000 cords of wood.
—A Halifax despatch says: Madame Modeline Boston died at Arichat, C.B., in her 102nd year. She leaves a sister at Harbor du Bouche 104 years old, and a brother 100.
—The reduction of assets of the Consolidated Bank since May the 28th has been \$87,685.13 and the reduction in liabilities \$89,526.33, thus reducing the deficiency \$1,846.20.
—Seven Pullman cars, attached to one train, left Bonaventure Depot, Montreal, on the 8th for the Lower Provinces and the sea-side, all crowded with excursionists, many being from Ontario and the Far West. This is the heaviest train of the kind known.
—As we request held at Fort Lambton, on the 9th inst., on the body of a man found in the St. Clair river, a verdict was returned that deceased came to his death by a bullet fired from a pistol by the hand of some person unknown.
—Hon. Mr. Aikins will be acting Minister of the Interior during Sir John Macdonald's absence. Sir John Campbell is acting Postmaster-General, and the Hon. Mr. Bowell will be acting Minister of Agriculture, during the Hon. J. H. Pope's absence in England.

Chancery.

JELLET V. ANDERSON.
Ferry, disturbance of.

The following is the substance of the decree in the above important case.

The plaintiff was the lessee of a ferry from the City of Belleville to Ameliasburg, Ameliasburg being a township running in a westerly direction opposite Belleville, to the head of the waters of the Bay of Quinte, a distance of ten or twelve miles, the lease providing for only one landing place on each side. Held, that this was a sufficient grant to the plaintiff of a right of ferrying to and from the two places named; and that the defendant having started a ferry some two miles west of Belleville, running to a point nearly opposite, in the Township of Ameliasburg, was such a disturbance of the plaintiff's franchise as entitled him to a declaration of the right to the exclusive use of the ferry, together with an account of gross receipts by the defendant, and the costs of the suit.

I. O. O. F.

BELLEVILLE LODGE NO. 81.
At a regular meeting of Belleville Lodge No. 81, I. O. O. F., held July 1st, Bro. Allen McFee, P. G., installed the following officers for the current term, viz:

- Bro. W. J. Hudson, P. G.
- Bro. J. W. Crothers, N. G.
- Geo. E. J. Howell, V. G.
- James H. Jones, Rec. Sec.
- Ed. Chickens, Fin. Sec.
- J. J. Crothers, Treas.
- J. Covert, Warden.
- A. Lloyd, Conductor.
- D. Coyle, R. S. G.
- T. Browne, L. S. N. G.
- J. Johnson, R. S. S.
- J. Middleton, L. S. S.
- K. Backus, I. G.
- Thomas Wilson, O. G.
- R. E. McFee, K. S. V. G.
- D. R. McFee, K. S. V. G.

Representatives to the Grand Lodge—Bro. Allen McFee and J. A. Dawson.

A Heavy Depositor.

The *Free Press* says: "Mr. Foranough deposited \$11,000 in the Bank of Montreal here on Monday. During his stay here he paid for incidental expenses \$2,000."

MORNING DESPATCHES. EUROPEAN.

LONDON, July 10.—A Dublin correspondent telegraphs that a large case of rifles has been seized at Woolwich, near Longbridge. The rifles were the property of peasants, but addressed to local landlords, who knew nothing of them.

The colliers' strike in Lancashire is ended. 3,000 strikers returned to work, having accepted a 5 per cent. reduction in wages. The *Times* says after the suspension of the House of Commons last night, the home rulers held numerous consultations. It is said to be the settled intention of Parnell and followers to oppose the third reading of the compensation bill or the amendment of it.

St. Petersburg, July 10.—Official reports state that in 46 districts the Russian harvest will be below the average; in many provinces the prospects are very serious. In some districts in the south the crops had altogether failed, owing to the ravages of insects.

London, July 10.—A steamer leaves Greenwich to-day with a section of the new Anglo-American cable. Two steamers follow with the remaining sections on the 30th.

A Vienna despatch reports that the Greek officers on leave of absence, now in Russia, are being recalled to their posts.

St. Petersburg, July 10.—At the official banquet at the Chinese embassy, the representatives of all foreign powers were present but not a single Russian was there.

London, July 10.—A movement is being organized, over which O'Connor Power has been invited to preside, against the Bigger, Finnegan and Barry approve, to obtain a full unconditional amnesty for all Irish political exiles. It is intended to extend the movement throughout Great Britain and Ireland, the United States and colonies, until its object is attained.

During a terrific thunder storm at North and South Shields a large amount of property was damaged. At Haddingtonshire 4 trams were struck by lightning; one was killed and two injured; the fourth was unhurt. A severe storm visited the metropolis on Thursday.

In the north of Scotland great damage was done to the crops by heavy rain. In the town of Banff considerable injury was done to property by the flooding of the rivers. In Aberdeenshire and Banffshire they overflowed and destroyed the crops in low lying fields.

AMERICAN.

EASTON, Pa., July 10.—The Unanget ore mine caved in. One man killed.

NEW YORK, July 10.—The removal of the dangerous diamond reef from New York harbor has been completed after eleven years work and an expenditure of \$300,000. Four acres of submarine rock were drilled away. The depth of water at the spot is now 26 feet.

Sixty-seven children died from the effects of heat during the 24 hours ending noon yesterday. There were numerous cases of sunstroke in this vicinity yesterday.

It is stated that Dr. Tanner now presents symptoms of starvation. His face is emaciated and haggard, his eyes are sunken in the sockets and added to this physical depression is a glimmering desire to look at his wife less frequently day by day and when on his feet though he does not stagger his step shows lack of firmness which all his skill and pains cannot conceal. His enormous will power enables him to make an exhibition of sports at times, and runs upstairs at a pace which astonishes visitors, but these efforts are forced, and he lies down completely exhausted after the performance.

Unless his wife will let him marry, he will die. He is unable to walk at all; he seems to be suffering intensely.

The earnings of the Lake Shore Railway for an increase of \$430,000 for June.

BOYD BROWN, N. Y., June 10.—This town is afflicted with malaria fever to an alarming extent. The cause seems to be a large mill pond on the edge of the town.

For Sale or to Let.

Twenty-five words under this head 50 cents first insertion. Each additional insertion 10 cts.

TO LET.—A House to let on Fort Street. Apply to A. L. BOGART.

TO LET.

DOMINION IRON LADDER WORKS, KINGSTON.

Patent Iron Ladders with Fire Escape attached.

THE subscriber has been manufacturing the above ladders with the fire escape, attached for a number of years past and has placed them on the best private residences, on several churches, on all public schools, hotels, banks, hospitals, charitable institutions, county buildings, military colleges, and other Government buildings in Kingston and Ottawa.

In this city I have placed my ladders on the private residences of John Bell, Esq., W. H. Panton, Esq., T. S. Carman, Esq., T. C. Wallbridge, Esq., on the factory of E. Barrell, on the Roman Catholic Church, and convent. Parties wishing to have my ladders, can do so by leaving their orders at the hardware store of James Smith (late Gillen & Keith's old stand), where they will see sample of ladders, and testimonials from parties who have them in use.

I place my ladders on the building, with Fire Escape attached, firmly fixed and painted, for 40c per running foot.

All orders promptly attended to.

GEORGE A. RUMRILL, Belleville, June 10th, 1880. 34dms

70 A WEEK. \$12 a day at home easily made. Costly outfit free. Address "Times & Co., Augusta, Maine."

Windsor Hotel, Campbellford, T. BLUTE, Proprietor.

Public Notice.

THE subscriber begs to apologize for any inconvenience his customers may have been exposed to this last day or two, from not having their bread delivered as usual.

Mr. Legate was suddenly taken ill, and everything was for a moment in the greatest confusion.

It will be some time before the new driver can get acquainted with the run of custom, but he will do his utmost to pick it up as rapidly as possible. Meantime if those he misses will kindly leave word at the shop, they will be attended to immediately.

As it takes a long time to make entries of small sales, and in other respects very unsatisfactory, the driver has been instructed to make such entries, not to give his bread for CASH ONLY. Parties having an open account will please call at shop for TICKETS, as the driver is not permitted to dispose of any except for CASH.

P. H. HAMBLBY.

CAST ON THE WORLD:

on

The Border Marriage.

A STORY OF THE GREAT GLASGOW

HANK ROBBERY.

CONTINUED.

He turned to go, when a piercing shriek

rang through the apartment, and Lady

Eglehart leaped wildly from her chair.

"Charles!—my son!—my son! she screamed

out. "Yes, I am your mother!"

He started round, and, seeing her flying

toward him, rushed to meet and clasp her

in his arms.

"Mother!—oh, my mother, am I correct

at last! he faltered, in a voice broken with

emotion.

"Greta!—this is ruin! he roared, his

stamping to and fro, and striking his

forehead with frantic violence.

"Charles, Charles! gaped her ladyship,

with vehement energy, "I am not the un-

natural mother you suppose. I know not of

your abandonment. Oh, God! I never

dreamt of it. They told me you were dead

—that my beautiful baby was dead—and I

mourned your loss with bitter lamentation.

"Tears you say! I had to know I had been

deceived, and that you were my son. Ho-

lieve me, oh, believe me, my dear boy."

"I do believe you, mother; when, in the

bitterness of my mind, I was tempted

doubt you, Mary, my wife, strove to ban-

ish from my mind the evil thought, and

confidently declared you to be innocent.

My own heart, from its long experience of

your goodness, joined in her vindication,

and when I entered this room this was the

belief in my soul—a belief fully confirmed

when I beheld your grief and agitation.

"Oh, bless you for believing that!" mur-

mured her ladyship, with a long sigh of

joy.

"Charlotte, are you mad?" thundered his

lordship, as he hastily strove to snatch her

from the arms which held her.

"No, Charles," she answered; "had I re-

mained longer silent my heart would have

broken. Too long have I yielded in this.

It has nearly killed me. I was so miser-

able, till now, though my sufferings were ex-

cruciating, but when I heard his sorrowful

words, I could not help myself. I should

have loved my reason. I have no

not. You imposed what no woman—no

mother—could hear. What have I done!

"Yes and destroyed your husband."

"No, no, no!" she wildly shrieked, raising

herself with a look and gesture of wild de-

spair. "You will not, will not!"

"She could say no more—a deadly pallor

came over her face, her hands trembled, her

mouth and her lips had but time to

push forward to receive her senseless form

in his arms. She had swooned.

"Give her to me," said his lordship,

angrily, as he came forward with a new

flush on his face. "I will bear her to her

chamber."

Charles resigned her to him.

"Remain here till I return," said his

lordship; and with rapid strides he quitted

the chamber with his burden. He had to tra-

verse a long passage, and ascend two flights

of stairs, and in doing this he sought no

assistance from the servants, none of whom

he encountered in the way. Her ladyship's

own maid was in the bedroom, and, when

uttered a scream when he entered, bearing

the inanimate form of her mistress.

"Hush!—no outcry!" he sternly com-

manded. "Her ladyship has fainted—that

is all. Use what remedies you can to bring

her round, and stay beside her till I re-

turn."

With rough indecent haste he laid her

on the bed, and motioning to the astonish-

ed maid to attend to her, he himself de-

parted in the same hurried manner, and

in closing the door he locked it and put the

key in his pocket. Then he descended the

stairs, and returned to the library shut

himself in there alone.

"This is ruin!—utter, irretrievable ruin!"

he said, gnashing his teeth in his rage.

"After twenty years of suc-

cess, to be overtaken by this cursed chance!

What is the end of this? To be done!

Stay!—is the matter irretrievably hope-

less? The marriage is not annulled. The

marriage is as yet unannulled. There is

my chance, and my only one! True, it

involves Charles and me in shame, but

the alternative is shame or beggary. Be-

garry! No, by heaven, that is not all! Re-

vence will prove vindictive and show no

mercy. He will prosecute a crime, and

mercy—it will be accounted, a crime, and

horror!—shall I, Lord Eglehart, stand

at the bar! Never! Ere that shall be, my

oh, God! I will terminate my existence.

The Kent House

One of our remarkable men was the Duke

of Kent, the father of the late Edward, Queen

The city where he lived in Quebec is

now used for his purpose. The Duke was

a great man, and his life was a noble

with his principles. It is a strange thing,

that his city house should be preserved.

Further along the same street is the old

where the body of General Montcalm was

laid on the evening of July 1755. Opposite

the Kent Hotel, which occupies the Kent

House, at the corner of La Rue des Jardins,

stands the building where Montcalm con-

veyed his military council. In fact, all about this

city is history. The monument to Wolfe,

on the Plains of Abraham, and that to Wolfe

himself, and the Port St. Jean, are so many

points of attraction to visitors; and if anyone

should be taken sick, every drug store can

supply Dr. HARRIS'S STOMACH AND LIVER

which are as real, and more useful in such

strata, than any of our monumental celebri-

ties.

Women never think!

If the crabbled old bachelor who uttered this

sentiment could but witness the intense

thought, deep study and thorough invest-

igation of women in determining the best

means to keep their families well, and

would note their sagacity and wisdom in selecting

the best means for the best and demonstrating

by keeping their families in perpetual health,

GRAND JUNCTION AND BELLEVILLE & NORTH HASTINGS RAILWAYS.

ON and after Tuesday, June 1st, 1880, Trains will run daily as follows:—
Leave Belleville at 3 p.m. for Madoc and way stations.
Leave Belleville for Hastings, Campbellford, and Hastings, at 3:30 p.m.
Arrive from Hastings, Campbellford and Hastings, at 10:30.
Trains are run by Belleville time.
May 31st, 1880.
E. H. BRENNAN,
Superintendent.

MANHOOD:

HOW LOST, HOW RESTORED

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excess.
It is in a sealed envelope, only 6 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure so simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.

DEUOIT THROAT & LUNG INSTITUTE.

253 WOODWARD AVENUE, DETROIT, MICH.

M. Hilton Williams, M.D. (Graduate of Victoria College at Toronto, and Member of the College of Physicians and Surgeons of Ontario.)

PROPRIETOR.

(PERMANENTLY ESTABLISHED SINCE 1870.)

Over 10,000 cases successfully treated since the establishment of this Institute in Detroit.

ON THE INFLUENCE OF COLD IN THE PRODUCTION OF DISEASE OF THE LUNGS AND ON THE COMPARATIVE MERITS OF THE DIFFERENT PLANS OF TREATMENT.

The state of the atmosphere impresses itself directly on the mucous lining of the nasal passages, throat, windpipe, trachea and airways of the lungs. Sudden changes in the temperature of the air, especially when cold, and the humidity render the air irritating to the mucous membrane, irritation leads to congestion, and congestion leads to inflammation. The parent of all those chronic catarrhal affections of the nose, throat, and bronchial tubes which ultimately end in consumption.

Nearly eighty per cent. of the cases of consumption begin by congestion of the mucous membrane of the nose and throat, and bronchial tubes produced by colds. To this extent, therefore, consumption springs directly from colds, and colds are the cause of it.

When colds are neglected, they become chronic, and in autumn and winter. It is inflammatory and purely local in its origin, and as such, it is not an inflammation of the eye or quinsy of the throat, but must be treated in the same direct manner.

It is a rule of medical practice, established by ages of experience, that every disease which begins in the head, and spreads to any other part of the body—requires for its cure the direct application of remedies to such organ or part. When this rule is followed, the disease is generally cured, and when it cannot be done it is, in itself, generally fatal.

When colds are neglected, they become chronic, and in autumn and winter. It is inflammatory and purely local in its origin, and as such, it is not an inflammation of the eye or quinsy of the throat, but must be treated in the same direct manner.

It is a rule of medical practice, established by ages of experience, that every disease which begins in the head, and spreads to any other part of the body—requires for its cure the direct application of remedies to such organ or part. When this rule is followed, the disease is generally cured, and when it cannot be done it is, in itself, generally fatal.

When colds are neglected, they become chronic, and in autumn and winter. It is inflammatory and purely local in its origin, and as such, it is not an inflammation of the eye or quinsy of the throat, but must be treated in the same direct manner.

BELLEVILLE, TUESDAY, JULY 13.

Political Notes.

THE STATE OF THE COUNTRY.

It would be highly amusing, were not so disagreeable an exhibition of partisan feeling disgusting, to reproduce the editorial statements of the *Globe* from day to day and against the protective policy of the Government. On the one hand it assures its free trade readers that the N. P. is ruining the country; but on the other hand, it combats the idea of a customs union between the United States and Canada with the assertion that the Dominion is now fairly prosperous, that trade is rapidly regaining its normal state of activity, and that we are better off than our neighbors. The one statement is made to influence the electorate against the Government, while the purpose of the other is to show that a customs union with our neighbors would be ruinous. There is no such thing as reconciling positions so much at variance, therefore it is necessary to call in a referee to decide in the matter. Happily the *Globe* itself can efficiently discharge that duty, its commercial columns sustaining the contention that the country is prospering once more under Conservative rule. The organ may quibble as it chooses, but it is thus self-convicted of duplicity.

NOT SO FOOB AFTER ALL.

Writers and speakers in the Opposition interest frequently refer to the Dominion as one of the poorest countries in the world. A correspondent of the *Montreal Journal of Commerce* supplies the following fitting answer to such an assertion:

"He who represents ours as a comparatively poor country must have a superlatively poor knowledge of our people, and of the vastness of their wealth, enterprise and domain. What other community, or state or country of only four millions of people in the old world or the new, can boast of owning such a steamboat line and two such telegraph companies as Canadians possess; such a bank as that of Montreal, with its capital of twelve millions, all paid up; and no less than thirty-six others in the same field with capital of \$48,392,305, and possessing united assets of nearly two hundred million of dollars; and in addition to these, owning such immense and valuable public works in canals, railways, bridges and docks, together with a country of such size, fertility and magnificence governed by its own people with all its rich products of the mine, fisheries, woods, agriculture and commerce!"

IT IS THE HOW.

The *Berlin News* says they may call it hum or what they please, but there are now 650 people employed in the different factories in that town, whereas two years ago there were not half that number, and what is more there is such a rush of orders that nearly every establishment is in want of more hands.

MONEY OR LAND.

There is much common sense in the following remarks of the *London Free Press*: The Canada Pacific Railway problem may be put in a few words. If all the lands are retained in the Crown, the money to construct the road must come out of taxes levied upon the inhabitants of the older provinces. On the other hand, if a company is to build the road, and relieve the taxpayers, lands must be given up to them, under certain prescribed conditions. We can't eat our cake and have it too. Money or lands must be forthcoming, and that will be found that the public will prefer that lands at present useless for lack of occupants should be settled through the agency of a railway company, than that more taxes should be collected, the lands remaining idle notwithstanding.

A CONVENTION MINISTER.—The *Kings-ton News*, referring to the absurd rumor that Hon. Mr. Bowell intended to appoint himself Collector of Customs, of Toronto, and to the attack of the *Whig* upon that gentleman's administration of his department, says: "As to the 'injury,' as our contemporary puts it, Mr. Bowell has done to the country, it consists in the fact that he has, without partiality, carried out existing laws and regulations. It is generally conceded that a more faithful, industrious and scrupulously conscientious Minister has not been at the head of the Customs Department for many years."

CABLE GIVEN OUT.—A New York despatch says that one of the Anglo-American Company's cables has given out, and that delay to cable business will, of course, be very much greater in consequence. The repair ship *Minia* has been ordered out to grapple for and endeavor to repair the cable.

IMMENSE IMPORTS OF LUMBER.—The *Owego Palladium* says:—"Our total lumber imports, we learn from the collector of this port, during the present season to July 1st, were 72,620,000 feet, which is greatly in excess of any imports for any recent corresponding period. In 1878 they were 33,931,000 and last year 26,819,000 for the same time."

THE 12th JULY.

TRENTON.

(From our own Correspondent.)
The celebration of the battle of the Boyne in Trenton was very largely attended. The Lodges from the Township of Murray and Brighton came in first, then the Lodges from Prince Edward arrived by the P. E. C. R.R.; the last to arrive were the Belleville, Millpoint, Northport and Redversville, by the steamer *Arcturion* and *Ulion*. They were received by Trenton O. Y. B. and L. O. L., and escorted to the Lodge room. About 11 o'clock a drizzling rain set in, which soon became a downpour, then frequent showers, which nearly put a damper on the proceedings. The weather cleared off about 2 o'clock. The Brothers formed in the following order at the Town Hall, and marched in procession through the principal streets of the town:

Millpoint Five and Drum Band.
Millpoint Two Blues No. 28.
Five and Drum Band.
Millpoint True Blues No. 57.
Trenton O. Y. B. No. 189.
Brighton O. Y. B. No. 165.
16th Batt. Silver Corsair Band.
Pictou O. Y. B. No. 96.
Newport O. Y. B. No. 199.
Ameliasburg O. Y. B. No. 168.
18th Batt. Rank.
Belleville Howell O. Y. B. No. 6.
Foghorn O. Y. B. No. 27.
Wooler O. Y. B. No. 196.
Cordington O. Y. B. No. 297.
Brighton Brass Band.
Hillier L. O. L. No. 109.
Belleville L. O. L. No. 179.
Northport O. Y. B. No. 1013.
Bloomfield O. Y. B. No. 986.
Millpoint O. Y. B. No. 1375.
Five and Drum.
Newcomb Mills L. O. L. No. 507.
Wooler Brass Band.
Wooler L. O. L. No. 620.
Five and Drum.
Frankford L. O. L. No. 240.
Five and Drum.
Brighton 3rd Co. L. O. L. No. 687.
Cordington L. O. L. No. 1363.
Belleville L. O. L. No. 179.
Trenton P. B. Band.
Trenton L. O. L. No. 160.
Grand Marshal O. Y. B. George Burtt, Trenton.
Grand Marshal L. O. L. P. Pettit, Dist. Master, Frankford.

On account of the bad state of the weather, the brethren marched back to the drill shed, where a few remarks were made by principal members of the order; they were dispersed after giving three cheers for the Queen. The original intention was to proceed to Wilkins' grove, where addresses were to have been delivered.

There were about 800 brethren in procession, all the lodges displayed banners, some were very fine. This celebration of the 12th July (in Trenton) is the first since 1856. The decorations of Dominion Day were renewed, the arches looked very fine; a number of flags were also displayed. There were between 7,000 and 8,000 persons in town.

IN HUNGERFORD.

From our own Correspondent.
This loyal old Township duly celebrated the 12th in the usual manner, by a procession and dinner. The dinner was given in Mr. Sam'l Maines' Grove; a short distance south of the village of Thomaburg; the proceeds to be devoted to the use of the Church of England in that place. The brethren assembled in the Grove at 10.30 a.m., and were formed in procession by the District Master, Bro. R. Porter, and Bro. J. Finley, D. of C., accompanied by the visiting brethren from No. 3 and No. 4 districts. The various lodges of O. Y. B. in the County were present in their neat regalia. It was one of the largest Orange processions ever held in this place. After marching through the village and counter-marching back to the Grove, the brethren and their friends partook of an excellent dinner, but had hardly got through the first table when a heavy rain intervened, and broke up the day's pleasure.

The people certainly were greatly disappointed, as on the 12th July we generally have Queen's weather. Indeed, it was a great drawback to the Committee who had the affair in hand, as it has been estimated they have lost in or about \$2000. A goodly number of speakers were present to air their eloquence on the occasion, but were disappointed also by the rain. It brought to my recollection the adage that many a flower is born to blush unseen, and waste its sweetness on the desert air. The Madoc brass band was present and played a few appropriate marches. The several lodges present had their own music bands, which made the old wood sound again. I could not get the number present, but the tables were set for five hundred persons. Everything passed off quietly.

AT COBBOURG.

The 12th of July celebration in Cobourg was one of the largest ever held in the United Counties. The Orangemen of East and West Peterborough, East Durham, and West Northumberland joined in the procession, which was over two miles long, and took forty-five minutes to pass a given point. After parading the principal streets of the town the procession dismissed in front of Victoria Hall for dinner, assembling again at two o'clock and proceeding to the Agricultural Fair Grounds, where addresses were delivered by prominent men of the Order. Fully 7,000 strangers were in town.

AT KINGSTON.
The city lodges accompanied by lodges from Amherst Island, Wolfe Island and Garden Island, celebrated the day by a procession through the principal streets in the forenoon and a picnic in the afternoon. Everything passed off quietly.

IN MONTREAL.

The brethren assembled at seven o'clock in the morning and proceeded to the cemetery, when the ceremony of re-interring the body of the lamented Hackett was gone through with. At the conclusion of the proceedings Mr. Grant, County Master, proceeded to read the ritual attendant upon the ceremony of laying the foundation stone of the monument erected to the memory of Hackett. The monument will be an octagon shaft of freestone, resting upon a cut limestone base four feet square. The shaft will be paneled on six sides,

having two sides for inscription, while just above the base is lettered the word "Hackett," surrounded by a wreath. Surmounting the whole, which is to be twenty feet high, will be a life-size figure of Hops in marble, being a woman resting with her right hand upon an anchor, her face looking forward to the future, and the coronet upon her head set off with a star. The whole matter passed off without a jar of any kind. The monument will be finished in September next.

AT HAMILTON.

At Hamilton the Orangemen had a grand gala day, the attendance being larger than at any other time in the history of the city. Lodges from all full force from Toronto and the County of York, London and county of Middlesex, Brantford and county of Brant, the counties of Elgin, Wellington, Grey, Bruce, Halton, Haldimand, Norfolk, Welland, Lincoln, Monck, Oxford, Waterloo, Peel, and Simcoe. There were 10 Lodges of True Blues; 13 of Orange Young Britons; and over 60 of L. O. L., ten of which were from Buffalo. All the railways brought in immense numbers, 6000 going from Toronto, and in consequence of insufficient railway accommodation over 1,000 had to be left at St. Catharines, Beamsville and other places along the line. The procession was the largest ever seen in Western Ontario. A picnic was held at Dundurn in the afternoon. Everything passed off pleasantly.

Correspondence.

Whilst correspondents will be accorded space for the expression of their ideas on topics of public interest, it must be in all cases understood that the views so expressed are simply those of the correspondents themselves.

Hints to Dairy-men.

As the hot weather is now upon us, and the trying time for cheese making at hand, a few suggestions to the patrons of cheese factories may not be altogether out of place. Although we are aware that most dairymen know how to take care of their milk, yet we have learned that the most thorough of all schools, experience, that they are sometimes thoughtless, and often, we fear, negligent and careless in this regard. The milk is sent to the factory as it were a foregone conclusion that the manufacturer can make good cheese, no matter what the character of the material furnished may be. There is a growing tendency to view milk sent from the factory man, and to subsequently blame him if his cheese does not sell for the highest figures. It is just as difficult for a cheese maker to make prime cheese out of bad milk, as it is for the baker to make good bread out of musty flour.

All articles of human food, milk is the most susceptible to obnoxious odors and a diseased atmosphere. One painful left in a dairy stable while another is being filled with clean milk, and the whole is left to decay. These acquired odors are very hard to get rid of, and are often the cause of the milk being rejected. It is just as difficult for a cheese maker to make prime cheese out of bad milk, as it is for the baker to make good bread out of musty flour.

Improper driving of cows before milking is another particular in which patrons are often culpably negligent, and in this way they may time pay dearly, as floating cuds are often produced in this way. This is a great source of annoyance to the factorymen, as the milk when taken in may appear to be all right and will show no signs of being bad until it has reached a certain remote stage in the process of manufacture.

Floating cuds are also produced by allowing cows to feed near those places where the unburied carcasses of animals have been left to decay. They are also produced by milking in old wooden pails, and an improper washing of milk cans; allowing the cans to stand part of the day in the hot sun and drying the milk on the can, which cannot be removed without a thorough washing and scalding.

These causes of bad milk can and should be avoided. Let the stables be kept as clean as possible if milking is done in them; and if you have no living water for your cows, water them at your wells, and in hot weather on no condition drive them faster than a walk. If there is carrion in your pasture, or in any place where your cows will inhale the obnoxious odor, bury the same, and there will be great rejoicing among factorymen.

Every dairymen should cool and air his milk before sending it to the factory; the warm milk should never be sent, and the milk should be sent in a cool can, and it will sour the whole canful.

Let each patron form himself into a committee of one and see that he at least sends nothing but good pure milk.

The strict justice of the question would require the manufacturer to refuse absolutely anything but first-class milk. This has been done in many factories and the cheese are all first-class and is half made before the making is begun.

We entreat the patrons of cheese factories to give this subject constant heed. All we ask of them is that they keep pace with us in the struggle for perfection in this very important branch of industry.

The best argument for the one side will reach the heart of every patron of cheese factories in favor of what we urge is that profit keeps pace with care.

J. B. HARRIS.

Belleville, Ont., July 12, 1880.

WIMBLEDON.—The Wimbledon meeting opened on the 12th inst., and shooting for the Prince Albert prize was finished. Mills and Bailie, of the Canadian team, were prize winners, the former scoring 33 and the latter 31 out of a possible 35 points. The shooting for the Queen's plate begins to-day.

A SERIOUS CHARGE.—The *Mail* says: "Mr. Mowat has not been happy in some of his Justice of the Peace appointments. He placed a man on the bench in Algoma, who is not long out of the penitentiary, where he was for three years for arson."

STEWART'S ACCIDENT.—On the 12th inst., the steamer *City of St. Catharines* was struck by the American barge *George A. Morse* in Lake Huron, and went to the bottom in less than fifteen minutes. The passengers and crew numbering about fifty, were all saved and brought to Port Huron last night by the tug *Rush*, which, fortunately, was nearby at the time of the disaster.

News Condensed.

—On the 12th inst. John Reid was accidentally drowned at Toronto.
—Capt. Bellaire was drowned at Montreal on the 11th inst. while bathing.
—The Vice-Royal party is not expected to return to Ottawa until September.

—There are some 1,000 men employed on the extension of the Canada Central Railway. Geo. Stanley, of Wellesley, Ont., committed suicide on the 12th inst., by taking Paris green.

—A Provencal named Cornelius Coughlin, was killed at St. Hilaire, on the 11th inst., while coupling cars.

—Wm. Cookley, Toronto, while climbing a fence on the 12th inst. fell, dislocating his neck and causing immediate death.

—Tom Taylor, the author of nearly a hundred dramatic pieces, died very suddenly yesterday, aged 63 years.

—W. G. Melbourne, Secretary of St. James Club, Montreal, has been arrested for embezzling \$1,800 of the Club's funds.

—Push fires are raging in Gloucester, Ont. One started on Saturday, and on Sunday, it assumed very formidable proportions.

—It is stated that Mr. Walter Shanley has been requested to act as manager of the St. Lawrence and Ottawa railway temporary.

—A despatch from Windsor, Que., says that the end of a boiler in the Canada Paper Company's mill, blew out and two men were killed.

—Vice-Chancellor Blake recently delivered an address in Exeter Hall, London, connected with the Sabbath School Centenary service.

—J. C. Kilbourn, of Beamsville, exhibited on Saturday, ripe peaches grown in open orchard, measuring five and a half inches in circumference.

—An Olean telegram says last week a timber raft with forty persons on board was dashed the pieces in the rapids of the river Duquesne. All perished.

—A laborer, name unknown, left his boarding house at Trenton early yesterday morning, taking with him nearly all his room-mate's wardrobe. All efforts to capture him have so far proved unsuccessful.

—A very interesting review took place at Halifax, N. S., on the 12th of the crew of H. M. S. Northampton. The sailors and marines fought a sham battle on the commons, and were put through a number of evolutions.

—The meeting rogata at Toronto promises to be very successful. The Rochester Company has granted a \$250 prize to be given for the double scull shell race and the Mail Printing Company give a cup for the junior scull race.

—There is believed, in well informed circles, to be some foundation in fact for the rumor that the Grand Trunk Railway Company are negotiating to obtain the charter of the Coteau and Ottawa Railway, with a view of building the line as a branch of their railway.

—A large business has been done the past week in the exportation of green peas from Toronto to the United States. The principal port is Buffalo, and 400 or 500 bags will be sent from here on Tuesday. The price paid by dealers is from 50 to 60 cents per bag.

—John Harris, assistant engineer at the Bank of Hamilton, attempted to get on a train while in motion on the 12th inst. He slipped and his right leg being drawn under the wheel was so severely crushed as to necessitate amputation a few inches below the knee.

—The exports to the United States from the port of Ottawa for the quarter ending June 30, 1880, were \$545,332, as against \$394,645 or the same period last year. Exports of sawn lumber were \$509,863 in 1880, as against \$358,847 in 1879, showing a decided increase.

MORNING DESPATCHES.

EUROPEAN.

VIENNA, July 13.—An Athens despatch says that the Greek Premier promised to postpone the calling out of the reserves, but not to suspend preparations for future mobilization.

CONSTANTINOPLE, July 12.—It is understood the German Ambassador will communicate the decision of the Berlin Conference to the Porte on Tuesday.

PARIS, July 13.—Henri Rochefort was met at the Railway Station by Clemenceau, Blanqui, Lockroy and the greater part of the secretarial council.

LONDON, July 13.—A Paris correspondent announces that Corneillon was elected President of the Paris municipality, viz. Thulis, who though a radical, shrank in alarm from the scheme drawn up by the committee, whereby the municipality would become entirely independent of the Government with the management of police and all other prerogatives now vested in the prefect.

A Constantinople despatch says the Russian Ambassador recently made an energetic representation to the Porte in the case of Commercia's assassination.

HENRIETTA, Tex., July 13.—John Johnson was arrested for embezzlement, and while attempting to escape was shot dead by a guard, who has been jailed.

DENVER, Tex., July 13.—On Sunday John Anderson was shot and killed by a farmer named Meek. They quarrelled about a horse.

NEW YORK, July 13.—Two young men, well dressed Spaniards, took a room in the St. Denis hotel last week, and registered as Fredrick Roads, and Clement Parow, of Havana. They disappeared on Thursday after stealing \$1,000 worth of articles belonging to guests. They were arrested yesterday. It is believed they answer the description of the men who stopped a wealthy lady's carriage near Jersey City, and robbed her of all her money and jewelry. It is said one of the robbers committed murder before leaving Havana.

The Herald states that Tanner is seriously affected by long abstinence, and is beginning to break down.

Seventy-two children died from the effects of heat yesterday.

MORGAN, Texas, July 13.—One Hodge was found murdered in bed at Mrs. Hattie Wilcamp, there he was shot.

STOCKTON, Texas, July 13.—Thos. Cocoon, Commissionary Generalist, suicided yesterday by shooting.

HARTFORD, Ct., July 13.—Arrangements have been made for a five mile race between Courtney and Josh. Ward \$2500 a side on Aug. 28th, at Middletown County.

Ameliasburg Correspondence.

The number of shares to be taken in the ferry are 425, and not 1,125 as stated in last week's issue. Quite a good deal of grain will be cut this week. Haying is mostly finished.

Between 400 and 600 boxes of cheese were shipped from Redversville on Saturday.

The Young Britons of Robin's Mills and Orangemen of Redversville went to Trenton per *Mary Elkhed*, and Arranville on Monday to take part in the celebration.

Rev. R. Potter filled the Rev. Wm. Seales' appointment at Redversville on Sabbath, he being still very low but not so dangerous.

The heavy rain of Monday will be the means of laying a great deal of grain very low.

CARPETS, MATTINGS.
We have just added to our Stock
ELEVEN BALES
OF
CARPETS AND MATTINGS.

Our assortment of these is the largest in the city, and as usual, our prices are the lowest.

PUBLIC NOTICE.
THE subscriber begs to apologize for any inconvenience his customers may have been exposed to this last day or two, from not having their bread delivered as usual.

Mr. Legale was suddenly taken ill, and everything was for a moment in the greatest confusion.

It will be some time before the new driver can get acquainted with the run of custom, but he will do his utmost to pick it up as rapidly as possible. Meanwhile if those he misses will kindly leave word at the shop, they will be attended to immediately.

As it takes a long time to make entries of small sales, and in other respects very unsatisfactory, the driver has been instructed to make no such entries, but to give his Bread for CASH ONLY. Parties having an open account will please call for TICKETS, as the driver is not permitted to dispose of any except for CASH.

Local Notices.

Notices under this head do not incur a line charge. After six insertions 5 cts. a line.

Old clothes to be taken—coats, vests and trousers, &c. I can clean your dresses or your cloaks. Campbell St., Dickson's old stand.

One lady says to another, How can you afford to put on a new pair of gloves every time you go out? She answers (in a low tone of voice), They are not new, I had them cleaned at Prof. Smith's, Campbell St. And the other lady went right away to Campbell St. to have her's made new.

City and Vicinity.

CITY COUNCIL.—There was no meeting of this body last night.

BOARD OF EDUCATION.—The regular monthly meeting of this body will be held to-night.

PERSONAL.—Mr. J. F. Wolf, Customs Inspector, will start to-morrow for the lower Provinces on a tour of inspection.

IN ENGLAND.—Amongst those who registered at the Canadian office, London, during last week, was Mr. A. G. Northrup, of Belleville.

THE RIFLE.—The 49th Battalion Rifle Club will meet to-morrow night at Hamby's to consider the challenge from the Prince Edward Rifle Association.

ANOTHER HUM.—Mr. John Lazier is doubling the capacity of his woollen mill and will now manufacture for the wholesale market. This is he doing because the N. P. gives him a chance to sell in the home market.

AQUATIC.—Mr. Jos. Tisdale accepts Mr. Russell's challenge for a two mile race, which he would prefer should be rowed within a fortnight. He stipulates that the race shall be rowed in laproaks of from 18ft. to 19ft. in length.

STRIKES BY LIGHTNING.—The dwelling of Mr. George Hall, near Plainfield, was struck by lightning yesterday evening and damaged considerably. One end of the house was nearly destroyed, but fortunately the premises did not take fire. Five of the family, who were in the house, were slightly stunned by the shock, but were otherwise unhurt.

CHICKEN.—A match game between the Campbellford and Hastings Clubs at Campbellford, resulted in the success of the Campbellford eleven by 3 runs, with two wickets to fall. Score: Hastings, 24 and 114; Campbellford, 81 and 60 for 8 wickets. Our correspondent at Campbellford has furnished the full score, but pressure on our space compels its summarization as above.

A FIELD DAY.—The police had a grand field day yesterday, they having "run in" no less than 14 "drunks." There were many more who would, under ordinary circumstances, have been arrested, but had all been taken up, the station would not have held them. So many men in a drunken condition were never before seen in Belleville in any one day.

BAD MANAGEMENT.—There was very poor management at the show yesterday. Those who occupied the reserved seats were prevented from seeing what was going on inside the rings in consequence of the crowd around the ropes. One or two attempts were made to push back the crowd into their own seats, but without avail. The proprietor should have had special policemen detailed for this purpose. As it was, those who occupied the reserved seats were about the most disgraced lot of people ever seen in a circus.

HEAVY RAIN STORM.—The rain-storm of last evening was the heaviest that has occurred in this vicinity for years. For a time the very flood-gates of the skies seemed to have opened, and so heavy was the downpour that the streets were transformed into miniature rivers. The depth of the rain which fell, as measured by the rain gauge at the Meteorological Observatory, (see Prof. Dawson's Meteorological Observer informs us), was upwards of 1½ inches. Some damage will be done by the rain, but by so extensive a rain fall, but on the whole its effects will be beneficial.

CURIOUS COINCIDENCES.—Two curious circumstances in connection with the drowning of Miss Potter are worthy of record, namely: Her watch had stopped at the instant of her fall into the water, although when opened it was found that no water had made its way into the works. The clock in the Anglo-American Hotel, Kingston, where she had stayed overnight at the same moment without any apparent cause. The facts are vouched for by respectable persons, whose word is beyond doubt, and they are recorded for the consideration of the curious.

GOOD ADVICE.—In another column will be found a communication from Mr. J. B. Harris, in which he gives some good advice of the most reasonable and important character to dairymen. Similar advice has been given before, especially at the Conventions of the Dairymen's Association, but it has never been acted on by all patrons of these factories, hence the product has not been so fine as it should be. Mr. Harris, who has been employed by the Dairymen's Association of Eastern Ontario, to instruct factorymen, is one of the best practical authorities on the subject, and it is to be hoped that his instructions will be faithfully carried out by all concerned.

CHICKEN.—The local Club have two matches on hand. They will play eighteen all-comers on Friday afternoon—wickets to be pitched at 1:30 p. m., and on Friday the 23rd, they will meet a twenty-two, composed of the ex-Mayor, Aldermen and City officials.

THE CIRCUS.—Forepaugh's show was not, in the public judgment, anything near the mark which they had led to place upon it by the previous announcements. The rain greatly interfered with the performance, so that it would be unfair to criticize under the circumstances, but a number of the other attractions announced were not forthcoming. On the whole, managers will find it better to keep faith with the public in every particular.

Melancholy Accident.

Miss Potter Drowned in Kingston.

FATAL FALL FROM A WHARF.

Amongst the large party who left town yesterday morning per steamer *Alexandra*, for a fortnight's pleasure trip, was to have been Miss Marian Potter, teacher in the Ottawa Street Public School of this city. As the lady happened to miss the boat here, she took the noon train for Kingston, with the intention of joining the steamer there, but this intention was frustrated by her untimely death by drowning, when within but a few yards of the friends she was about to join.

The particulars of the melancholy event, which has caused a wide-spread feeling of sorrow in the city, and has completely broken the spirit of the bright and happy party of yesterday with whom Miss Potter was to have travelled, have been gathered from a member of the party, and are in substance as follows: The steamer arrived at Kingston an hour behind time, at about 9 o'clock, while rain was falling heavily. Miss Potter not being visible on the wharf, this gentleman went ashore to await her coming and to conduct her on board the steamer. The night was intensely dark and rain was falling heavily, and no light was shown to guide persons going to the steamer, although a star lamp was but a few yards distant from the entrance to the wharf, but it was unlighted. He consumed nearly half an hour in walking about, and as the lady had not arrived he came to the conclusion that she had given up the idea of taking part in the trip. Meantime another member of the party—a gentleman—arrived and was taken on board and introduced.

At about this time, as it now appears, whilst the friend who had been looking for her had gone on board the boat, Miss Potter, who was accompanied by a porter from the Anglo-American Hotel a few yards distant, carrying her trunk—as they entered upon the wharf (Gunn's) they were met by a cab which had been to the steamer with a passenger, and which was then proceeding towards the city. The porter stepped to the right and Miss Potter to the left, and in doing so she fell into the water, which was about six feet deep. The noise of her fall was not heard, owing to the rain and to the fact that the wheels of the cab were then crunching over some broken stones, hence no immediate effort was made to rescue the unfortunate lady. The intense darkness also prevented her from being missed for a moment. The porter—who was Patrick Salmon, formerly of this city—proceeded a few steps and then turned to see if Miss Potter was following him, when the cabman said he thought she had fallen into the water. Salmon at once procured assistance, and soon a number of men with lanterns were at work looking for the body, which was not recovered until about 20 minutes after it had fallen into the water. Several others of the party were informed of the occurrence and assisted in recovering the body, which was at once taken to the Anglo-American Hotel, where one medical man, who had already arrived, immediately commenced the effort to restore animation. He was soon joined by two other doctors, and all three gentlemen exerted their utmost skill, but without avail.

It is believed that after going to the bottom deceased had not risen again to the surface, as a large Newfoundland dog at Hatch's wharf, which heard the splash made as she fell, jumped into the water and swam about the spot. It is said that had she risen, this animal, which has a great reputation as a swimmer, would have prevented her from sinking until assistance arrived. The sagacious brute, it may be added, followed the body after its recovery to the hotel and seemed disposed to remain by it.

The remains were confined and were brought to the city this morning by Messrs. W. E. Holton, F. Ross and John Grant. The latter gentleman, who is the business partner of Miss Potter's brother, went to Kingston by the midnight train, after being apprised by telegraph of the accident.

The Kingston civic authorities are very much to blame, not only for leaving their lamp unlighted at so dangerous a place, but also for allowing cables to drive on the wharf, which prevent their being raised. Had they done their duty, the melancholy error of Miss Potter's death would not in all probability have occurred. It is to be hoped that in future they will be more careful. The proprietors of the wharf are also very much to blame for leaving the premises in an unlighted and consequently very dangerous state.

Miss Potter was in all respects an estimable lady. Her skill as a teacher—of young children especially—was very great, and in private relations she was much esteemed. She had been for about six years in the service of the Board of Education, and had given the utmost satisfaction in the discharge of her duties. She was first employed by the Board on the 14th of August, 1874, and with the exception of a temporary absence at the Normal School in Toronto, she had since been a teacher in the Public School. The afflicted relatives have the sympathy of the entire community in their deep affliction.

"TEACHERY," the newest wonder without the mother's suffrage, is such a month. To try it is to become a friend to the piquant, irresistible, popular Dentist of the day.

POLICE COURT.

(Before T. HOLDEN, Esq., P. M.)

TUESDAY, July 13.

DRUNK AND IMBROILERY.

John Post, Benjamin Bushaw, Willett Saville, Patrick Gimmmin, Richard Howard, answered to the above charge. Bushaw and Howard were discharged. The others were fined as follows: Post \$2; Saville \$1; Gimmmin \$1.

FIGHTING.

Thos. Gallagher \$1; Alex. Jones \$1; Fred Holmes \$2; Patrick Shinnis \$1; John Hunter \$2; James Forward \$1; Frank Carill \$2; Geo. Caton \$2; Patrick Meagher (Sidney) \$10 and costs for striking an unoffending person on the streets.

SOMETHING IN A NAME.—Shakespeare says there is nothing in a name, but Prof. Smith, of Campbell St., found out differently when our printer made a slight mistake in a word in his advertisement of Saturday. Instead of putting "gloves" he put "shoes" can be made to look like new, and on Monday morning Mr. Smith had a crowd of old shoes brought in to see if they could get them cleaned to look like new ones. The Prof. says he can get away with most anything except old shoes. He sent them around to Grant & Potter's boot and shoe store.

IMPORTATION OF GOOD STOCK.—The Montreal *Witness*, says: "The Allan S. S. Buenos Ayres, which arrived at Point Lewis on Wednesday morning from Glasgow, landed a valuable consignment of pure bred cattle and sheep for Mr. George Whitfield's Rougemont Stock Farm. By an order-in-council dated November 28th, 1879, all cattle coming from Europe are subject on entering the ports of Quebec, Halifax, and St. John's to a probationary quarantine of ninety days, and no exception can be made in this or any other case. Among the arrivals are two excellent Polled Angus black cattle, one of them being the prize winner at the Paris Exposition, a Hereford bull and a number of Hereford cows, several West Highland Kilos, Ayrshires, and Devons. The sheep are of the Scotch black faced mountain breed. Whitfield's stock farm is a most valuable institution; it is beautifully situated on the side of Rougemont and comprises about six hundred acres of land. It has the most extensive and complete farm buildings in this province and Mr. Whitfield spares no expense in the importation of the best breeding stock. The stock at present comprises: Short Horns, Devons, Alderneys, Herefords, Ayrshires, Polled Angus, and the ancient breed of Irish cattle. The advantages to the farmer from the surrounding country must be great, as they have the opportunity of greatly improving their stock."

STENDARY MAGISTRATE.—A Winnipeg despatch says Mr. W. McKay Wright, formerly member of Parliament for the County of Ottawa, is to be appointed Stendary Magistrate at Keewatin, N. W. T.

Lion Loose.

BOWMANVILLE, July 13.

While Forepaugh's circus procession was going into the procession grounds this morning, the wagon, on which was a woman and her lion, upset, causing great consternation among the onlookers. The animal was at once secured. The driver of the vehicle and the woman were both slightly hurt.

AFTERNOON DISPATCHES.

NEW YORK, July 13.—Arrived, the *Scythia* from Liverpool.

QUEENSTOWN, July 13.—Arrived, the *Egypt*.

LONDON, July 13.—The Manchester *Guardian* says the prohibition to export grain from Russia will be a serious matter for Germany, where the crops are especially poor. It seems likely that Germany will be an important customer for American surplus grain.

LONDON, July 13.—The *Times* understands that Lady Burdette Coutts, who has been negotiating for an estate in Ireland, relinquished her intention in consequence of the unsatisfactory relations between the landlord and the tenant, which likely arise from Mr. Forster's bill.

WEATHER REPORTS.

TORONTO, July 13.—Probabilities for the next twenty-four hours: for the lower lakes, moderate w. dr. fair weather, with local showers or thunder storms. Nearly stationary temperature.

WASHINGTON, July 13.—Indications: lower lakes, partly cloudy, local rains.

Custom House Arrivals.

(Reported by O. E. DIXON, Customs and Ship Broker.)

Steam barge *Saxon*, Cleveland, 199 tons of coal. *Rathbone* & Son. Sch. *Officer*, Oswego, light.

O. E. R. INWARDS.

M. B. Beasley, 9 bales broom corn, G. H. Pope, 1 carriage; W. Adams, 1 box. EXPRESS.

H. Jones, 1 pa.; W. P. Niles, 1 box.

\$500 Reward

was for years offered in every paper of the land by the former proprietor of Dr. Sage's Catarrh Remedy for a case of catarrh it would not cure. It cures by its mild, soothing, cleansing and healing properties. Suffer or doubt of any kind drive up catarrh and drive it to the lungs. This remedy has stood the test of time, having been a popular remedy for over a century. Sold by druggists at 50 cents.

A CURE.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. J. S. T. IMMAN, Station D, New York City. 400d&ly

How it is Done.

The first object in view with the American people is to "get rich," the second, how to regain good health. The first can be obtained by energy, honesty and saving; the second, (good health), by using Cassell's *Flower*. Should you be a dependent sufferer from the effects of Dyspepsia, Liver Complaint, Indigestion, &c., such as Sick Headache, Palpitation of the heart, Sour Stomach, Flatulency, Belching, Bile, Nervousness, Costiveness, Dizziness of the head, Nervous Prostration, Low Spirits, &c., you need *Cassell's Flower*. It will relieve you. Sample Bottles 10 cents. Regular size 75 cents. *Flower* sold by all first-class Druggists—Jas. Clark & Co., and L. W. Yeomans.

"I Don't Want that Stuff."

In what a lady of Boston said to her husband when he brought home some medicine to cure her of sick headache and neuralgia which had made her miserable for fourteen years. At the first attack thereafter, it was administered to her with such good results, and made so enthusiastic in its praise, that she induced twenty-two of the best families in her circle to adopt it as their regular family medicine. That "stuff" is *Hop Bitters*.

A Wonderful Discovery.

For the speedy cure of consumption and all diseases that lead to it, such as asthma, coughs, neglected Croup, Bronchitis, Hay Fever, Asthma, pain in the side and chest, dry hacking cough, locking in the throat, Hoarseness, Sore Throat, and all chronic or lingering diseases of the throat and lungs, Dr. Kido's *Ward's Lung Balm* is an invaluable remedy for itself a world wide reputation. Many leading physicians recommend and use it in all cases. The formula from which it is prepared is highly recommended by all medical journals. The clergy and the press have complimented it in the most glowing terms. Go to your druggist and get a trial bottle, free of cost or a regular size for \$1.00. For sale by Jas. Clark & Co.

BUCKING'S Africa Balm.

The Best Salve in the world for Cuts, Bruises, Sore, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chills, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clark & Co.

DIED.

Drowned, at Kingston, on Monday, July 12th, MARY ANN POTTER.

The funeral will take place from the family residence, Fort St., on Wednesday, July 14th, at 2:30 p. m. Friends and acquaintances are invited to attend.

Commercial.

Cheese Market.

UTICA, N. Y., July 13.—9,000 boxes of cheese were sold, 1,600 common. Prices ranged from 8 to 8½; ruling price 8½.

CAST ON THE WORLD:

The Border Marriage.
A STORY OF THE GREAT GLASGOW
BANK ROBBERY.

CONTINUED.
His lordship ordered, and they stood for
some moments gazing at each other in si-
lence. Charles was determined not to break
this silence, and Lord Eglehart was forced
to do so.

"Well, young man," he remarked, "are
you satisfied with the victory you have ob-
tained?—a victory for you are indebt-
ed to a woman's weakness?"

"Rather say, my lord, to a mother's love.
I certainly cannot add to a father's affec-
tion."

"There are circumstances in which a
father's affection would be imprudent," re-
turned his lordship.

"Oh, you mean when self-interest would
thereby be injured?" Lord Eglehart in-
quired.

"It is selfishness, then, supreme? I had a
notion, my lord, that truth and justice
were the only proper lawgiver of the world."

"You are young, and want experience.
But you have given no answer to my ques-
tion. Are you satisfied with the knowledge
you have gained? Does it content you to
know that you are my son?"

"Content me my lord! How can it re-
concile me to the past?"

"It cannot," cried Lord Eglehart; "and
therefore it was that I strove to hinder the
admission. This is a knowledge which must
bring more pain and disappointment than
satisfaction, and I judged it better that
your ignorance should continue. Unfortu-
nately you rashly persisted in being satis-
fied, and must reap the evil fruit you have
plucked."

"Is it, then, such an evil thing for me to
know that I am the son of Lord and Lady
Eglehart?" inquired Charles.

"In the circumstances I fear it is. Young
and inexperienced though you are, you must
know that this relationship can never be
made public. The admission made in this
case can never be denied."

"Cannot I and why?"

"Oh, are you blind enough not to see
why? Think how her ladyship and myself
must be compromised by the fact getting
abroad."

"Truth and justice, my lord, cannot bend
to compromise."

"But how are truth and justice concerned
in the publicity of this fact? It has been
owned to you, who are the only parties con-
cerned. It does give you a claim, I admit,
to some limited rights—to a moderate
maintenance, for example—but I should
suppose the position you occupy as Ravens-
wood's adopted son makes that no object to
you."

"A limited maintenance?" repeated Charles.
"Is that the only claim which this discovery
gives me?"

"I really do not see any other."

"Most amazing, my lord! Has the eldest
son of Lord Eglehart no better right than
this?"

Here his lordship turned pale and com-
pressed his lips very hard. Then he an-
swered, in a low voice:

"Do you require to be informed that our
marriage was celebrated a year after you
were born?"

"Good heavens, my lord! are you so lost
to honor as to cast a stain upon your wife?
Foul as it is to the deed you committed, in
sacrificing me—the helpless infant which
had been born to you—are you also pre-
pared to brand Lady Eglehart with de-
fects from virtue?" For shame, my lord
Hasten to disavow such an intention, or
words will fall me to express my detestation
of your conduct."

"Your indignation is just, but directed
against the wrong object," rejoined his
lordship. "It is not I, but you, who are
casting this stain on Lady Eglehart."

"By your persistence in dragging this
matter to light. At present, the faintest
breath of scandal has not touched her lady-
ship, but the moment the secret of your birth
is made known, that moment is the finger
of calumny pointed to her, and that
finger will be guided towards her by you."

"My lord, my lord! what miserable stan-
dard of truth is this you are bowing to?
Does the world's knowledge constitute the
stain? If it be so, then, what matters it
that it is concealed? But that is not the
point, my lord, and I should think you
know it. It is you who cast the stain, by
insinuating that my birth preceded your
marriage."

"The facts are palpable, Mrs. Fair-
weather told you the year of your birth.
The date of our marriage you can learn
from the parish register."

"Which marriage, my lord?" asked
Charles with pointed inquiry.

Lord Eglehart started back a pace, and
his excessive alarm was evident. "Which
marriage?" he faltered. "What do you
mean by which marriage?"

"I mean this:—Whether it is the private
or the public one that is to be found in the
parish register?"

"The private one! What private one?"

"The private one celebrated some two
years before the public one."

"You are tormenting me," rejoined his lordship
angrily, "what nonsense is this? What
has made you dream of a private mar-
riage?"

"Dream it? I do not require to dream
it. I have proof of it."

"You have what?" roared Lord Eglehart,
glaring upon him in consternation.

"I have proof," rejoined Charles, quietly.
"What proof have you?"

"My own existence."

"His lordship drew a long sigh of relief,
and the fear and agitation in his counte-
nance diminished."

"Yes, my lord," added Charles, "my birth
is evidence to me of a previous and private
marriage; and to suppose again also is to
suppose my mother untrue and false in
virtue, and the man who dares to say so
lies."

"This air and tone of extravagance will
avail you nothing," rejoined his lordship.
"If you are as tender of Lady Eglehart's good
name as you profess you will carefully con-
ceal what you have learned to-day."

"You will me to do so?"

"Certainly do."

False Impression.

It is generally supposed by physicians and
the people generally that Dyspepsia cannot
invariably be cured, but we are pleased to say
that **DR. HENRY'S AGUE CURE** has never, to
our knowledge, failed to cure Dyspepsia, or
Liver Complaint in all its forms, such as Sour
Stomach, Costiveness, Sick Headache, Flatu-
lence of the Heart, Indigestion, and taste in
the mouth. Out of the 50,000 doses bottle
this sold last year, not a single failure was
reported, the thousands of complimentary
cures. Three doses will relieve any case. Try
it. Sample bottles 10 cents, regular size 75 cents.
For sale by J. Clark & Co. and L. W. Wey-
mann.

The Kent House

One of our remarkable men was the Duke
of Kent, the father of our beloved Queen.
The city house where he lived in Quebec is
now used for office purposes. The Duke was
a practical man, and his life was in accord
with his principles. It is not strange, then,
that his city house should be preserved as
a historical monument. In fact, all about this
house the body of General Montcalm was
laid on the morning day of 1759. Opposite the
St. Louis Hotel, which adjoins the Kent
House, at the corner of La Rue des Jardins,
stands the building which was the residence
of the Duke of Kent. In fact, all about this
house the body of General Montcalm was
laid on the morning day of 1759. Opposite the
St. Louis Hotel, which adjoins the Kent
House, at the corner of La Rue des Jardins,

PROPRIETOR.

Over 10,000 cases successfully treated since the establishment of our Institute in Detroit, Michigan.

ON THE INFLUENCE OF COLD IN THE PRODUCTION OF DISEASE OF THE LUNGS AND ON THE COMPARATIVE MERITS OF THE SEVERAL METHODS OF TREATMENT.

The state of the atmosphere impresses itself directly on the mucous lining of the nasal passages, throat, and lungs. Sudden changes in the temperature of the air are immediately felt over the whole of this extensive surface.

NEARLY EIGHTY PER CENT. OF THE CASES OF CONSUMPTION, THROAT, AND LUNG DISEASE, ARE CAUSED BY THE INFLUENCE OF COLD.

When the mucous membrane of the nasal passages, throat, and lungs is exposed to the influence of cold, it becomes inflamed, and the mucous membrane becomes dry and cracked.

IT IS A RULE OF MEDICAL PRACTICE, ESTABLISHED BY AGES OF EXPERIENCE, THAT EVERY DISEASE WHICH IS CAUSED BY THE INFLUENCE OF COLD, SHOULD BE TREATED BY THE METHOD OF TREATMENT WHICH IS MOST EFFECTIVE IN REMEDYING THE CAUSE OF THE DISEASE.

Part of the body requires for its cure the direct application of remedies to such organ or part. When this can be done, it is the most effective method of treatment.

THE DETROIT THROAT & LUNG INSTITUTE.

called the "Horse of Glen," and see a little lake far below, appearing like an ink drop, caused, no doubt, by the shadows of the overhanging cliffs. Further on, after some hard climbing, we arrive at a little lake, which goes by the common name of "The Devil's Bowl." It is about one eighth of a mile long, situated in a deep gorge, and the water is as cold as ice and as pure as the purest of fountains. After feeling the coldness of the water, and picking out a few stones which the guide says are good for sharpening razors, we continue on, occasionally using our hands to assist us, where the path is steep, and finally reach the top, 2,766 feet above the sea. From this vantage point the atmosphere is so clear and pure, that it is a pleasure to drink it.

indicated offenses committed in all Ireland, and of that number more than 2,500 were set down to the account of Dublin.

It is reported that the liquidators of the City of Glasgow Bank will pay at once a further dividend of 1s. per pound. Five dividends have already been paid, bringing the payments up to 17s. in the pound. Almost two and a quarter millions are still due to creditors, including interest, and the present payment will reduce that sum by £500,000 to £2,000,000.

At Belleville, county Mayo, the other day, Miss Gardiner, who has the misfortune to be on bad terms with her tenants, attended the local Court house to support some objection to a judgment of the Court, and to the surprise of the public, she was accompanied by a large number of her tenants, who, according to a report in a Dublin paper, released from prison, and "knowing that Miss Gardiner" carried two revolvers, and is a crack shot.

RELEVILLE, THURSDAY, JULY 15.

The Auditors' Report.

The Free Press is inaccurate in stating that "the INTELLIGENCER admits that the Free Press has a larger circulation in the city" than has this journal. Our so-called admission was in these words:—"We have no objection to the Free Press publishing the report in question, nor have we the slightest objection to its claiming a larger circulation than all the papers in the city combined for that matter." Thus it will be seen that our contemporary—probably without intentionally so doing—misrepresents us on this point. Our contemporary remarks that the Chairman of the Printing Committee received from the Manager of the INTELLIGENCER a price for the publication of the Auditors' report. This, we believe, is untrue. The gentleman in question can decide the point, and we ask him to state through our columns, if he will, whether he did or did not ask or receive a price from this office for the work in question.

A Crying Evil.

There are laws in our Statute book which make it a crime for keepers of public houses to allow minors or apprentices to lounge around their premises, and any one giving or selling liquor to such minors and apprentices is held guilty of a serious offence, and liable to fine or imprisonment. Now, it is not a notorious fact that young lads, some just entering on their teens, are often seen frequenting the bars of public houses, and sometimes seem to walk up to the bar with all the boldness of an old toper, and call for their glass of grog? We know that some keepers of public houses will not countenance the loitering of these youths about their premises, and will under no circumstances allow them to have strong drink. But there are others not so particular, who are either not aware of the moral and legal consequences of the offence, or are indifferent to the results of their inhuman conduct. One can hardly believe it possible that men knowing the evil effects of the immoderate use of alcoholic liquors, would deliberately sell such stuff to young lads, and in quantities to make them intoxicated, but the fact is true, nevertheless, however humiliating the acknowledgment. It may be barely possible that these men do not know that they are guilty of an offence against the law, and it is the object of these remarks to make them acquainted with the fact, if they were unaware of it before, and to warn them against a repetition of the offence. It is bad enough in all conscience for fathers of families to spend all their hard earnings at these places, and go home to their diurnal friends, and make them miserable and wretched by their miserable condition, but it is ten times worse to see boys learning the same habits which have made their fathers wanderers and outcasts. If, therefore, there are any among those licensed to sell intoxicating liquors who are not aware that they are violating the law when they allow minors or apprentices to lounge around their barrooms, or give or sell to such youths strong drink, we make them acquainted with the fact, and urge them to observe the provisions of the law. If, in face of this warning, they are found guilty of violating the law, the responsibility be upon their own heads. It is the intention, we believe of the police authorities, to keep a strict surveillance over these matters, and to execute the law without fear or favor; Should, however, the police authorities fail in the performance of their duties, there are others, personally interested in the welfare of these young lads, who will take prompt and effective steps to have the law enforced. It is a crying evil, which should not and cannot be allowed to exist in this boasted Christian city.

Words of Cheer.

The Toronto press have always hitherto exhibited a narrow spirit in endeavoring to defeat the aspirations of those municipalities which have sought to engage in such branches of trade or manufacture as would place them in competition with the chief city of the Province. That Belleville would interfere with a project in which Toronto is interested, provided iron smelting works were established here, is certain as we recently quoted from the report of a meeting held there to show that an effort is to be made to establish an iron smelting furnace in that city for the purpose of reducing the ores of the Snowdon and other mines in the district north of Port Hope. It is therefore with much satisfaction that we note that the Mail has, under the circumstances, the following kindly reference, which appears in its issue of the 14th inst., to the meeting recently held here with the object of improving the status of Belleville as a seat of manufactures:

Belleville is making a vigorous push for a better position as a manufacturing city. Its inhabitants have adopted the wise course of assembling in public meetings and discussing the prospects. The industries suggested as being applicable to the circumstances of the

city are smelting works, blast and steam manufacturing and several smaller industries. The general opinion favors the iron industry as the one that offers the best prospects. It is claimed that the ore of North Hastings yields from 60 to 85 per cent of iron, and that the cost of manufacturing pig iron would be considerably less than in the United States. The establishment of a works of this character, while some speakers contended that the property of a community developed largely in the development of small enterprises, has been appointed to make further enquiries. This movement is in the right direction, and affords fresh evidence of renewed confidence on the part of the people.

These remarks of a leading journal ought to prove an incentive to the gentlemen making the matter in charge to proceed with all possible alacrity. Of one thing every body may be certain, namely that if iron cannot be successfully manufactured in our city from the native ores, then the experiment must be a failure wherever tried in Ontario, and we call the attention of the moneyed men of Canada to this fact. Our facilities are such that no place west of Three Rivers can pig-iron be made so cheaply as in Belleville, and it is apparent that capitalists resident elsewhere are timid as to investing, it is incumbent on our people to help themselves if, upon minute enquiry, the flattering estimate presented by Mr. Pusey be found to be correct, as we believe it is.

Barley.

The New York Bulletin says:—"The barley growers of California are making a record for the district in Canada from which the largest Atlantic and British brewers have been accustomed to draw their choicest stocks of that grain, the Hay of Quince, on the St. Lawrence, has suffered serious damage, and some of the finest crops of the year have been decimated by the terrible rain and hail storm, which laid waste both dry and barley, to which this section is chiefly devoted. Barley crop in California is reported in good condition, and the demand from this country and Europe will be chiefly upon the stocks of the California crop. The barley crop of this country is ordinarily about ten million bushels, and the loss of the Canadian crop will tend to advance the price of this grain."

The above from the New York Bulletin will be news for the farmers throughout the Bay of Quinte district, where the barley and rye crops are fully an average this season. A hail storm which damaged a few farms in this section is no doubt the foundation for the above article, but will cause but little difference in the total shipments of barley from this section. Already some barley is being cut, and from what we can hear promises good returns. Lately some barley has suffered a little from shrinkage and it was feared before the late rains that the damage from that cause would be great, but the rain has greatly improved the prospects of late sown barley, so that the crops throughout the section known as the Bay of Quinte district can safely be relied upon as up to the average.

FROM LAKE ONTARIO.

A PLEASANT PARTY AND THEIR CRAFT—FORTY-ONE LITTLE CREW ARE AFTER SLOW ENJOYMENT.

To-day a little craft of the steamboat pattern lay in the canal basin. She bore across her stern the name and port of "Brookville"; her deck was protected from the sun by a sheet of canvas, and her cabin and fore-cabin were full of dishes and hampers as to suggest a cruise of a considerable length of time. Two or three men evidently servants or boatmen lolled lazily on deck while the captain, a stout but with a twinkle in his eye, sat in the stern. "Oh, my dear captain," was not a certain evidence across the bow of the boat, but this clerical phrase would not have been inapt. It occurred to our reporter that the party who had chartered the vessel were in for a good time, and enquiry confirmed the impression. It was learned that the party about to start, were made up of residents of Kingston, Belleville, Brockville and vicinity, and that they had arrived last night by the "Alexandra"—as that boatman triplicate and "Remy" did not—and would go on board the Remy this evening, being anchored and set sail for Sorel. Their intention was to proceed down the Richelieu, to Lake Champlain and go on to Lake George, visiting Burlington, Plattsburgh, and other American towns on the lake. To-day the party visited various points of interest in the commercial capital, including the Windsor Hotel, the ocean steamships, &c. Among the passengers are Mr. J. J. B. Flint, barrister, of Brockville, and wife, Mr. Fred. Ross and wife, Mr. L. W. Yeoman and wife, the Misses Jones of Belleville, Miss Crozier, of Oshawa, and Mr. Chow, of Kingston. The boat is owned by Mr. John Camm, of Brockville, and was chartered specially for "go as you please" trip, and the excursionists are to realize the advantage they have in this vessel as compared with small old time vessels. It is probable that upon their return from Lake Champlain they will take a run down to the ancient capital.

[The foregoing we take from the Montreal Witness of last evening. It will be interesting news to many to know that the party was made up of residents of "Kingston, Brockville and vicinity," and that Mr. J. J. B. Flint hails from Brockville. But that is just about as correct as most of the large city "interviewing" reporters get things.]

News Condensed.

—Mr. Costigan, M. P., has left Ottawa for Winnipeg.
—Hon. Mr. Langvin, will leave for the west on Monday.
—An unknown man was killed by the train on the Grand Trunk near Point Claire.
—A woman, name unknown, dropped dead on the street on the 14th inst. in Montreal.
—The 25th session of the Masonic Grand Lodge was commenced at Guelph on the 14th.
—It is probable that Lord Rosebery will succeed Lord Lansdowne as Under-Secretary for India.
—The French Chamber of Deputies has made a grant of nine million francs for the construction of the Sahara railway.
—A bogus French Duke has been duped by the people of Buffalo, and after swindling several parties, has left for Canada.
—The stock of grain in store at Montreal is the largest in many years. The decrease in wheat during the past week was over 32,000 bushels.
—The Minister of Justice entertained Messrs Mackenzie Bowell and Baby and a select company at a picnic on Lawlor's Island, near Halifax, N. S., yesterday.
—It is understood that the British Cabinet will consider the recall of Sir Barlow Freere on the receipt of official information that the South African confederation scheme has failed.
—An application has been made for a charter for a new tobacco factory in Montreal. There are already six large tobacco factories there in operation, one of which employs 1,200 persons.
—Rev. C. P. Mahoney, who recently published a volume of verse in Toronto, has received congratulatory letters from the Right Hon. Mr. Gladstone and Herbert Spencer.

Charge of Poisoning.

TRIAL OF DAVID CONNORS.

THE PRISONER ACQUITTED.

QUEEN'S COURT. The prisoner, David CONNORS, was upon Tuesday, the 13th inst., placed upon his trial before his honor Judge Laster on the charge of having maliciously administered the blue vitriol to some other person, destructive or obnoxious to the State, George FRIZONE.

At the instance of the County Attorney all the witnesses for prosecution and defence were kept out of Court except the one in the box, Dr. Wilson was the first witness called. He testified that upon the 23rd of June he was called to see Mrs. Frizone at her house; he was informed she had taken poison; she told him prisoner had given her a powder; from her statement and symptoms he concluded she had taken an irritant of some kind; Mrs. Wilson had been giving her milk, which he approved of, and gave her an emetic, which acted; the vomit was caught in a bucket and contained a dark blue substance heavier than the milk and rather watery colored, and looked like blue vitriol; should think about two tablespoonfuls gave directions to have the contents of the bucket preserved.

Cross-examined.—Blue vitriol is used as a medicine; from 10 to 15 grains is given as an emetic; 2 drachms would be a fatal dose; it is sometimes used for ulcers, and as a wash for sore mouths might be used; an irritant is not necessarily a poison in the ordinary application of the word; she described her condition and was sensible.

Mrs. FRIZONE, sworn.—Prisoner boarded with us since March; on that Friday he gave me a powder for my sore mouth; it was very strong; I swallowed the powder; prisoner packed up his things and went out; as he was going out I said, "Dave, if you have poisoned me, stay to see me die"; felt queer, stupid like; came for Mrs. Wilkins' milk; she and Mrs. Wilkins came over; was very sick; thought I was going to die. Prisoner ordered wanted me to run away with him; he said that if I would not he would kill my husband or me.

Cross-examined.—Don't remember how long it was before that Friday he made these threats; it was a little bit of a powder, about as much as you could put on the point of a pen knife; was not sensible when Dr. came; never told him or any one else, except in court, that Dave had given me poison or a powder; did not know anything until next day; when he gave me the powder he said it was for my sore mouth; I swallowed it; did not think he meant to harm me; never told any one that Dave did not give me poison or do me any harm; had no conversation with Lynch that day, early in the day; never told Mrs. Guyette anything about this case; did not on the Friday after and throw or attempt to throw a pitcher at Mrs. Connors or Mrs. Lynch.

Mrs. WILKINS, sworn.—Was sent for and told by prisoner she was poisoned, that Dave Connors had given her a powder; gave milk; sent for a doctor; prisoner for her husband and sent for her relatives; saw the dark blue substance in the pail came as Dr. Wilson; the contents of the pail were afterwards thrown out.

JOHN McRUDEN, sworn.—Arrested prisoner; he ran away when he saw me; went round the corner to his father's residence; saw him for a doctor; prisoner for her husband and sent for her relatives; saw the dark blue substance in the pail came as Dr. Wilson; the contents of the pail were afterwards thrown out.

Evidence for the Crown here since Mr. Dickson submitted there was not sufficient evidence to warrant the case being sent to a jury if one had been empaneled. The judge thought that taking the prisoner's conduct into consideration there was some evidence of a malicious intent.

It being 6 o'clock court adjourned until 9:30 on the 14th.

FOR THE DEFENSE.

Mrs. DEMISSIL, sworn.—Am a neighbor of Mrs. Frizone; on the day she was poisoned I went in; I knew her, and what she was doing and saying; she told me the young man did nothing to her.

Mrs. GUYETTE, sworn.—Went to Mrs. Frizone's house last Monday morning; had a conversation with her in her back kitchen; she asked me to have a cup of tea, but I declined; she asked if I was afraid of being poisoned; I said no, but had breakfasted; I asked did Dave Connors poison her; she said no, he gave her some vitriol for her sore mouth, and told her not to swallow it; Mrs. LYNCH, sworn.—Am a sister of prisoner; heard Mrs. Frizone was poisoned, and that my brother was accused of it; went with mother over to see her; asked her if my brother had poisoned her; she made no answer; asked again; she rose up and grabbed a pitcher to throw at us; my brother and father mix liquor and essences.

Mrs. McMAHON, sworn.—Told prisoner the day that there was a warrant out for him.

Mr. TAYLOR, sworn.—Sat up that Friday night with Mrs. Frizone; she knew quite well what she was about; after a while I noticed that when strangers came in she would appear to be senseless, but all right when they had gone; she told me she had put Dave where he could not be with Rachel that night; as the request of Rev. Mr. Burke I asked her if she were baptized or confirmed; she answered me yes.

THOMAS BARNHART, sworn.—Am a nephew of Mrs. Frizone; was there last day and next morning; saw her get up next morning and eat six or seven eggs for breakfast; she has not a very good reputation for truth telling.

PETER JOHNSON, sworn.—Am same relation to Mrs. Frizone as last witness; about name as Mrs. Frizone; both born in the Indian woods; was at her home on the day of the poisoning; she knew what she was about; was present once when Mrs. Lynch wanted her brother to go home; Mrs. Frizone threw her arms around him and would not let him go; I saw her eat eggs for breakfast on the morning after; she was sitting up in bed after reading when some ladies came; she threw herself over on the bed, shut her eyes and acted as if very weak and bad; don't think she was nearly as bad as she pretended.

MICHAEL McMAHON, sworn.—Mrs. Frizone once prevented prisoner leaving the house; threw her arms around him and said "If Dave goes by I'll go too."

Mrs. LYNCH, sworn.—Had a conversation with Mrs. Frizone on that Friday, between 12:30 and 1:45; was coming from my dinner to my work; she asked me where Dave was; This closed the evidence. The Court adjourned until 3 p. m.

Mr. Dickson then addressed the Court on behalf of the prisoner at the bar, and Mr. Coleman followed on behalf of the Crown.

A verdict of "not guilty" was returned, the Judge, in pronouncing judgment, saying that it would not be proper to convict upon the unsupported testimony of Mrs. Frizone, who was contradicted by so many witnesses in several important particulars; that there had been an analysis of the contents of the stomach, and that the malicious intent of the prisoner in giving the powder was not established. It was shown that vitriol in small quantities was a medicine, and good for sore mouth, and Mrs. Frizone says the prisoner said the powder was for that purpose, and she told Mrs. Guyette he told her not to swallow it. The quantity and color of the dark blue material in the packet by Mrs. Wilkins and Dr. Wilson, did not correspond with the color or quantity of the powder given by prisoner to her.

MORNING DESPATCHES. EUROPEAN.

LONDON, July 15.—Heavy rains caused great damage to crops in the main districts of Warwickshire, Leicestershire and other parts of the Province.
DUBLIN, July 15.—Excessive rains have prevailed nearly over all Ireland for the past fortnight, and are beginning to excite serious apprehensions regarding harvest.
PARIS, July 15.—The Montenegrin agent informed the Paris and foreign ambassadors of the Albanian attack on Montenegro. The positions are imminent.
ST. PETERSBURG, July 15.—China advises report that Chung Hoo has been liberated and deputed from first to the fourth rank in the mandarin, nevertheless, the war party is in ascendancy.

AMERICAN.

SAN FRANCISCO, July 15.—At Lincoln on July 3rd one Harrison, while intoxicated, was killed at night; a mob entered the jail and killed Harrison, riding him with bullets. On the night of the 4th the mob again surrounded the jail and killed the Deputy Sheriff, who had made himself obnoxious to the out-laws, on the night of the 6th the mob again visited the jail and hanged a prisoner.
CHICAGO, July 15.—Reports from the interior of the State and from Iowa, Wisconsin, Michigan, and Indiana describe Tuesday and Wednesday as hot as any days in the history of this section, the mercury ranging from 95 to 105.

The latest reports indicate that as a whole the crop prospect for the great grain growing belt of the North-West is flattering.
NEW YORK, July 15.—Chas. Hussardoff, aged 21 years, an artist married at Central Park yesterday.

An unknown man also committed suicide at Central Park yesterday.

The recent arrivals of immigrants at this port show a decided decrease in comparison with June.
The Cuban here report that a great battle took place between the Spaniards and the insurgents on the 3rd inst., at Sancti Spiritus, Cuba. The result is unknown.

The Tribune's Washington special says: Reports show that the corn crop is larger by far than that of any previous year. Cotton crop equal to the best of former years. Wheat yield up to the average, with a slight increase in quantity.

2,800 sheep dogs were drowned at the dog-pound during the past three weeks.

COUNTERFEITS.—The Montreal Witness says:—"Counterfeit ten dollar Ontario Bank bills are again being circulated in this city. They are signed by Frederickson, and the ground work on the back is a light green instead of dark. The mouth, too, of one of the Bank representatives is badly executed, as will be readily seen when the counterfeit is compared with the genuine bill."

THE CREDIT VALLEY RAILWAY STRIKE.—No satisfactory solution of the difficulty between the directors of the Credit Valley Railway and the employees has yet been arrived at. The men are still very indignant and threaten to hold a jubilee meeting.

GORED BY A BULL.—Mr. Morris Miller, a farmer living near Bath, was leading a bull into the yard on the 14th, when the animal became enraged and attacked him furiously. But for the assistance of a hired man he would have been killed on the spot. As he is not expected to recover.

DETOIT THROAT & LUNG INSTITUTE.

253 WOODWARD AVENUE, DETROIT, MICH.

M. Hilton Williams, M. D.

Graduate of Victoria College at Toronto, and Member of the College of Physicians and Surgeons of Ontario.

PROPRIETOR.

(PERMANENTLY ESTABLISHED SINCE 1870.)

Over 10,000 cases successfully treated since the establishment of our Institute in Detroit. ON THE PREVALENCE OF GOLD IN THE PRODUCTION OF DISEASE OF THE LUNGS AND ON THE COMPARATIVE MERITS OF THE DIFFERENT METHODS OF TREATMENT.

The state of the atmosphere impresses itself directly on the mucous lining of the nasal passages, throat, windpipe, bronchial tubes and air cells of the lungs. Sudden changes in the temperature of the air are immediately felt over the general mucous membrane, and the humidity and moisture in the air irritating to the mucous membrane, irritate the lining of the air cells, and produce the first stage of inflammation—the parent of all these chronic catarrhal affections of the lungs.

Nearly eighty per cent. of the cases of consumption begin by congestion of the throat and nasal passages, throat and bronchial tubes produced by colds. To this extent, there is no danger, and the disease is cured by the use of the "Mucous Membrane" of the throat and nasal passages, and the air cells of the lungs.

It is a rule of medical practice, established by ages of experience, that every disease which is local in its origin, and which is confined to a part of the body—requires for its cure the direct application of remedies to that organ or part. This is the only way to cure a disease generally curable, and when it cannot be cured, it is serious, generally fatal. The same rule applies to the lungs. The disease is local in its origin, and is confined to a part of the body. The only way to cure it is by the direct application of remedies to the lungs.

When cold produces inflammation of the air cells, the disease is local in its origin, and is confined to a part of the body. The only way to cure it is by the direct application of remedies to the lungs.

Physicians treat these similar diseases of the same membrane by different means, and as a result, they cure some and fail to cure others. To the eyes they apply eye-washes and ointments directly to the inflamed parts, and nothing to the diseased parts, and catarrh becomes a permanent disease. They prescribe gargles and applications directly to the throat, and generally cure. They prescribe remedies for the lungs, and generally cure. They prescribe remedies for the lungs, and generally cure.

But at the practice generally pursued. Physicians treat these similar diseases of the same membrane by different means, and as a result, they cure some and fail to cure others. To the eyes they apply eye-washes and ointments directly to the inflamed parts, and nothing to the diseased parts, and catarrh becomes a permanent disease. They prescribe gargles and applications directly to the throat, and generally cure. They prescribe remedies for the lungs, and generally cure.

OVER THE SEA.

After striding along to the picturesque mountains of Killarney, which "Lift to the clouds their craggy heads on high," and "Crowned with fairs fashioned in the sky," we started by train for Dublin. A Canadian is somewhat amused at the style of care and system of

RAILROAD TRAVEL.

coached throughout Great Britain. The coaches are much more commodious than those of the United States, and are divided into four compartments, by partitions running across from side to side. These compartments are each capable of seating eight passengers, and are entered from the platform by a door at the side of the car, instead of the end, as is the case with our passenger cars. The seats are divided into two classes, and are entered from the platform by a door at the side of the car, instead of the end, as is the case with our passenger cars. Old clothes made to look new—coats, vests and trousers, &c. I will you, Ladies, it is no joke; I can clean your dresses or your coats. Campbell St., Dickson St. stand.

One lady says to give me how you can afford to put on a new pair of gloves every time you go out? She answers (in a low tone of voice): They are not new, I had them cleaned at Prof. Smith's, Campbell St. And the other lady went right away to Campbell St. to have her's made new. 59H

City and Vicinity.

POLICE.—Only one arrest was made last night.

RAIN.—A very heavy shower during the night laid the dust and cooled the air nicely.

MARINE.—There were neither arrivals nor departures to-day; wind strong from the south-west.

MOONLIGHT EXCURSION.—The moonlight excursion to-morrow night will be for the benefit of St. Thomas' Church. There ought to be a large attendance.

ASSESSMENT.—The assessors are carrying on their arduous work with energy, and the prospect is that a material alteration will be made on the assessments of former years.

THE DRIVE.—For more than a week past, says the Campbellford Herald, have the logs been floating down the river. The drive belongs to Messrs. Gilmour & Co., and Rathbun and Son, and contains 170,000 pieces—40,000 belonging to the former and 130,000 to the latter.

A PLEASANT ENTERTAINMENT.—The exhibition given in the City Hall last night by the pupils of Miss Day's select school was in every respect successful. The performances of the pupils were such as to reflect the utmost credit upon their teachers showing that their instructions had been thorough and ably conducted.

THE FIRM.—Mr. W. R. Barber, of the firm Messrs. Barber, Brignall & Co., left at noon to-day for Europe via New York, to make the usual fall purchases for the firm. Although a young man, this is the seventh trip Mr. Barber has made to Europe. We wish him a pleasant voyage and safe return.

WEARY LIGHTS.—The Kingston Why says: "There were lights on Gunn's wharf on the night of the Potter accident, but they were not at the place where the 'drown' occurred. To meet the wishes of the passengers by the Alexandra and other steamers, a lamp is being placed near where the mishap took place."

THOUGHTFUL INLAND PARK.—An announcement concerning this most famous of all summer resorts appears in another column. Its attractions are so well known that to speak of them at length would be superfluous; but it may be said that it opened on the 25th of June and will remain open until the 1st of October, and that a series of highly interesting public meetings commenced on the 11th inst. and lasts until August 31st. Persons desirous of visiting the Park can either leave Belleville by the steamer Hastings or by the noon train on the Grand Trunk, connecting with a steamer which leaves Kingston at 3:30 p. m. daily.

HOTEL CHANGE.—The Campbellford Herald says: "Mr. D. Collins, late proprietor of the St. Lawrence Hall of this village, has sold his premises to Messrs. W. & D. Kerr, two gentlemen from Oremore, and will make his future home in Belleville. Mr. Collins has been a resident of Campbellford for the past seventeen years, and put up the first respectable brick hotel ever erected in this village. He was a member of the Council for two or three years, a position which he resigned on entering other duties in life. He kept an orderly hotel for many years, and no doubt it is with some reluctance he leaves a place more like home to him than any spot on earth. We wish him prosperity in any good avocation it may be his lot to enter."

ARRIVAL.—The S.S. Plymouth arrived at Fox River this morning at 10:30.

COMMITTED FOR TRIAL.—The result of the examination before the Police Magistrate yesterday afternoon in the case of attempted murder, preferred by Anthony Golding against George Linton, was that Linton was committed for trial.

BURGLARY.—During last night a small grocery store near the Railway bridge, North Front Street, of which William Mack is proprietor, was entered by a burglar. The thief carried off half a box of cigars and ninety cents in money.

A GOOD FISH.—The Pictou Times says: "Mr. Alfred Bignall, of the firm of Barber and Bignall, Belleville, while trolling on West Lake with Mr. Blood, proprietor of the Lake Shore and Georgetown Houses, last week, hooked and successfully landed a muskellunge weighing 14 lbs."

STREET CROSSINGS.—A new crossing is being laid down at the intersection of Front and McNamara Streets, and not before it was needed. In fact crossings throughout the city generally had a shockingly bad condition, and it would be well to abandon the use of plank crossings on the principal streets and substitute wooden blocks, as the latter have proved entirely satisfactory.

PERSONAL.—We had a call to-day from Mr. Wm. Catlin, of the Cow Cross Mission London, England, who has been engaged in assisting emigrants to Canada. Some 2,000 families the association which he represents have been settled in that way, and Mr. Catlin is visiting Canada to see how they are prospering in their new home, and would be pleased to meet any that may be located in this neighborhood. He will proceed to-night on the market square at 8 o'clock.

GRAND JUNCTION RAILWAY.—The Peterborough Review says: "The workmen engaged on the Grand Junction Railway are making good progress with the work. They are now engaged in grading and straightening up the track in the township of Otonabee about five miles from town. There being some disputes as to the value of land in the vicinity, arbitrators have been appointed to settle the difficulty and are now at work. It is expected that the bridge over the river at Hastings will be finally completed about the end of this month."

SHEEP AND WOOL.—A grand international exhibition of sheep and wool is to be held at Philadelphia in September, and the Pennsylvania Agricultural Society, under whose auspices the show is to be held, earnestly desire the co-operation of Canada. The Dominion will be represented by Messrs. David Elgin, ex-M. P. of Toronto, and Mr. E. A. Barnard, director of agriculture in the Province of Quebec. All sheep and wool for exhibition at this show will be free of duty, unless sold in the United States. Copies of the list of premiums can be obtained from Col. Prince, U. S. Consul, at his office.

THE SPARROWS.—An exchange says: "English sparrows appear to be very useful little creatures in more ways than one. It has been discovered that they are very fond of Canada Thistle seed, and that when the sparrows were numerous, not a single seed could be found in the thistle down that was very plentiful there. There are many who decry the sparrow, but he has friends as well, amongst others the market gardeners, as the sparrow is a mortal enemy of the cabbage worm. A gardener in this city states that two years ago he gave up fighting the worms, having found all so-called remedies useless, when a large number of sparrows descended on the cabbages and cleared the worms of completely."

Campbellford Notes.

The last logs of the Messrs. Gilmour & Rathbun's saw log drive passed the village yesterday about noon, all went off very quietly.

We well remember when the inhabitants along the river dreaded the time of these drives, in consequence of the roughness of the men employed in this work, but we are happy to say that the men seem to be very much improved in their habits and morals. We have not seen one of these men worse for liquor since their appearance here. No doubt the strict management of their overlookers, Mr. Callaghan and Kennedy, have a great tendency towards their good conduct, and we trust we shall be able to speak well of those that come after, as it appears another drive will soon follow.

Several farmers in our township have commenced cutting their fall wheat. It is well filled, but yet there will be a deficiency. Some barley has also been cut, with prospects of a good yield.

The Hon. Jas. Cockburn is here on a visit to his brother. He has left the busy turmoil of the city, for the recuperation of his health, which has not been very good for some time past. It is to be hoped the salubrious air of Campbellford will restore him to his usual cheerfulness.

Seasonable Topics.

The fan is mightier than the sword.

An old adage says a fish does not suffer much pain from being hooked. If spiders had it, the thought of how his weight will be lifted about that causes him anguish.

In consideration of the sanctities of his congregation on a summer Sunday, a queer old dame, prayed: "Lord, remember those who are prostrated on beds of sickness and longings of weakness."

The people who can't afford to leave the city in summer are their "form door" and they are largely in the majority.

The owners of boats here may be interested in learning that the bottoms of small old boats can be made as durable as iron by thoroughly drying the boat and applying as much creosote to the inside as you can get.

Correspondence.

What correspondence will be accorded space for the expression of their views on topics of public interest, it must be in all cases unimportant, and the views expressed must be those of the correspondents themselves.

To the Editor of the Intelligencer.

Sir,—In response to your request of yesterday, I would say that upon being requested by the City Clerk to have the Abstract Statement published immediately, I asked the President of your Company, Mr. Jamieson, if I could get an insertion for less than 8 cents per line, he replied I could not.

Yours truly,
Alexander L. Gray,
Chairman of the Printing Com.
Belleville, 16th July, 1880.

In reference to the above, I would say that Mr. Gray never intended to me that he desired the publication of an advertisement so lengthy and as important in character as the Abstract Statement and Abstract of the City Treasurer's Accounts.

J. Q. JAMIESON,
Vice-President of the City Treasurer's Accounts.

The Young Couple Happily.—The Montreal Witness of last evening says: "Miss Annie Moreau and Frederick Lapointe, the young couple who were intercepted in their Green flight on Monday evening, were met by their uncle yesterday, and finding that the young people were determined upon their course, he at once consented to the marriage. When she heard the announcement, with her eyes filled with tears of joy, the young woman threw herself into the arms of her lover. They went to Ottawa this morning to be married."

DOMINION RIFLE MATCHES.—His Excellency the Governor-General and H. R. H. the Princess Louise have signified their intention of being present at the opening of the Dominion Rifle Association matches. Entries are to be in advance instead of after competitors arrive, as has been the case hitherto.

AFTERNOON DISPATCHES.

SUTTER, July 16.—The Albanian leaders recently decided to take offensive measures days ago. On Sunday night seven clansmen went by a circuitous route to fall on the rear of the Montenegrin position, near Jockovina. Monday a. m. they surprised a picket of 15 Montenegrins, only 6 of whom escaped badly wounded. Simultaneously an attack was made on the Montenegrin front, and 70 clansmen returned to camp with 13 Montenegrins' heads. A mountain report a renewal of the attack at Blomati; 38 Montenegrins' heads and 3 of their officers were brought in.

CARLEIGH, July 16.—At half past ten on Wednesday night, Ricca Colliery was reported exceptionally free from gas, and all workings in good order; 119 miners therefore descended the pit, and the explosion occurred 15 minutes past one on Thursday morning.

ROME, July 16.—From information received here it is not believed that Greece will be able single handed to cope with the Albanians.

WIMBORNE, July 16.—There was a denouement early this morning and it was impossible to do anything at the long ranges. In the extra series of prizes Scott, with Snyder rifle, made 34 out of a possible 35. Humphries made 35, the highest score possible in competition for the Curtis and Harvey prize, beating Halford's score of 34. Penton made 49 out of a possible 50 in the St. Lager competition.

NEW YORK, July 16.—Dr. Tanner is in very good humor. He has gained half a pound since Thursday, and has taken 283 ounces of water. Pulse 82.

WEATHER REPORTS.

TORONTO, July 16.—Probabilities for the next twenty-four hours: for the lower lakes, light southerly to north-westerly winds fresh and cooler weather.

WASHINGTON, July 16.—Indications: lower lakes, partly cloudy, occasional rains to-morrow; cool and fair.

Custom House Arrivals.

(Reported by C. E. DIXON, Customs and Ship Broker.)

A. T. & J. WALKERS.
H. Derby, 1 box; 3 cans corn; Pilsen & Co. 5 caddies tobacco; F. H. Ross & Co. 2 bales glassware; E. Brown, 4 cases; Pilsen & Co. 2 caddies sugar.

"I Don't Want That Stuff."

Is what a lady of Boston said to her husband when he brought home some medicine to cure her of sick headache and neuralgia which had made her miserable for fourteen years. At first she refused it, it was administered to her with such good results, and made so enthusiastic in its praise, that she induced twenty-two friends to try it in her circle to adopt it as their regular family medicine. That "stuff" is Hop Bitters.

\$500 Reward.

was for years offered in every paper of the land by the former proprietor of Dr. Sage's Catarrh Remedy for a case of catarrh which would not cure by its mild, soothing, cleansing and healing properties. Snuff or dust of any kind drives up catarrh and drives it to the lungs. This remedy has stood the test of time, having been a popular remedy for a quarter of a century. Sold by druggists at 60 cents.

A CARD.

To all who are suffering from the errors and indiscretions of youth, become weak and early decay, loss of manhood, &c., I will send a receipt that will cure you, rank of CHAMBERLAIN. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. JOSEPH T. INMAN, Station D, New York City.

How it is Done.

The first object in life with the American people is to "get rich"; the second, how to regain good health. The first can be obtained by energy, honesty and saving; the second, (good health), by using Chamberlain's Flower. Should you be a despondent sufferer from any of the effects of Dyspepsia, Liver Complaint, Indigestion, &c., such as Sick Headache, Palpitation of the Heart, Stomach, Habitual Constipation, Dizziness of the Head, Nervous Prostration, Loss of Sleep, &c., you need not suffer another day. Two doses of Chamberlain's Flower will relieve you at once. Sample Bottle 10 cents. Regular size 75 cents. Putatively sold by all first-class druggists—Jas. Clark & Co., and L. W. Vonnegut.

Advertising Cheats.

It has become so common to write the belated and uninteresting article and then run it into some advertisement that we avoid all such cheats and simply call attention to the merits of Hop Bitters. Plain honest terms as possible to induce people to give them a trial, as no one who knows their value will ever say anything else.

A Wonderful Discovery.

For the speedy cure of consumption and all diseases that lead to it, such as asthma, cough, influenza, colds, bronchitis, Hay Fever, Asthma, pain in the side and chest, dry hacking cough, looking in the throat, Hoarseness, Sore Throat, and all chronic or lingering diseases of the throat and lungs, Dr. Kline's New Discovery has no equal and has established for itself a world wide reputation. Many leading physicians recommend and use it in their practice. The formula from which it is prepared is highly recommended by all medical journals. The story and the press have complimented it in the most glowing terms. Use it to your drugist and get a trial bottle free of cost or a regular size for \$1.00. For sale by JAS. CLARK & CO.

HUCKLEBERRY'S AFRICA HAIR.
The Best Scent for the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chills, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by Jas. Clark & Co.

"TANNERY," the newest wonder for whitening the teeth, is highly recommended by the dentist. To try it is to become a friend to the pleasant, irresistible, popular Dentist of the day.

DIED.
In Belleville on Thursday the 15th inst. PHILIPPA, only daughter of A. Ellis, aged 20 years and 3 months.

[The funeral will take place on Sunday, the 18th inst. from the family residence, Station Road, at 3 o'clock p. m. to St. George's Church, thence to the cemetery by road.]

Commercial.

Superintendent.

MANHOOD:
HOW LOST, HOW RESTORED.

We have recently published a new
edition of Dr. Culverwell's Celebrated
Essay on the medical and personal
causes of Manhood, and its restoration.
It is a complete and practical
treatise on the subject, and is
impregnable to marriage, etc., resulting
from excess.

From a single envelope, only 6 cents,
or two postage stamps.
The celebrated author, from thirty years'
experience, clearly demonstrates, from
successful practice, that alarming
consequences may be safely cured without the
dangerous use of internal medicine or the
application of the knife; pointing out a mode
of cure at once simple, certain and effectual,
by means of which every sufferer, no matter
what his condition may be, may cure himself
cheaply, privately and radically.

At this lecture should be in the hands of
every youth and every man in the land.

Over 100,000 cases successfully treated since
the establishment of our Institute in Detroit,
Michigan.

ON THE INFLUENCE OF GOLD IN THE PRO
DUCTION OF DISEASE OF THE LUNGS AND
ON THE COMPARATIVE MERITS OF THE
TREATMENT.

The state of the atmosphere improves itself
directly on the mucous lining of the nasal
passage, throat, windpipe, bronchial tubes, and
cells of the lungs. Sudden changes in the tem-
perature of the air are immediately felt over the
whole of the extended surface. Coldness and
humidity render the air irritating to the mucous
membrane, and thus produce congestion and
inflammation is the first stage of inflammation—the
parent of all those chronic catarrhal affections
of the nose, throat, and lungs, which finally
terminate in consumption.

Nearly eighty per cent. of the cases of con-
sumption, of which disease is the most common
of the human race, are caused by the disease of
the mucous membrane of the nasal passage, throat
and bronchial tubes produced by cold. To that
extent, therefore, coldness of the air, directly
from the damp and changeable weather of
autumn and winter.

It is a rule of medical practice, established by
ages of experience, that every disease which is
local—that is to say, is seated in any one of
the organs of the body—requires for its cure the
direct application of remedies to such organ or
part. When this rule is followed, the disease is
generally curable, and when it cannot be done
it is, if generally fatal.

The mucous membrane is spread over the globe of
the eye, the line of the ear passages and internal
surface of the nose, the entire surface of the
throat, the windpipe, and becomes the lining of the
delicate and immovable air cells of the lungs.
When coldness and humidity of the air are in-
haled, the mucous membrane of the eye, the
nose, the throat, and the lungs, become inflamed,
and acute catarrh of the head in general, and
of the nose, the throat, and the lungs, and the
membrane of the lungs in another, there is no differ-
ence in the disease in the two cases, and in the
principles of treatment required for their cure.

But look at the practical difference of the
same membrane widely different, and as a con-
sequence, cure one and utterly fail to cure the
other, directly they apply eye-washes and are
nothing to the inflamed parts and are generally
fatal to the diseased parts, and catarrh is
consequently a disease which is incurable.

It is a rule of medical practice, established by
ages of experience, that every disease which is
local—that is to say, is seated in any one of
the organs of the body—requires for its cure the
direct application of remedies to such organ or
part. When this rule is followed, the disease is
generally curable, and when it cannot be done
it is, if generally fatal.

The mucous membrane is spread over the globe of
the eye, the line of the ear passages and internal
surface of the nose, the entire surface of the
throat, the windpipe, and becomes the lining of the
delicate and immovable air cells of the lungs.
When coldness and humidity of the air are in-
haled, the mucous membrane of the eye, the
nose, the throat, and the lungs, become inflamed,
and acute catarrh of the head in general, and
of the nose, the throat, and the lungs, and the
membrane of the lungs in another, there is no differ-
ence in the disease in the two cases, and in the
principles of treatment required for their cure.

But look at the practical difference of the
same membrane widely different, and as a con-
sequence, cure one and utterly fail to cure the
other, directly they apply eye-washes and are
nothing to the inflamed parts and are generally
fatal to the diseased parts, and catarrh is
consequently a disease which is incurable.

It is a rule of medical practice, established by
ages of experience, that every disease which is
local—that is to say, is seated in any one of
the organs of the body—requires for its cure the
direct application of remedies to such organ or
part. When this rule is followed, the disease is
generally curable, and when it cannot be done
it is, if generally fatal.

The mucous membrane is spread over the globe of
the eye, the line of the ear passages and internal
surface of the nose, the entire surface of the
throat, the windpipe, and becomes the lining of the
delicate and immovable air cells of the lungs.
When coldness and humidity of the air are in-
haled, the mucous membrane of the eye, the
nose, the throat, and the lungs, become inflamed,
and acute catarrh of the head in general, and
of the nose, the throat, and the lungs, and the
membrane of the lungs in another, there is no differ-
ence in the disease in the two cases, and in the
principles of treatment required for their cure.

But look at the practical difference of the

VERMIN EXTERMINATOR.

DEODORIZING POWDER
The use of this will go far in preventing
fevers, &c. Sold by
L. W. Yeomans & Co.,
CHEMIST AND DRUGGIST,
Front, opp. Hotel St.

Hastings Loan and Investment
Society.

CAPITAL, \$250,000.
Straight loan, at rates as low as any other Com-
pany in Ontario, and for periods of from 2 to
20 years, either on STRAIGHT LOAN or on the
INSTALLMENT SYSTEM.

On the first of the month to fall due at any
season of the year to suit borrowers. No de-
posit in obtaining the money beyond the time
nominally employed in the investigation of
titles.

SPECIAL FACILITIES OFFERED to the farming
community.

MONROE, PUBLISHED.
SIX PER CENT interest allowed on Deposits.
No notice required. Interest paid from date of
Deposit to date of withdrawal.

Office—Front Street, between City Hall
and Bridge Street.
J. T. C. PHILLIPS,
Secretary.

MANHOOD
RESTORED.

Prescription given, for the purpose of curing
all diseases of the male system, and all diseases
of the female system, and all diseases of the
childhood, and all diseases of the old age.
D. V. DUNN & CO., 78 Nassau St., N. Y.

No More Haré Times.

\$50,000.
PRIVATE MONEY to loan at 8 1/2 per cent.
Reasonable charges.

\$100,000.
Company money to loan at 8 per cent, and 9 1/2
per cent, straight loans, interest payable
yearly; principal payable by instalments, or
instalment loans at 5 1/2 per cent.

Is authorized to contract for advertisements in the DAILY and WEEKLY INTELLIGENCER at our best rates.

BELLEVILLE, SATURDAY, JULY 17.

The N. P. and the Millers.

The Globe has had an agent enquiring as to the workings of the N. P. in the interests of millers, and in a letter to that journal under the non descript name of "Inquirer," he states the result of such enquiry to be that the N. P. is doing destructive to the millers. He claims, in the first place, that "the duty on flour being relatively so much lower than that on wheat virtually places a premium of 17 1/2 cents per barrel on the importation of American flour." The duty on flour is 60c per bbl. and on wheat 10c per bushel, which at an average of 44 bushels to the bbl. of flour (which is a large average) makes the relative duty in favor of flour nearly 14c per bbl., not 17 1/2c as stated by "Inquirer." This relative duty in favor of flour is nearly counterbalanced by the privilege that millers enjoy of selling off free of duty. This selling of off free of duty, is claimed by the Globe to be an injustice to the farming community, when at the same time, it holds that the farming community would be benefited were the whole products of American wheat manufactured and sold in opposition to Canadian grain, as would be the case were the flour on imported American grain removed. The Globe says truly that: "The sole reason why our country could not supply the Maritime Provinces under free trade was that the Provinces could not be supplied more cheaply from the Atlantic cities," to overcome which the present duty was placed on flour, and under which "Inquirer claims the millers are not prosperous and asserts they are unable to compete with American millers in the Maritime Province markets. If such is the fact with the present tariff, in what way would the millers' interests be benefited by doing away with that tariff? But instead of it being a fact that flour is not imported from Ontario to the Maritime Provinces, one flour dealer in this city has shipped 7,000 bins of flour to the Maritime Provinces.

market since the imposition of import duties on flour and grain, which never could have been done were not the present protective tariff in force. The Globe makes the sweeping charge: "American wheat still enters into the flour which Canadians consume, and no tax is paid, because the 'grinder in bond' sends his opportunity and exports flour from Canadian wheat discharge of his bond for the duty." The Globe knows, or should know, that the order in Council of April last has done away with the privilege once granted millers of shipping the equivalent of the wheat imported in any kind of flour, and that the new Order in Council practically prohibits the mixing of flour manufactured from United States wheat with Canadian flour, without paying duty, as the manufacturer of flour from foreign wheat is compelled to make an affidavit that the flour exported is the product of the wheat imported. It may be, as the Globe says, that the N. P. will not last, after there is a chance to repudiate it, but to accomplish that end the country will require more convincing proof of its inability than the famous Globe argument that under the N. P. the prices of the necessities of life have increased, and at the same time the price of grain is lower than it would be were the import duty removed.

The True Policy.
The Peterborough Review says: "Under the head 'Our Custom Laws,' in his letter of acceptance, General Garfield says, 'A policy should be pursued which will bring revenue to the Treasury, and will enable the labor and capital employed in our own markets to compete fairly in our own markets with the labor and capital of foreign producers. We legislate for the people of the United States, not for the whole world. * * * Our country cannot be independent unless its people possess the requisite skill at any time to clothe, arm and equip themselves for war, and in the time of peace to produce all the needs, and implements of labor.' That, judiciously put in practice, summarizes the true customs policy of any country, and it is just what the advocates of the National Policy in Canada are now endeavoring to carry out.

SUGAR IMPORTS.—The Halifax Herald says: The annual statement of the quantity and value of sugar imported into the port of Halifax, shows the following most satisfactory condition:

Year ended July 31st, 1879. Quantity, value. 1879-80 1,000,000 lbs. \$1,000,000. 1880-81 1,200,000 lbs. \$1,200,000. This shows an increase in the last year of close upon 100 per cent, in value over the imports of the year 1879, and nearly 110 per cent, over the year 1878.

THE Oka TRAIL.—The case against Mathias Simon in the Oka trail was given to the jury yesterday, but at latest accounts no verdict was returned. Another prisoner was put on trial, and by a bit of strategy on the part of counsel for the defence, a jury of twelve Protestants was empaneled.

Old Times in the Bay Country.

The following interesting communication appears in the last issue of the Trenton Courier:

Mr. Editor:—In the historical account of Trenton, recently published in the Trenton Directory and local papers, mention is made of my father as one of the pioneers in this locality. Perhaps it would not be uninteresting to give my recollections as well as those of the early settlers whom I have associated with the matter.

Adam Henry Meyers was born in a Hanoverian town in the year 1780, and died in May, 1852. He came to Canada and settled at Meyers' creek, near Belleville, in 1800 or 1805, and opened the first store there, not large but suitable to the wants of the place. In January 1807, he married Mary H. Wallbridge, daughter of Elijah Wallbridge of Amherstburg. He did not find at Meyers' creek the facilities for business that his energetic temperament required, so he came to Trenton, then River Trent, and he purchased from Eliakim Waller, lots 2 and 3 on the west side of the river in the township of Murray, now incorporated in the Town of Trenton. Here there was a sawmill and a log house on these lots at that time, on the stream that now drives Billings' Mill on the river brink. He brought goods with him and laid the foundation of the mercantile business here. In 1809 or 1810, he built the first frame house on the site of the hill close by, oldest in Trenton and still habitable. About this time he built the first mill, a great boon to the early settlers. Previous to this they had to take their grain to Stone Mills I think. Two or three neighbors would club together and load a log canoe to get there. There was no other way, and it usually took four days going and coming. The only road was the Indian trail or bridge path. All travelling was on foot, horseback, bark or log canoe, or by bateau or Durham boat. When my father had occasion to send a letter or papers or deeds to a distant place, Toronto, to be recorded or to draw money he always employed Mr. Mayhew (father of the present John M. Flindall, Esq.) who was made the journey on horseback. My father was instrumental in opening the first roads in this vicinity. There were no schools except some travelling dominies would engage for a time. Mr. John M. Flindall, just out from England, father of the present John M. Flindall, Esq., was engaged to instruct our family and a few neighbors' children, in my father's dwelling. In the latter part of his life my father engaged extensively in lumbering. He built a saw mill alongside of the grist mill. Although a stranger without friends, or relatives and speaking the English language imperfectly, his first commission as Esquire is dated June 26th, 1810; Sir Francis Gore being then Lieutenant Governor of Canada. His commission as Lieutenant is dated 1816, and his Captaincy is dated 1820; Sir Peregrin Maitland being Lieut. Gov. In 1818 or 1819 he built the first two story house and store, where the Queen's Hotel now stands. About this time the first steamer, "Charlotte," made her first visit to Trent Office was opened here. Mr. Sheldon Hawley being Post Master. I am afraid I am trespassing on your space or I could write more and will conclude with an account of the oft mentioned "Stone House." In 1800, James Smith, Esq., of the Township of Canajoharie, County of Montgomery, State of New York, drew lots 1, 2 and 3 on the east side of the river Trent. He sold part of lot 2 and 3 to Henry Ripson, of the Township of Murray, in the year 1820. Ripson having an indenture for purchase dated 1810, Ripson sold to Johnathan Fairfield of Earnestown in 1822. In 1824 Fairfield sold to Job Barden and in 1825 Barden sold to my father. The Stone House so often referred to as a landmark, was built either in 1814 or 1815, and came into my father's possession with the land in 1825, as I am the present owner.

Royal Arch Masons.

ANNUAL MEETING OF THE GRAND CHAPTER OF THE ROYAL ARCH MASONS OF CANADA.

GUELPH, July 16.—The Grand Chapter of Royal Arch Masons of Canada met here this morning. Most Ex. Com. Daniel Spry, Grand First Principal, presiding. Nearly all the chapters in the jurisdiction were represented. The meeting was held in the Masonic Hall. The chapter being duly opened, the Grand First Principal read his annual address, which was ably written and instructive to members of the craft. The following have been elected officers of the Grand Chapter for the ensuing year:

Daniel Spry, Barrie, re-elected Grand First Principal.
Donald Ross, Picton, re-elected Grand Second Principal.
Judge Henry McPherson, Owen Sound, re-elected Grand Third Principal.
J. Ross Robertson, Toronto, Grand Scribe N.
E. Mitchell, Hamilton, Grand Treasurer.
Dr. J. E. Tamblay, Wingham, Principal Sojourner.
E. H. Hall, Peterboro', Grand Registrar.
W. W. Sommers, Hamilton, Grand Janitor.

The following were elected Grand Superintendents of Districts:

Toronto, J. C. Burns, of Toronto.
Hamilton, Gavin Stewart, of Hamilton.
Ottawa, John Moore.
Wellington, John McLaren, of Mount Forest.
Niagara, F. W. Coy, of St. Catharines.
London, W. Hawthorne, of London.
Windsor, C. L. Beard, of Woodstock.
Huron, J. C. Burns, of Port Hope.
Ottawa, C. Dobler, of Port Hope.
Prince Edward, J. Smith, of Belleville.

The following are the members of the Executive Committee:

Elect—Henry Robertson, of Collingwood; J. M. Meakin, of Hamilton; Thos. Sargent, of Toronto; W. Forbes, of Grimsby; J. J. Mason, of Hamilton.

Appointed—A. G. Smyth, of London; J. B. Nixon, of Toronto; T. O. McNabb, of Hamilton; R. Maitland, of (Guelph); Rev. St. George Leitch, of Windsor.

The Grand Chapter meets in Hamilton next year.

News Condensed.

The prospects of a good harvest in Germany have greatly improved of late. The weather throughout England is wet, unseasonable, and unfavorable for the crops. Metals are to be given to British soldiers for distinguished action during the Zulu war.

It is not expected that Greece will be able to cope single-handed with the Albanians. The strikers on the Credit Valley Railway have resumed work on being paid their wages for April and May.

Rev. Mr. Mackenzie has appealed to the House of Lords against the order suspending him for three years. The Forest fire is raging along the line of the St. John & Maine and E. N. A. Railway, through to the Mattawan, N. B. Kennedy & Sons found, Owen Sound Out, was destroyed by fire on the 15th. Loss, between \$7,000 and \$8,000. An English firm offered Mr. Thomas Reynolds \$800,000 for St. Lawrence and Ottawa Railway.

The steamer *Behonien*, which damaged the *Lochiel* in a collision with the stocks and is expected to be aloft again in the course of nine or ten days.

The Albanians have begun a sort of Guerilla war upon the Montenegrins. In one attack they carried off thirteen Montenegrin heads, and twenty-eight Montenegrins. In the election for Lieutenant for member of Parliament to succeed Mr. Dyott, Conservative, was returned by 578 votes, Sir John Swinburne, receiving 544.

It is announced that the King and Queen are about entering into consideration and bestirring themselves in a matter of great importance known as the United States of Peru and Bolivia. It is estimated that 140,000 barrels of oil were burned in the Bradford, Pennsylvania region as the result of the firing of tanks and wells by lightning during the recent storm. The total damage reaches \$500,000.

If you see a man on the street, with a cabbage leaf in his hat, a bottle of "sun mixture" in his hand, a life preserver on his arm, and two or three boxes of salve, warrant to cure scalds and burns, in his coat pocket, the Boston Globe says you can just bet your pig, that he is going on an excursion.

MORNING DESPATCHES.

EUROPEAN.

LONDON, July 17.—A correspondent at St. Petersburg believes the Russian Government determined some time since to appropriate a considerable sum for the enlargement of the fleet. It is believed that a powerful American syndicate is willing to help the Government.

ROME, July 17.—In the Chamber of Deputies yesterday Peruzzi asked the Ministers if they had considered judicially what effect an increase on marble imported into the United States, would have upon Italian commerce. The Premier stated that the Cabinet had called the attention of the United States to the matter and they promised to examine into the question. The United States, he said, had informed him that orders had been issued to give greater facilities to the importation of Italian marble.

NEW YORK, July 17.—The census shows the population of New Jersey to have increased from 907,479 in 1870 to 1,103,000.

Seventy per cent. of the sugar refiners of the country have signed an agreement to apportion and limit the production of refined sugar. The object is to keep up prices.

The cabin lists of passengers on five steamships, which sail for Europe early in August, are as large as any for the past two months.

THE WIMBLEDON MEETING.

Several Canadian Racers in the List of Prize-Winners.

(By Cable to the Globe.)

The weather at Wimbledon yesterday and to-day was unfavorable for good shooting. There were occasional heavy showers and thunderstorms, and the atmosphere was close and very hazy, so that it was some times impossible to see the target at the first range. The competition for the Queen's Cup has been decided. Baillie and Graham, of the Canadian team, made 89 points each, and they won £4. Ogg made 88 points, and won £3. Stenhouse made 87 points and Sargison 86, winning £2 each in the Glen Albany competition.

Mill made 33 points, winning £4 and Wilson 32 Mill Price, and Sargison and Wilson 32 points each, winning £4 and £3 respectively. In the unbroken competitions the Canadian have made good scores, Gray making the highest possible score for the first series of extra prizes. Sir Garnet Wolseley will visit the camp to-morrow and inspect the team.

THE VACANT CONSTITUENCIES.—Warrants have been received by the Clerk of the Crown, at Ottawa, for elections in North Ontario and Selkirk, but writs have not yet been issued.

Lost.

Twenty-five words under this head 25 cents first insertion. Each additional insertion 10 cts.

LOST, on the morning of the 16th, between William Street and the Montreal Bank a large containing a quantity of money. The finder will be rewarded by leaving it at this office.

Wanted.

Twenty-five words under this head 25 cents first insertion. Each additional insertion 10 cts.

WANTED.—Six Shirt Makers wanted immediately at the Belleville Shirt Factory. A. E. Fish & Co.

For Sale or to Let.

Twenty-five words under this head 25 cents first insertion. Each additional insertion 10 cts.

FOR SALE, TO LET, or to trade for good farm property—Two desirable brick houses two stories high on Main Street, Belleville. For further particulars apply to Ellis Laugman, Esq., on the premises. 624d

TO LET.

THAT commodious store formerly occupied by Mr. John Cook as a grocery, next door to Messrs. L. W. Yeomans & Co's, drug store. Apply to

T. LOCKERTY, Tobaccosmith, 2 doors north. 4 d.

To Whom it may Concern.

I HEREBY forbid any person or persons contracting any debts with my wife or family on my account, as I will not be responsible for the same after this date.

GEO. MOORMAN, Belleville, July 17, 1880. 65d3b

SPECIAL NOTICE.

I HAVE just received a large consignment of valuable pictures comprising an exceptionally fine collection of choice steel engravings and oil paintings, also imported French, German and English chromes and works of art—being the largest and most valuable selection of pictures ever exhibited for sale in this city. The goods are on exhibition in the store lately occupied by T. A. Oliver in the Robertson Block. I will sell the private sale and at public auction for a few days only. This is a rare chance for purchasers, as the goods must be sold, as the owner is removing to the United States.

Belleville, July 17. 65d3b

RIPE TO MATURES.

PEACHES.

AT HUGH WALKER'S.

V. R. AUCTION SALE

UNCLAIMED GOODS

AT Custom House, Belleville.

The steamer will leave as usual at 4 and 7 p. m.

Tickets 25 cents. 6014

PRIVATE FUNDS TO LOAN.

A LARGE amount of private funds has been placed in the hands of the subscribers to

Lend Upon Security

OR REAL ESTATE, at the lowest rates of interest, and upon terms to suit borrowers.

BELL & PONTON, July 15, 1880. 65d3b

VALUABLE MILL PRIVILEGE

AND Premises for Sale.

THE subscribers offer for sale one of the best Mill sites and water privileges on the River Moira, just outside the limits of the City of Belleville, a few rods from the Grand Trunk Railway station. The main travelled road from Belleville to the northern townships and villages runs through the premises, leaving three acres on the west side, embracing canal, excavated at a large outlay, 450 feet long, 25 feet wide, and 10 feet deep, with water from foundation walls of over 100 feet long, two walls 4 1/2 ft. thick; foundation depth 6 feet, with necessary openings for six water wheels. Ten feet below water, with the sluice right to use the further shore for damming, giving the sole right to this magnificent water power at any point is a length of 150 yards on the river. Any amount of water-power available nine months in the year, and from 30 to 40 horse-power the rest of the year. On the east side of the road are six and a half acres of land, capable of being laid out in building lot or being used in connection with extensive milling or manufacturing for yard purposes, or both. The above is one of the most valuable properties of the kind ever offered for sale in this Province. For terms and particulars apply to

BELL & PONTON, Vendor's Solicitors.

Belleville, July 16, 1880. 65d3b

To Let or For Sale.

A ROUGHCAST HOUSE on Lewis Street, with an acre or ground, with orchard, and hard and soft water, etc.; next to house occupied by James Ross, Esq., Licensee Inspector. Apply to

BELL & PONTON, 65d3b

TO LET.

THOSE premises on Front Street, in the City of Belleville, lately occupied by Alexander Morrison as a Boot and Shoe Store, first door north of Robinson's Bookstore. Apply to

MESSRS. BELL & PONTON, Barristers, &c. Belleville, May 1st, 1880. 65d3b

RIPE TO MATURES.

GENTLEMEN!

INSURE YOUR LIFE IN THE

ONTARIO MUTUAL LIFE ASSURANCE COY.

OF WATERLOO, ONT.

GOVERNMENT DEPOSIT—\$56,224.00

FULL RESERVE—\$149,000.00

WHICH INCREASES EVERY YEAR.

Policyholders are not liable to assessment as the rates are on a CASH BASIS and self-sustaining.

It is the CHEAPEST COMPANY, because there being no Stockholders, all the profits go to the Policyholders, which reduces their payments annually after the first three years.

EXAMPLE

Thomas Little, of Galt, in the County of Waterloo, insured in this Company in 1873 for \$2,000, at the age of 34. His payments annually for first three years:

3 years was \$48.00

4th " " 43.20

5th " " 35.91

6th " " 31.49

7th " " 26.57

8th " " 24.20

The above results show the advantages of insuring in this Company.

S. BURROWS, Gen. Agent, Belleville.

OFFICE—Ashley's Block, next door Bank of Commerce.

Daily Intelligencer.

BELLEVILLE, SATURDAY, JULY 17.

Local Notices.

Notice under this head does not incur any fee. After insertion 5 cts. a line.

Old clothes made to look new coats, vests and pantaloons. R. I. tell you, Ladies, it is no joke. I can clean your dresses or your cloaks. Campbell St. Dickson's old stand.

One lady says to another. How can you afford to put on a new pair of gloves every time you go out? She answers (in a low tone of voice). They are not new, I had them cleaned at Prof. Smith's, Campbell St. And the other lady went right away to Campbell St. to have her's made new. 591

City and Vicinity.

IRON ONE.—Three cars of iron ore arrived this morning from Madoc.

FOR THE NORTH-WEST.—A surveying party for the North-west will probably leave here in a few days.

BIBLE CHRISTIAN CHURCH.—Sermon to-morrow evening on the training of children by the pastor of the Church.

FAREWELL SERMON.—The Rev. A. O. Connor, who has resigned the pastorate of the Congregational Church, will preach his farewell sermon to-morrow night.

BARLEY.—Some of the barley which was nearly ripe has been slightly discolored by the recent rains, but the great bulk of the crop has been largely benefited.

A WARNING.—The Police Magistrate instructed the police this morning that in future all persons found in houses of ill-fame should be brought before the court.

POCKET PICKING.—Mrs. Robt. Emerson, of Huntington, notified the police that her pocket had been picked in the market this morning of a purse containing between \$10 and \$11.

THE MARKET.—Farmers are so fully occupied with harvest work at present that the attendance at the market has fallen off somewhat. The square was, however, well filled this morning.

EXCURSIONS.—Remember the excursion this evening by the steamer *Alexandra*, in aid of St. Thomas' church organ fund.

The excursion to Rochester, per steamer *Hastings*, is to occur on Wednesday next, when the boat will leave here at 5 a. m.

POISON.—The police made a raid on all the houses of ill-fame in town last night and captured eighteen of the inmates. The parties were this morning brought before the Police Magistrate and will doubtless be made to contribute liberally towards the city's funds.

CRICKET.—The match between eleven of the Cricketer Club and eighteen all-comers, played yesterday afternoon, resulted disastrously for the eleven, which it may be said was by no means the first eleven. The eighteen made 105, and the eleven made 67.

RAIN.—There were two rainbows visible at one time in the eastern sky at about 6 o'clock yesterday evening. The inner one was particularly brilliant, but was the first to disappear. These celestial phenomena, when seen in the later part of the day, are precursors of fine weather.

OUR.—The *Napoleon* steamer says: "We regret to have to record the death of Mrs. Bogert, of Brockville, mother of Rev. Rural-Dean Bogert, Napawan, and Rev. D. F. Bogert, Selby, at an advanced age, which event took place at her home on Saturday last. She was a lady highly respected, having lived a long and useful life, and her decease, though not unexpected, will be deeply mourned by a large circle of friends." The deceased was a grand-parent of Mr. Curtis Bogert, of this city.

IRON MINING.—The Madoc Review says: "Nothing has been done in iron mining in this district for some time, with the exception of the Seymour mine, from which shipments have been made regularly. We are informed, however, that work will be commenced on Monday at the Dominion mine. Mr. Mun, son commenced work at the Seymour mine last week, but owing to some difficulty with regard to freight rates to Belleville, operations were discontinued this week. Mr. Coe is the manager of the mine, and the following forms as that they expect to have the *Hemlock* mine running again in the course of a few weeks."

SUDDEN DEATH.—Mr. James Henderson, son of George E. Henderson, Q. C., died very suddenly at about 4 o'clock this morning from hemorrhage of the lungs. Deceased, who was about 30 years of age, had been in rather poor health for the last two or three years, during which time he had been subject to pleurisy. He went home last night in his usual health, and seemed even more than ordinarily cheerful. The fatal attack occurred about the hour named, and before Dr. Burdett, who was at once sent for, could arrive, the patient had expired.

THE REVEREND.

16th says: "The Prince Edward Rifle Association will hold their original challenge to the 40th of the Belleville Rifle men, which was for a team of eight or ten men from their Association with the like number selected from the 40th, or any riflemen in the city of Belleville, to be fired at Pictou as arranged between Capt. Harrison, of Belleville and W. Hovard, of Pictou."

LITERARY LIVING AGE.

The number of *The Living Age* for the week ending July 10th and 17th respectively, contain the following articles: The Development of Buddhism in India, *Fortnightly*; Suicide, and the Reformation of Sheepfold, *Blackwood*; What Shakespeare Learnt at School, and Diamonds, Natural and Artificial, *Punch*; A Learned Lady of the Sixteenth Century, and The Sculptures on the Facade of St. Marks, Venice, *McMillan*; Henry David Thoreau, his Character and Opinions, *Cornhill*; College Life and the Emancipation of Russia, *Pall Mall*; Thoreau's Pity and Humor, *Spectator*; and for fiction: "The Guinea Pig," "Drunk in the Streets," the conclusion of "The Crooked Man," and an instalment of "Adam and Eve," with the usual amount of poetry. A new volume began with July 1st. For 52 numbers of 64 large pages each (or more than 3,300 pages a year), the subscription price (\$8) is low; while for \$10.50 the publishers offer to send to any one of the American 44 monthly weeklies with *The Living Age* for a year, including the extra numbers of the latter, both postpaid. Littell & Co., Boston, are the publishers.

Madoc Notes.

P. Gillem, an old and respected resident of this place, died (Saturday) morning at 6 o'clock, after two days' illness.

Trenton Correspondence.

Mr. Ross Cunningham has fitted out his yacht *Surprise*, and on Friday he took a sail around the bay. It is proposed to take a cruise over to Oswego.

Mr. Robt. Cunningham's 55 ton sloop yacht *Bloodhound* was launched last Tuesday, and has a number of men putting on the rigging. She will take part in the regatta at Oswego.

Messrs. Rathbun & Son, of Mill Point, have purchased Messrs. Storehouse and wharf here. It is intended to erect a grain elevator and coal sheds for their increasing business.

Messrs. Workman and Thomas, the President and Cashier of Molson's Bank of Montreal, are in town and have decided to locate an agency here. It is proposed to build a brick addition to the residence of Joe S. Ryan for the purpose, and use the dwelling for the manager. It is on Ferry St., opposite St. Lawrence Hall, which is in the centre of the business portion of the town.

The item in this week's *Advocate*, respecting the interruption of traffic during the building of the new swing bridge here, is not correct. At present, Mr. Russell, one of the contractors, is preparing the approach for the stone pier, and the bridge will remain during the construction of the pivot pier. The only interruption will be during the laying of the iron superstructure, that will be only for ten days in the month of August, when a steam ferry will be placed on the river. The iron swing bridge will be completed by the first of September.

Messrs. Gilmore & Co. are preparing to erect this summer five more dwelling houses for the use of their employees. The staff is increased to 300 men, with both mills running night and day.

Burling Correspondence.

The Grand Junction Railway Company must be doing a thriving business at present, judging from the amount of traffic to and from this station. The quantity of agricultural implements arriving is simply enormous. I doubt very much if another place (with greater pretensions) anywhere in these parts has done the business in this line that Stirling has done, some 150 having been disposed of in this locality, besides what have been distributed from the front, and yet in driving through the country scarcely a farmer is to be seen without machinery.

Mr. Thos. Pearson, of Marmora, is shipping a large quantity of sawn lumber from this point by rail, some four cars being shipped to-day. This is conveyed by wagon from Marmora.

Your correspondent is informed by a Government inspector that it is the intention of the Government to repair the locks at Chisholm's rapids at once, and that plans and specifications have been prepared for the erection of power mills at that place by Mr. Clement Armstrong. Possibly this may be the commencement of something of greater importance to Trent navigation.

Yesterday was appointed for a trial of reapers and mowers, on the farm of L. G. Baker, the winning parties to have a gold and silver medal presented by A. & T. Chard, but as there were scarcely any entries the competition was put off. Very few farmers were in to witness the match, the cause no doubt being the push of harvest, as the grain is ripening so rapidly the past few days.

GRAND TRUNK RAILWAY RECEIPTS.

The traffic of the Grand Trunk Railway continues to increase at a rate which must prove very satisfactory to the company and its managing authorities. The following is the report of traffic for the week ending July 10th, 1880, and of the corresponding week of last year:

Passenger.	Freight.	Total.
1879..... 897,367	\$119,898	\$187,250
1880..... 61,199	\$41,198	145,327

Increase in 1880..... \$41,928

The Riviere du Loup receipts are included in 1879, not in 1880, adding them \$4,200, the week's increase is \$40,128, and the aggregate increase for two weeks is \$94,637.

A Dublin correspondent says that inquiries show the character of the fever in some parts of Mayo is much exaggerated. It is ordinary typhus and the deaths are very few.

Marine.

The tug *Stearhead* left yesterday morning with a tow of saw logs for Mill Point.

The *Wing of Friday* says: "Yesterday afternoon, while backing out of Pictou harbor, ran upon a sunken pier and broke her rudder pin. When she arrived here she had a tow pin put in. This necessitated her remaining over night. The *Pierpont* took her trip up the Bay."

How the N. P. is working.—The fiscal returns of the United States show how the N. P. is working in this country. The decrease of goods exported to Canada has fallen off during the last fiscal year so much as to threaten (on United States papers say) to soon reduce the balance of trade in their favor to a mere fraction. The falling off is in free goods of \$6,831,000 in the fiscal year. The New York Graphic says, "Under the National Policy nearly all the materials now exported to Canada from this country, will soon be produced there."

Fire at Garden Island.

Six Houses Burned.

GARDEN ISLAND, July 17.—A disastrous fire took place this morning in Fancy Street. Six houses were burned to the ground. There were eight families in the houses. Most of their furniture was saved. Total loss, between \$3,000 and \$4,000. No insurance.

AFTERNOON DISPATCHES.

CONSTANTINOPLE, July 17.—The British Ambassador has called the attention of the Porte to the bad impression created generally by the appointment of the new war minister. The ambassador considers the recent hostilities of the Albanians and Montenegrins were immediately the result of this nomination.

LONDON, July 17.—A Berlin despatch says that if the Powers unanimously agree to make a naval demonstration in Turkish waters, Germany will send an ironclad frigate.

The victory of India has telegraphed that in an engagement between Gen. Burrows' force and the infantry who deserted from Sher Ali, the British appointed Wal of Candahar, the loss of the mutineers was 40 or 50. The British loss was one killed and 12 wounded.

Gun and wagons taken by the mutineers were brought back to camp.

WEATHER REPORTS.

TORONTO, July 17.—Probabilities for the next twenty-four hours: for the lower lakes, fresh to brisk westerly to northerly winds, fine and continued cool weather.

WASHINGTON, July 17.—Indications: lower lakes partly cloudy, stationary or higher temperature.

From the Hub.

There is perhaps no tonic offered to the people that possesses as much real intrinsic value as the Hot Bitters. Just at this season of the year, when the stomach needs an appetizer, or the blood needs purifying, the cheapest and best remedy is Hot Bitters. An ounce of prevention is worth a pound of cure, don't wait until you are prostrated by a disease that may take months for you to recover from.—Boston Globe.

\$500 Reward.

was for years offered in every paper of the land by the former proprietor of Dr. Sage's Catarrh Remedy for a case of catarrh it would not cure. It cures by its mild, soothing, cleansing and healing properties. Suffer or dust of any kind drives up catarrh and drives it to the lungs. This remedy has stood the test of time, having been a popular remedy for a quarter of a century. Sold by druggists at 50 cents.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c., I will send a recipe that will cure you, free of charge. This great remedy was discovered by a chemist in South America. Send a self-addressed envelope to the Rev. JOSEPH T. LEAHY, Station D, New York City. 4eod&wly

Arrive from Stirling, Campbellford and Hastings at 10:30.
Trains are run by Belleville time.
E. H. BRENNAN,
Superintendent.

MANHOOD.

HOW LOST, HOW RESTORED.
We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the medical and pathological conditions of the Nervous System, Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excessive sexual indulgence.

Price, in a sealed envelope, only 50 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' medical practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

This Lecture should be in the hands of every youth and every man in the land.
Address:
THE CULVERWELL MEDICAL CO.,

(Graduate of Victoria College at Toronto, and Member of the College of Physicians and Surgeons of Ontario.)
PROPRIETOR.
(PERMANENTLY ESTABLISHED SINCE 1870.)
Over 10,000 cases successfully treated since the establishment of our Institute in Detroit.
ON THE INFLUENCE OF COLD IN THE PRODUCTION OF DISEASE OF THE THROAT AND ON THE COMPARATIVE MERITS OF THE DIFFERENT PLANS OF TREATMENT.

The state of the atmosphere impresses itself directly on the mucous lining of the nasal passages, throat, windpipe, bronchial tubes and air-passages, and the change in the temperature of the air is immediately felt over the whole of this extended surface. Coldness and moisture, which are the elements of disease, produce local irritation, ends in congestion, and congestion is the first stage of inflammation. The parent of all these chronic catarrhal affections of the nose, throat, and bronchial tubes which vitiate and consume the human system.

Nearly eighty per cent. of the cases of consumption begin by congestion of the mucous membrane of the nose, throat, and bronchial tubes produced by colds. To that extent, therefore, consumption is a preventable disease, and it is preventable by the use of the proper treatment. It is inflammatory and is generally curable, and it is curable by the use of the proper treatment. It is the inflammation of the eyes or quins of the throat, and must be treated in the same direct manner.

It is a rule of medical practice, established by ages of experience, that every disease which is local—that is to say, has its seat in any one organ or part of the body—must be treated by direct application of remedies to such organ or part. When this rule is followed the disease is generally cured, and it is cured by the use of the proper treatment. It is the inflammation of the eyes or quins of the throat, and must be treated in the same direct manner.

REMOVAL.

J. E. EAKINS, M.D., has removed his office and residence to Corner Hotel and Church Street.
Belleville, April 30, 1880

DOMINION IRON LADDER WORKS, KINGSTON.

Patent Iron Ladders with Fire Escape attached.

THE subscriber has been manufacturing the above ladders with the fire escape, attached for a number of years past, and placed them on the best private residences, several churches, on all public schools, hotels, banks, hospitals, charitable institutions, county buildings, military colleges, and other Government buildings in Kingston and Ottawa.

In this city I have placed my ladders on the private residences of John Bell, Esq., W. H. Patton, Esq., T. S. Carson, Esq., T. C. Wall, Esq., and the factory of Ed. Durand, Esq., the Roman Catholic Church, and Covert's Bakery, and have placed them on the best of the do to by leaving their orders at the hardware store of James Smith (late Gillen & Kane, old stand), where they will see sample of ladders, and testimonials from parties who have used them.

I place my ladders on the building, with Fire Escape attached, firmly fixed and painted, for 40c per running foot.

All orders promptly attended to.

GRAND JUNCTION AND BELLEVILLE & NORTH HASTINGS RAILWAYS.

ON and after Tuesday, June 1st, 1880, Trains will run daily as follows:—
Leave Belleville at 3 p.m. for Mafo and way stations.
Leave Belleville for Stirling, Campbellford and Hastings, at 3.30 p.m.
Arrive from Hastings, Campbellford and Stirling, at 10.30.
Trains will run daily as follows:—
E. H. BRENNAN, Superintendent.

MANHOOD.

HOW LOST, HOW RESTORED.
We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical cure of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excess.
Price, in a sealed envelope, only 6 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which any sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.
Address
THE CULVERWELL MEDICAL CO.,
41 Ann St., New York,
Post Office box 4586.

BELLEVILLE, TUESDAY, JULY 20.

A Prospect to be Realized.

One of the principal inducements held out by the promoters of the Grand Junction Railway, when the scheme for the construction of the line was revived some years ago, was that the road would certainly become a great through route for the transportation of grain from Chicago and from our Northwest to the east, in addition to other advantages which the line would confer upon this city as its terminus. The road has had an unfortunate history—its construction has been delayed for years, owing to various causes, but now that it is in the hands of men of energy and enterprise, who are determined to push it forward to completion as rapidly as possible, the prospects of this great enterprise seem of the brightest character. The contractors are hurrying forward the work of construction between Hastings and the town of Peterborough, and will almost beyond doubt redeem their promise that the line shall be completed prior to the 1st of October. This done, there remain but a few miles to be constructed in order to make a direct connection with the Midland when the Grand Junction would be enabled to offer the shortest through route from between Chicago, the Canadian Northwest and ocean navigation at Montreal.

We note with much pleasure that the keen, practical, far-seeing business men from Montreal who during last week passed over the route of the proposed Trent Valley Canal, noticed and much impressed with the great advantages to shippers in the west of grain and lumber which the Grand Junction would present, if once connected with the Midland. The *Globe's* correspondent who accompanied the party, and who has very minutely detailed the movements and conversations of the deputation, states in his letter which appeared in Saturday's issue of this journal:

"The prospects of Midland City's harbor form a theme of much conversation. The impression conveyed by the party was that of a communication in entirely another light—that of railroad communication the Midland Railway on the map, leading from Midland City towards Montreal, the eye strikes Lindsay, skips a space of thirty miles to Peterborough, and then goes on straight to Belleville. While looking over this, a Montreal man returned to remark: 'This is a scheme certain to find more favor in Montreal than even the Trent Valley Canal scheme.' The impression conveyed by the party was that of a communication in entirely another light—that of railroad communication the Midland Railway on the map, leading from Midland City towards Montreal, the eye strikes Lindsay, skips a space of thirty miles to Peterborough, and then goes on straight to Belleville. While looking over this, a Montreal man returned to remark: 'This is a scheme certain to find more favor in Montreal than even the Trent Valley Canal scheme.'"

In his letter published on Monday, the same correspondent says:

"The pretty and serviceable steam tug *Marshall & Murray* was in waiting, and was steaming over the surface of the bay with all on board. It could hardly have been a better day for this to detect the existence of Midland harbor, as a stiff north-west breeze was blowing, and the full sweep of it threw the swell in through the eye of narrow made by the shifting points of the mainland and the island of Quinte, and thence to Montreal. To complete the picture the Montreal delegates say that the harbor of Midland City must be at least equal to Collingwood's, and much of their support will depend upon what they see to-morrow."

Thus the great pre-requisite to the success of the Grand Junction as a through route, namely the safety and capacity of the harbor of Midland City, having been successfully demonstrated, the favorable attention of the capitalists in Ottawa on the one hand, and the enterprise of the firm in a fair way of being enlisted on behalf of securing the construction of that short piece of railway which will make of the Grand Junction and Midland Railways one line for the purposes of through traffic. There is not, as the Montreal gentlemen evidently believe, a link of thirty miles of road to build, at an estimated cost of half a million of dollars. A sufficiently direct communication can be secured by extending the Grand Junction to connection with Midland and Ottawa, at a distance of but thirteen miles, at a cost of less than half the amount named above. Thus there is every reason for their siding in the furnishing of the missing link to complete this new and short connection with Chicago, which they are keen-sighted enough to desire very strongly, and which would be as much to the interest of Montreal as of Belleville, by

securing a large amount of traffic which now passes to the sea by way of the lakes and the Erie canal. We trust that the subject may be pressed upon their attention and that a favorable result may be secured.

In thus advocating the great project above referred to, we must not be understood as doing so in opposition to the Trent Valley Canal. That enterprise has our best wishes for its success, but the railway line will doubtless be first completed, and within a very few years, when the Pacific Railway has been completed between Fort William and Winnipeg, and pushed far out on the fertile prairie, the business to be done will be sufficient for both railway and Canal, though the former will doubtless be first completed. There is and can be no rivalry between the enterprises, and we hope to see both in successful operation within the next few years.

Protection to Life.

The Kingston *Whig* has the following very appropriate remarks under the above heading:—"We are informed that there is a statute to the effect that there must be on every wharf at which passenger steamers call, not only a life preserver to which a long rope is attached, but a pike-pole, and a lifebuoy, which persons who cannot swim may be seized and saved. If such a law exists it is enforced in no place, apparently, but in Toronto, where the city officials feel sufficiently interested to see that reasonable arrangements are made for the protection of life at all points where crowding at or near the water creates a danger. One of the appliances mentioned has been convenient, the water and canoe have been used, but it will be remembered that when the young lady was missed and it was believed, alas! too truly, that she had fallen into the water, much valuable time was lost in procuring hooks with which to grapple for the body. It is to be regretted that such a fatality was required to make men think of the necessity of the law. We observe that additional lights are being erected on some of the wharves. We hope a step further will be taken, and that life preservers, ladders and boat-hooks will be added. It is well to have them, but one can tell what emergency a day may bring forth."

Had the City By-law prohibiting the entrance of cats upon the wharf been enforced—had the wharf been lighted—had even the street lamp, which stood near where the accident occurred, been lit up, Miss Potter's death would not have been lamented by her sorrowing relatives and friends. But one law was broken, and another was set at defiance, the slightest provision for the safety of the public was not taken, and a valuable life was sacrificed. Were the punishment which the law directs inflicted upon the persons who neglected their duty in this case, the proceeding would meet with the approbation of the public.

MINISTER OF PUBLIC WORKS.—The Hon. Hector Langevin, Minister of Public Works, left Ottawa for Toronto on the 19th inst. He will proceed thence to Peterborough and Niagara, 22nd; Chatham, 23rd and 24th; Niagara, 25th; St. Catharines and Hamilton, 26th; Toronto, 27th; returning to Ottawa on the 28th inst.

THREE PERSONS DROWNED.—On the 19th inst., at Atlantic City, N. J., Mrs. Nesmith and her two children, a boy and a girl, were drowned. The bodies of the two children were found on the beach, and the body of the mother was found in the water. The cause of the accident is not yet known.

THE DEATH PENALTY.—Sheriff Jarvis, on the 19th inst. received a letter from the secretary of State notifying him that the death sentence pronounced on George Bennett will be carried out, the Government declining to interfere. The execution takes place on the morning of the 23rd inst.

BARLEY HARVEST.—A Pictou despatch says: "A sample of this year's barley was exhibited in town to-day. It was very bright, and weighed fifty pounds to the bushel. If we have bright, clear weather for the next ten days the greatest part of the barley will be harvested in splendid condition."

RAILWAY ACCIDENT.—On Saturday night as the train from Quebec was passing St. Liboire, it ran over two men and a little boy who were on the track. The body of the boy was found in the "cow catcher" of the engine when it backed up to the scene of the accident. Both men, it is said, have since died.

ABOLISHED.—The Lords of the Admiralty have decided that the "dogcatcher" of the Navy shall be abolished, and have issued instructions to all flag officers and captains that seamen or marines who may be tried by court-martial for an offence punishable with the lash, are to be subjected to another form of punishment.

GOLD MINING.—The *Tanworth Echo* says: "Mr. Thornton's gold mine is still improving. Mr. Thornton has passed down several different kinds of rock, all of which bear gold. There is no doubt as to the certainty of this being a safe mine, and one that will pay well."

CANADIAN TUGS.—The U. S. Treasury Department has decided that Canadian tug boats cannot tow American vessels clearing direct from Chicago to Buffalo. If American vessels clear from one domestic port to another, making actual entry at an intermediate port, a Canadian tug can tow them to such intermediate port.

NOTES BY THE WAY.

How to get to the Sand Banks from Wellington, by a short cut, was a question I have been repeatedly asked, and as newspaper men are supposed to know everything, of course I would not display any ignorance by declining to answer, so I have suggested in some address what to satisfy my questioners. But when I wanted to go I was obliged to put myself in the questioner's place, and showed after all, that I knew very little about it. The steamer *Utica* had been running across Wat Lake, professing to connect with the P. E. Railway, and was withdrawn. There was a carriage road along the beach, which at certain seasons was passable, but at other seasons was submerged at a particular place to the depth of several feet. This particular place is called the "outlet," which is a narrow channel of water, and it was here where the *Utica* had been hauled into the inland water. The distance across this outlet is about two hundred feet, and the depth of water varies according to the season, and to the prevalence and force of the wind, the character of the beach being high and dry, and at others altogether impassable, except by boat. Ascertaining that carriage had recently crossed I was not long in obtaining a driver who knew every inch of the road, and soon we were en-route for the famous Sandbanks. It was a pleasant drive—at least it would have been pleasant had it not been for the dead fish which were strewn along the beach in thousands, the perfume from which was not quite as agreeable to one's olfactory nerves as Lubin's Eucalyptus.

One of the objects of the excursion was to see the famous Sandbanks. It was a pleasant drive—at least it would have been pleasant had it not been for the dead fish which were strewn along the beach in thousands, the perfume from which was not quite as agreeable to one's olfactory nerves as Lubin's Eucalyptus.

and moreover, answered only in money-lender's language, as if the only thing worth serious night happen, so I told Col. Blood about the hogs, and he at once ordered their removal.

In the immediate vicinity of the house there are excellent facilities for bathing, and a plunge into the clear waters of the lake is most refreshing to the pleasure to be enjoyed at the Sand Banks. But of this and other matters more anon.

MORNING DESPATCHES. EUROPEAN.

CONSTANTINOPLE, July 20.—General Skobeleff's mother left home on the 17th inst., in a carriage for Tbilisi with money and medical supplies for the hospital there. She was attacked when half way on the road by armed men. Madame Skobeleff was killed and arrested, and a steward, dressed in women's costume, was taken to the city hall, Belleville, on Saturday evening, 13th August.

PARIS, July 20.—Rochford, in the *Intelligence*, repudiates all idea of laying siege to Gambetta's seat. He does not wish to become Deputy, as the fact when he has been elected, would be the same as in the Chamber, it will be difficult to gradually melt into the same opinion. President Grovy visits the fleet at Cherbourg at the end of this month. This indicates his resolution not to allow Gambetta too much prominence.

A Madrid despatch says that Marshal Bazaine is in precarious health.

BUCHAREST, July 20.—The union of Bulgaria and Roumelia is believed to be imminent.

LONDON, July 20.—The cattle trade representatives yesterday adopted a resolution declaring that the present restrictions on the importation of foreign cattle are arbitrary and unnecessary.

Arthur Arnold, member of Parliament, deprecated the action of the late Government in including the United States among the infected countries, and pointed to the significance of the fact that the importation of cattle from America increased despite the restrictions.

AMERICAN.

NEW YORK, July 20.—The *World's* Washington special says as soon as Capt. Peck, who is in charge of the interior of America, projects of the Nicaragua Canal, returns, there will be a meeting of those interested in New York. Grant will then be formally tendered the position of President of the Company to be formed and steps looking to the early inauguration of the work will be taken.

The *Tribune's* Washington despatch says that Gen. Dumont made a personal inspection of eight of the principal New York excursion steamers alleged to be deficient in life-saving appliances, and found them fully supplied with everything required by law.

Arrived, Devon from Bristol.

SARATOGA, N. Y., July 20.—The railroad board of arbitration are in secret session here to adjust the differences between trunk lines about the distribution of east bound freight from Chicago.

PORTLAND, Me., July 20.—Gen. Neal Dow has written a letter accepting the nomination for the presidency by the National Prohibitory party, in which he says that aside from his bearing upon the moral and religious welfare of the people, I consider the suppression of the liquor traffic to be an object of far greater political importance than any other now claimed by the attention of the country.

WILMINGTON, Del., July 20.—Geo. Lewis, well connected in this city, was yesterday cowhided by Mrs. John McCay because, as she alleged, he abandoned her. Mrs. McCay drove out with her husband to the place where Lewis is employed and her husband held a pistol to Lewis' head while the woman in dicted the chastisement.

FIVE HUNDRED NEW CARS.—The Co. having Car Works received an order at the beginning of this month for five hundred new freight cars for the Occidental Railway. They will be turned out at the rate of five or six a day. This railway is doing a large business, the freight consisting chiefly of hay, grain and phosphate.

Wants.

Twenty-five words under this head 80 cents first insertion. Each additional insertion 10 cents.

WANTED.—A smart office boy. Must write a good hand. Apply to Henderson & Henderson.

For Sale or to Let.

Twenty-five words under this head 80 cents first insertion. Each additional insertion 10 cents.

FOR SALE, TO LET, or trade for good farm property.—Two desirable brick houses two stories high on Moira Street, Belleville. For further particulars apply to Eliza Langman, Esq., on the premises. 624th

TO LET.—A House to let on Fort Street. A. L. BOUQUET.

THAT commodious store formerly occupied by Mr. John Cook as a grocery, next door to the W. Yeomans & Co's. store, Apply to T. LOCKERY, Tobacconist, 2 doors north. Feb. 23, 1880.

Card of Thanks.

THE members of St. Thomas' Church re-tire their sincere thanks to the Band of the 16th Bat. for their services rendered gratuitously at the 15th.

STAYED.

FROM West Belleville Mills, one deep red mulberry coat, white cap on forehead and information for her recovery will be suitably rewarded. R. B. COOPER, Belleville, July 19, 1880. 624th

LAWN SOCIAL

In aid of fund of Christ Church, on the GROUNDS OF G. L. COLEMAN, ESQ., Thursday Evening, July 22d.

REFRESHMENTS SERVED

and a number of useful and fancy articles will be offered for sale. Music in attendance. Admission 10 cents. 664th

Grand Instrumental CONCERT, MONS. ALFRED DESEVE,

The talented Canadian Violinist (by appointment to the Imperial Russian Court, and to the Imperial Russian Opera, St. Petersburg, 1874; ex-Queen of Spain), to take place in the CITY HALL, Belleville, on Tuesday Evening, 13th August.

1880, provided reserved seats (50c, each) to the number of 200 are secured on or before the 31st of August. Mr. O'Hanlon, and several others, have kindly consented to assist.

The plan of the Hall is now open at Mr. Harrison's Music Store, and persons are requested to secure their seats as soon as possible (before 31st August). If concert cannot take place, by that date, the Concert cannot take place. 664th

TELEGRAPHIC.—No afternoon telegrams

were forwarded to the press to-day, beyond market reports and weather indications.

THE "ROBBERY".—This handsome

new yacht arrived this morning in tow of the steamer *Parus*, for the purpose of being ballasted, and was to be towed back to Trenton this evening. Her bowsprit has been rigged and spar stepped, and it is probable that by the end of the present week she will be in "fighting trim." Great things are expected of her, and if model goes for anything it is probable that she will realize the hopes and predictions of Capt. Outhbert, her builder.

BURGLARY.—During last night the boat

and shoe store of Mr. William Perkins, which is situated in the vicinity of Kylo's Hotel, was entered by a thief or thieves from \$40 to \$50 worth of stock stolen. It is evident that the robbery must have been perpetrated before 4 o'clock this morning, when Mr. Wm. Deacon observed that a window on the east side of the building was open. Through this window the thieves had effected their entrance by breaking open the shutter, taking out a pane of glass and undressing the burglar. There is no clue to the burglar.

THE PAPER.—An exchange forcibly

remarks:—"As with the school, so with the paper. You can pay your subscription price at the counting-room; you can acquire the right to be served with a copy; all that is commercial you can buy. But you do not own the paper. You did not start it. It is a teacher; you can be influenced by it if it is an advocate; and you can love it if it is a companion. But though you read it every day, and fill yourselves with its ample contents, it comes back again on the morrow freshly burdened with its wealth of thought and information. That is the newspaper."

POLICE COURT.

(Before T. Holden, Esq., P. M.)

TUESDAY, June 20.

DRUNK.

John Hague made another appearance and was sent to goal for ten days.

MARINE.

The schr. *Florence* has arrived from Oswego, with coal for Downey and Preston.

The schr. *St. Clair* has cleared for Charlotte, with iron ore.

The steam barge *Saxon*, from Oswego, light, arrived this morning.

The Kingston *Yates* says: "The grand tug *Cherokee* was launched at Mill Point on Friday. She is one hundred feet over all, was rebuilt in the yard of H.B. Rathbun & Son, and destined for the Georgian Bay. She is owned by McMurrich & Playfair, of Toronto."

"Tweed Notes."

Mr. J. B. Watson, the young Canadian orator, delivered another of his lectures in the Town Hall, Tweed, on Friday evening last, 17th inst., to a good house, under the auspices of the Methodist Church here. Rev. Mr. Walker in the Chair. Subject:—"Pluck, patience and perseverance." The lecturer and lecture were well received. It was both instructive and amusing, showing how young men can rise from small beginning to the highest round in the social, political and religious ladder. At the close Mr. Watson referred to young men in our own day who had made difficulties the stepping stones to success, and that is as honest not only to themselves but a glory to our country. The choir rendered some choice pieces at intervals. A vote of thanks was given by Rev. Mr. McCommond and Mr. White.

Seasonable Topics.

Fans and dusters are at a discount these days.

Can't the City Council do something for the sidewalk? They are generally in a shockingly bad condition.

The Street Surveyor has some men employed, cutting down weeds in the streets. A good work.

The hospital building on Bushy Island ought to be properly protected by boarding in the windows, as all the glass has been broken.

A large business is being done on the Grand Junction Railway, both in passengers and freight.

The excursion season is at its height. Strong inducements are offered by the steamers and by the Grand Junction.

SAD BOATING ACCIDENT.—A melancholy accident occurred at Back River, on the 18th inst., by which three members of Mr. Henry Bryson's family, residents of Montreal, but who were stopping at their summer residence on the Back River, were drowned. It appears that the following persons went out in a skiff for a row, and, getting into the rapids, the tiny boat upset and its occupants were left to the mercy of the boiling waters; Benjamin Bryson, aged 26, druggist; J. Elliot Bryson, aged 22, insurance agent; Alfred Bryson, aged 11; Harris Bryson, a girl of 13; Claude, Bryson, aged 6; and Joseph Amois, a French boy of 14. Three of the brothers—Benjamin, Elliott and Claude—were drowned, and the others succeeded in getting ashore. The bodies have not yet been recovered.

From the Hub.

There is perhaps no tonic offered to the people that possesses as much real intrinsic value as the Hop Bitters. Just at this season of the year, when the stomach makes an appetizer, or the blood needs purifying, the cheapest and best remedy is Hop Bitters.

An ounce of prevention is worth a pound of cure. It is well known that a disease that may take months for you to recover from.—*Belleville Globe*.

WEATHER REPORTS.

TORONTO, July 20.—Probabilities for the next twenty-four hours: for the lower lakes, westerly to north-westerly winds, brisk during the day, fine, cool weather.

WINDHURST, July 20.—Indications: lower lakes, southerly, occasional rain followed by clearing, stationary or higher temperature.

REMOVAL.

J. E. BAKIN, M.D., has removed his office and residence to Corner Hotel and Church Street, Belleville, April 30, 1880.

DOMINION IRON LADDER WORKS, KINGSTON.

Patent Iron Ladders with Fire Escape attached.

THE subscriber has been manufacturing the above ladders with the fire escape, attached for a number of years past and has placed them on the best private residences, on several churches, on public schools, hotels, banks, hospitals, charitable institutions, county buildings, military colleges, and Government buildings in Kingston and Ottawa.

In this city I have placed my ladders on the private residences of John Bell, Esq., W. H. Panton, Esq., T. S. Carman, Esq., T. C. Wallbridge, Esq., on the factory of E. H. Hurd, the Roman Catholic Church, and Convent.

Parties wishing to have my ladders, can do so by leaving their orders at the hardware store of James Smith (late Gillen & Keith's) old stand, where they will see sample of ladders, and testimonials from parties who have used them in use.

I place my ladders on the building, with Fire Escape attached, firmly fixed and painted, for 40c per running foot.

All orders promptly attended to.

GEORGE A. RUMRILL, Belleville, June 10th, 1880. 3433m.

CAST ON THE WORLD:

The Border Marriage. A STORY OF THE GREAT GLASGOW BANK ROBBERY.

CONTINUED.

"Ah, then they tried to have the power of subjecting me to personal restraint if I offend them or infringe the orders you will leave."

"The rule here," she repeated, trying to understand his meaning. "What place is this—a solitary, lonely building? Here he accused me, as I light suddenly broke on him, that which, that which, that which he heard on the state—that is a madhouse! God save me, and I among the mad!"

"It will be your own fault if you are treated as such," answered his lordship.

"Charles, Charles! she wildly exclaimed, 'leave me alone! I have no more to say where but here. By the love you professed for me, take me away from this horrid place!'"

She clasped his arm, she clung to him, she gazed at him with a frantic, pleading look, and wildly entreated to be taken from that dreadful house.

He stood for some time in silence and seemed to be reflecting. Then he spoke.

"It remains with yourself," he said, "whether I leave you or not. I will take you back to the Grange on your own terms. You must know what that condition is. Promise me that you will fulfil it and I will trust you, for you have said yourself that you never broke your word."

"What is the condition?" she faltered, with white lips.

"That you assure Charles and my cousin that there are no previous marriages."

"No," she groaned. "God help me, no. Even to escape from this madhouse, I cannot proclaim that infamous lie."

He shook her from him with a burst of anger.

"Meet them the consequences of your obstinacy!" he cried, and furiously rang the bell.

The door was opened in a moment, and the dark, hard featured man entered.

"You have my instructions," said Lord Eagleheart, addressing him.

"Your orders shall be faithfully obeyed," replied the man with an obsequious bow.

"Her lordship is to be treated with all kindness and respect consistent with her safe keeping. No one from without is to be allowed to see her, and you will not permit her to associate with other inmates."

"My lord, my wife will be her sole attendant, and every kindness will be shown her which does not interfere with your purpose."

His lordship advanced to where she stood.

"Charlotte," he said, "let me counsel you to submit yourself to what cannot be avoided. I must now bid you farewell."

She cast upon him one glance of bitter reproach, and turned away without speaking a word.

Lord Eagleheart bit his lip, and left the room, followed by the keeper of the madhouse.

"Heaven help me," moaned her ladyship, as with a cry of woe, she flung herself on her knees and sobbed convulsively.

CHAPTER XXIV.

PHILIP AND CHARLES HAVE A SUSPICION OF THE BORDER MARRIAGE, AND GO TO SEARCH OUT THE MYSTERY.

"My Lord and my Lady have both from one."

These words were addressed by Biggs to Philip Ravensworth and Charles as they presented themselves at the great door of the Grange precisely at the hour of eight was peeling from the tower.

"From home," echoed both in a breath, as they stood still and gazed at the magnificent lacquered in astonishment.

"Went away this morning immediately after breakfast."

"And have not returned?" cried Charles.

"Oh, dear no, sir. I and my Lord say to Lady Dora as how they wouldn't be back for some time."

Charles and Philip looked at each other silently but significantly. Then they entered and walked out, and exchanged not a word till they were some distance across the park.

"Her ladyship has rebelled at last," said Philip, with eager emphasis, according to the words with a violent motion of his clenched hand in the air.

"That is it," rejoined Charles.

"Why, it is plain; it needs no explanation. She refuses to attend the infamous lie he required, and he has taken her out of our way."

"My own opinion exactly," returned Charles. "He counted too far when last night he undertook that my mother would assure me I was born out of wedlock. Oh, poor, wretched, base, and wicked man, to fail and fall! The black deed is without a parallel, and my blood boils up against him with a terrible fierceness."

"It was his only chance, if he was to retain what he has so fraudulently held so long," remarked Ravensworth.

"But it was so foul and wicked," said Charles; "so cruel, so heartless."

"Satanism has no heart," answered Philip; "and when a man commits a fraud not to use any means to hide it. The man to poverty and dependence on him, and to treat me as if I had been his better than the dust beneath his feet! But the heaven, he shall feel the full measure of never rest till I have brought his perjury to light."

"We will work together," said Charles, with resolute determination; "you for justice and vengeance, I for the mother's honor, which he would so foully have taken from me. How shall we proceed? Will you take effectual means to keep her ladyship from him? How then are we to discover the secret marriage—when and where it took place?"

"That is just my difficulty," returned Ravensworth, knitting his brows and becoming abstracted. "Our course is to trace the movements of both during the year before we were born, and how to obtain the means of doing so, and how to obtain them, that is the question."

There was probably but one way, and that was the secret of their secret, and that was the question. But, unfortunately for us, he is doubt he was a witness of the secret marriage, and—

"Ha! I have it," shouted Charles, with a sudden vehemence, which started Philip.

"What have you?" demanded his companion, with gleaming eyes.

"The rule here," she repeated, trying to understand his meaning. "What place is this—a solitary, lonely building? Here he accused me, as I light suddenly broke on him, that which, that which, that which he heard on the state—that is a madhouse! God save me, and I among the mad!"

"It will be your own fault if you are treated as such," answered his lordship.

"Charles, Charles! she wildly exclaimed, 'leave me alone! I have no more to say where but here. By the love you professed for me, take me away from this horrid place!'"

She clasped his arm, she clung to him, she gazed at him with a frantic, pleading look, and wildly entreated to be taken from that dreadful house.

He stood for some time in silence and seemed to be reflecting. Then he spoke.

"It remains with yourself," he said, "whether I leave you or not. I will take you back to the Grange on your own terms. You must know what that condition is. Promise me that you will fulfil it and I will trust you, for you have said yourself that you never broke your word."

"What is the condition?" she faltered, with white lips.

"That you assure Charles and my cousin that there are no previous marriages."

"No," she groaned. "God help me, no. Even to escape from this madhouse, I cannot proclaim that infamous lie."

He shook her from him with a burst of anger.

"Meet them the consequences of your obstinacy!" he cried, and furiously rang the bell.

The door was opened in a moment, and the dark, hard featured man entered.

"You have my instructions," said Lord Eagleheart, addressing him.

"Your orders shall be faithfully obeyed," replied the man with an obsequious bow.

"Her lordship is to be treated with all kindness and respect consistent with her safe keeping. No one from without is to be allowed to see her, and you will not permit her to associate with other inmates."

"My lord, my wife will be her sole attendant, and every kindness will be shown her which does not interfere with your purpose."

His lordship advanced to where she stood.

"Charlotte," he said, "let me counsel you to submit yourself to what cannot be avoided. I must now bid you farewell."

She cast upon him one glance of bitter reproach, and turned away without speaking a word.

Lord Eagleheart bit his lip, and left the room, followed by the keeper of the madhouse.

"Heaven help me," moaned her ladyship, as with a cry of woe, she flung herself on her knees and sobbed convulsively.

CHAPTER XXIV.

PHILIP AND CHARLES HAVE A SUSPICION OF THE BORDER MARRIAGE, AND GO TO SEARCH OUT THE MYSTERY.

"My Lord and my Lady have both from one."

These words were addressed by Biggs to Philip Ravensworth and Charles as they presented themselves at the great door of the Grange precisely at the hour of eight was peeling from the tower.

"From home," echoed both in a breath, as they stood still and gazed at the magnificent lacquered in astonishment.

"Went away this morning immediately after breakfast."

Arrive from Hastings, Campbellford and Stirling, at 10:30.
Trains are run by Belleville time.
E. H. BRENNAN, Superintendent.
May 31st, 1880.

MANHOOD.

HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the medical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excess.
Price, in a sealed envelope, only 6 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming nervous disease may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.
Address: THE CULVERWELL MEDICAL CO., 41 Ann St., New York.

DETROIT THROAT & LUNG INSTITUTE.

Over 16,000 persons treated since the establishment of our Institute in Detroit.
CHRONIC LARYNGITIS.

The preliminary symptoms of this disease being with those of an ordinary cold, only that it is always attended with more or less hoarseness. It is scarcely ever an original disease, but is usually an extension of Croup, this disease passing down the posterior nares and pharynx until it reaches the most sensitive mucous membrane of the larynx, and finally continuing down until it extends to the lungs. When it is caused by Croup the symptoms are more of a tickling in the throat, and the patient complains of a sensation as if something sticking in the throat, which causes a continual rattling cough to clear the throat and windpipe. The voice is unnatural at first, being raspy, while in the later stages it becomes weak and indistinct, and a constant sense of tightness and often difficulty in swallowing.

The above is the simplest form of the disease, and can be readily removed in a few weeks. Although in all cases it must be treated by the direct application of medicated inhalations (atomization), for it is a mucous membrane disease, and the inhalations reach the diseased parts, and thus reach all the surrounding parts so as not to dry the diseased membrane, and thus cause the disease to become more of a tickling in the throat, and the patient complains of a sensation as if something sticking in the throat, which causes a continual rattling cough to clear the throat and windpipe. The voice is unnatural at first, being raspy, while in the later stages it becomes weak and indistinct, and a constant sense of tightness and often difficulty in swallowing.

BELEVEILLE, THURSDAY, JULY 22.

The Globe and the Senate.

The chief organ of the Grits has for a second time wallowed itself on the Senate question. Shortly after the present Managing Director assumed charge of the paper, the course which it had pursued for years in maintaining the integrity of the Senate was radically reversed, and the abolition of the Upper House was loudly and persistently demanded. No half measures would answer the organ, as newly inspired—noting but abolition pure and simple would do—witness the following from its issue of June 25th:

"Some fairly intelligent people urge that the Senate should not be abolished, but reconstituted on a system by which its members should be elected by the Provincial Legislatures. We are convinced that there is no necessity for maintaining a second Chamber in the Dominion, and therefore cannot regard with favor any proposition to give the Senate new powers."

"We are satisfied that no plan for remodeling the Senate can be put forward which would result in making the Upper House powerful and offensive where it is now useless. Rather than reform the Senate to its former glory it should be allowed to exist as at present. It does little harm, if it does no good, and the expense of its maintenance is not an insubstantial reason for justifying its abolition."

The public not taking the slightest possible interest in the matter, and the large majority of the most respectable journals, on the Reform side of politics treating the proposed abolition of the Senate with decided disapproval, a change of base became necessary. So the organ abandons the cry which it raised with so favorable response, and coolly adopts the plan of reconstruction, which it had previously so strongly opposed, as above shown, and says in a recent issue:

"It makes little practical difference just now, whether it shows itself in a willingness to abolish the Upper House altogether, or in a desire to put it in a more efficient state by a change in its constitution."

Comment on these facts is unnecessary. Further than to say that the somewhat turned by the Globe on this question is quite in accordance with its cardinal principles, and with many other precedents which it has set in times past.

Midland City and the Grand Junction.

The Montreal Witness, in its issue of the 20th inst., gives a description of Midland City, and returns in favorable terms to the proposed opening of the through route thence to Belleville. Our contemporary says:

On account of the fine harbor of Midland City and the fact that it is the nearest harbor of importance on the Georgian Bay to Montreal, this place should be one of special interest to Montrealers. It sprang into some prominence on account of the recent extension of the Midland Railway to this point, and it is expected by its sanguine residents that it will be the great transshipping point for grain and produce passing through the Bay of Quinte, Canada to Lake Ontario, and the St. Lawrence from Lakes Huron and Superior. There has already been started a stream of traffic from this point to Lake Ontario, which, it is anticipated, will eventually widen into a great channel, and when that day arrives Midland City will be a city of some importance.

Lying at anchor in the harbor when the Midland telegraph vessel was in the place on Saturday last, was the schooner "Midland Rover" (from Chicago). She had a capacity of 500 tons, and was being loaded with lumber for Chicago. Nature has done so much for the harbor that there is little left for man to do. Vessels drawing twenty feet of water can sail up the river of the shore, and when once in the harbor are thoroughly protected from the effects of storms. The harbor is like a little lake, and is a long headland and several small islands dividing it from the main body of water. Midland City, which was founded about a few years ago, has now a population of about one thousand people, and is very prettily situated, the ground rising at a considerable angle for a mile or so from the lake, as well as from the central street of the city.

Already several pretentious houses crown the hill, and a fine hotel is being erected, and a land company, in anticipation of coming demands for building lots. The business part of the city presents a pleasing appearance, and a fair trade is evidently being done. Besides the shipping business over the Midland Railway, the large saw mills of Mr. H. H. Cook, who has now a population of cutting twelve million feet in a season, the saw, single and grist mills of Clew Brothers, and a saw mill just completed, are sources of employment for the residents.

Back of the town is a natural park which includes a beautiful grove of hardwood of several hundred acres, and a natural lake of about one hundred acres which is said to have neither inlet or outlet and is about one hundred feet deep. The proposed extension of the Midland Railway to this point will bring the Great Valley Canal which will come out near Wabush, and as neither the Wabush, or the mouth of the river has a good harbor, the transshipping business will necessarily be done at Midland.

A Wrong Impression.

A wrong impression has got abroad as to the rates of freight on the Grand Junction Railway, it having been reported that they are much higher than on other roads. This is entirely untrue. Taking all classes of freight, we are assured that the rates are from 10 to 20c per ton lower than they are on the Midland, the Victoria, the Whittby and Port Perry, and the Northern Railway. The rates on the Grand Junction have been so adjusted that the Management have secured the carriage of all manufactured goods in the vicinity of the lines of Railway, and a low grain rate has been made which will secure the grain from the elevators at Hastings, Campbellford, Stirling, and Madoc. The rate on iron ore has also lately been reduced from 75 to 65c. per ton from Madoc to Belleville, and in fact it is the purpose of the managers of the Road to put the rates on all kinds of freight at such a price, while the Company will receive a fair profit, as to make it an object for all manufacturers, producers, and business men in the vicinity of the line of Railway to patronize it. The freight business of the Road has lately largely increased, and the prospect is that in future this branch of the business will become still greater.

A SAILOR'S DIBBLEDU PATE.—The following letter has been received from Nanaimo, B. C. It is said that a large number of residents of Nanaimo district gathered at Wellington to compete for \$300 worth of prizes, offered by the proprietors of the Wellington colliery. During the afternoon Thomas Pollard, boatwain of the British ship "Maggie E. Seed," loading at Departure Bay, while intoxicated, became engaged in a quarrel with another sailor.

After several blows Pollard's conduct became outrageous so that Constable Drake, assisted by several spectators, placed him in a large barn, the property of the coal company. To prevent his return to the ground he was chained by the wrist to a post inside. The parties then went back to the ground, and in about an hour's time the barn was full of men on fire. A rush was at once made to liberate the man and horses that were in the stalls. Several men forced their way through and seized the poor fellow, whose piercing cries roused the evening air and carried a thrill of pity to every heart. The efforts were in vain; the fastenings were too secure, and as the fiery tongues approached Pollard begged them to cut off his arms so he might escape with the stumps. The rescuers were soon forced to flee to save themselves from burning, leaving the unfortunate man to his awful fate.

THE CATTLE TRADE.—The Montreal Witness says, in reply to the Globe, which asserted recently that the ocean freight from Montreal on cattle is from \$5 to \$10 to \$20 per head:—"We learn from a high authority here that the freight charge from Montreal to only four pounds to four pounds ten shillings per head, or about one pound ten shillings less than the Globe states it to be. Canada shippers have come to complain of this charge, as they are not placed by it at a disadvantage to American dealers, who have to slaughter their own cattle at the point of landing. The rate is somewhat higher than the American rate, but if it were too high as compared with other freights from here or elsewhere, in America, competition would provide a speedy remedy."

THE CATTLE TRADE.—Messrs. Vaughan Bros. & Co.'s cattle circular for June shows that the receipts from this continent at Liverpool for the month were 10,642 cattle, 9,435 sheep and 502 pigs. The increase over May was 1,465 cattle, 3,418 sheep and 302 pigs. Boston furnished the largest quota, that is, 5,849 cattle and 4,443 sheep. Montreal next on the list with 3,892 cattle and 1,656 sheep. The shipments from New York were comparatively light—618 cattle and 973 sheep. Baltimore contributed 126 cattle and 338 sheep, and Norfolk 61 cattle. The loss in transit was a fraction over one per cent for cattle, and about 12 per cent for sheep, showing that the mortality has been reduced very much under the light of experience.

REMARKABLE STORY.—A telegram from Halifax on the 21st says: "Capt. Gollin, of the barque Comorin, and of from Liverpool, G. B., which arrived off this port yesterday for orders, makes the following statement: On July 4th lat. 47. 18, long. 31. 43, the ship British Queen, of London, lay becalmed within three hundred yards of our ship. A person supposed to be the master was on the poop of the ship and commenced firing from a loaded rifle, taking deliberate aim straight at our vessel. About six or seven shots were fired, and the whizzing of the bullets could be distinctly heard by every one on our vessel's deck. As soon as possible afterwards I signalled to him that I would report him at the nearest port, to which signal he did not reply. The statement was also signed by the mate, carpenter, cook and steward and two boys of the Comorin."

A NEW WHEAT PEST.—The Globe says:—"From several quarters we have reports of a new insect pest in the wheat. From the description we are able to say almost certainly that the insect is the 'wheat stem-maggot,' *Meromyia americana* of Fitch. In the nature form this insect is a fly, shaped like the common house fly, but much smaller and rather more slender in proportion to breadth. The larva lives in the stem of wheat, and destroys the plant by devouring the substance of the stalk. Of course, when the stalk is nearly discovered of the head of wheat dies off prematurely. This insect will attack oats, barley, or rye, but prefers wheat. It is difficult to indicate a remedy for such a pest. Probably the only way the straw known to be affected will be the most practical plan. No doubt the fly is usually kept in by the parasites, and it is to be hoped that the parasites will soon regain the upper hand. The same insect is complained of in New York State."

REBELLION IN HASTINGS.—A Cape Town despatch says:—"The Government has stated in Parliament that the Basutos are in open rebellion. Official news from Basutoland is very unsatisfactory. The loyal natives are attacked in all directions, and massacres are threatened. The Government has ordered three troops of mounted rifles to the support of the British agent."

News Condensed.

A Board of Trade has been organized at Stratford.
—Crops of all kinds are looking remarkably well in Manitoba.
—Hamilton will have its civic holiday on the 1st of August.
—Turkey is making extensive preparations for war with Greece.
—Dr. Tanner is still confident of success in his attempt to fast forty days.
—An epidemic of influenza prevails among the horses at Ottawa.
—The Quebec Legislature will probably be prorogued on Saturday.
—Geo. Gosselin has been elected President of Mexico by a large majority.
—Mr. Wm. Gattin, who lately visited this city, is now in Toronto.
—Augustine Archer, of Quebec, was drowned off Point au Pic on the 21st.
—An epidemic of influenza has largely increased in numbers this year around Quebec.
—A new gold discovery is reported at Old River, Lunenburg county, N. S.

—Toronto's assessment shows an increase of about \$2,000,000 on that of last year.
—The shipments of coal from Picton this season to the 17th inst., amounted to 98,430 tons.
—There is an ice famine in New York, and families are charged \$2 per 100 pounds for the article.
—Mr. Langevin visited Collingwood yesterday and was to be at Owen Sound today.
—The weather in England since Sunday has been fine, and favorable for the growing crops.

—A wood engraver named French has absconded from Ottawa with \$404 of his employer's money.
—Mr. Storr, Warden of the County of Lennox, refuses to be a candidate in case Mr. Hooper retires.
—The Toronto Government has given an order for the construction of four torpedos boats in England.

—An elderly man known as "Sergeant Jimmy" committed suicide at Montreal on the 20th, by taking Prussians.
—The Earl of Dalhousie is dead. His son, Lord Ramsay, member of Parliament for Liverpool, succeeds to the peerage.
—Hon. Messrs. Bowell and Baby were entertained at dinner on Monday night by Judge Palmer, of St. John, N. B.

—The body of Benjamin Bryson, who was drowned in the Back River on Sunday, was found near the spot where he went down.
—All the railways of Canada are reported as being in an unusually prosperous condition, which is a sign of returning prosperity.
—A splendid new ship of about 1,300 tons, named N. B. Lewis, was launched at Salmon River, Yarmouth county, N. S., on the 20th.

—The body of a man who was drowned yesterday, was found near the spot where he went down.
—The Toronto City Council has decided to purchase the property of the late Mrs. Barrett.
—Mr. Owen-Mulvaney, of South Orillia, was killed while walking on the Northern Railway track, about a mile south of Orillia on the 21st.

—It is estimated that the gross receipts during the late theatrical season at Winnipeg during which the McDowalls performed, was \$8,000.
—Four thousand three hundred and ten cattle and 2,632 sheep were shipped from Halifax from the first of the year to the 12th of July.
—The Allan steamer Ribblesdale, which sailed from Halifax on Tuesday, for England, took 3,123 boxes of preserved lobsters, valued at \$14,300.

—Sergeant Ryan, of the Manitoba Mounted Police, has gone to the North-West in charge of a party of thirty recruits for the Manitoba Mounted Police.
—The Whittby and Port Perry Railway is now being built, and is to include a fast train from Lindsay to Toronto in three hours and a half.
—On the 20th inst. at Faisley, Ont., Mrs. John McNeil, a farmer's wife, accidentally took some strychnine, and died in about an hour afterwards.

—Collector Arthur, the Republican candidate for the Vice Presidency of the United States, and Senator Conkling are at the St. Hotel, Quebec.
—Edith Stewart, aged five, granddaughter of Mr. James Woodlark, clerk of Brantford, met with an accident on Monday by scalding, which proved fatal on the 21st.
—Two hundred men of the Cape Rifles have been ordered to march rapidly into Basutoland, the British residency at Maseru being threatened by rebels.

—The Rev. N. J. Macleod, late of Guelph, was inducted to the charge of the Central Presbyterian Church, Toronto, on the 20th, in place of Rev. D. McNeill, of this city.
—Rumour does not name the names of Hon. A. G. R. Bannatyne and Hugh Sturges, who have been nominated in Selkirk, in place of Donald A. Smith, who declines to be a candidate.
—Mr. Henry Nichol, of Westminster, while mowing in the harvest field yesterday, was thrown from the seat on to the knives, and his right arm was nearly severed just above the wrist.

—It is reported at Ottawa that Sergeant Connors and a Dominion policeman have succeeded in capturing Heney, the Barbours murderer, in the woods near the scene of the tragedy.
—A fatal accident occurred at the Northern Elevator, Toronto, on the 21st. A man named Daniel Whalen had his head almost torn from his body by a rope used in the hauling of grain into the elevator.
—There are at present in the marine hospital at Quebec three cases of small-pox, the sufferers being young women of the same family who recently arrived from the north of Ireland.

—This year's traffic on the Rideau canal has been, up to the present time, almost double that of last year. The large quantities of iron ore that have been shipped have had much to do with the increase.
—A Bombay despatch says that according to a Cabul report Abdurrahman Khan is perishing from the effects of the British terms. He has the support of half of the Ghilzais and two-thirds of the Kohistanis.
—An inquest is being held by Coroner Reid, at Cuckville, on the body of John Woods, who met his death on Monday under suspicious circumstances on the railway track near Cuckville station.

—In the 20th inst. the barns of Mr. Low, at Pakenham, were struck by lightning and burned. Mr. Low, who tried to remove some grain, was so badly burned that he died in a few hours after.
—An inquest was held at Cuckville by Dr. Riddell resulted in a verdict to the effect that the man came to his death by being struck by an engine on the Credit Valley Railway, operated by his mate, and also the railway officials.

MORNING DESPATCHES.

EUROPEAN.

MADRID, July 21.—A series of terrestrial disturbances in the island of Luzon, commenced on the 19th inst. Up to the 20th there had been repeated shocks of earthquake, the first and last being most violent. The Cathedral and the barracks at Manila have fallen, and troops are camped outside the city. Two shocks occurred on the 19th, one of which lasted 10 minutes, and the other 40. European natives were killed and sixty-one injured. No Europeans have been hurt. The inhabitants of Manila fled to the fields. The shock opened at several places, and jets of boiling water and showers of ashes were ejected. Some public buildings at Iquaga and Iloilo were demolished. All the volcanoes of Luzon are in full activity.

AMERICAN.

JACKSON CITY, July 22.—The loss by the tunnel disaster is estimated at \$100,000. The pay of the men who were killed and left families will be given right along to the families. Arrangements were made last evening for pumping out water, but the pump failed for the accident will probably delay the work of removing the bodies.

NEW YORK, July 21st.—The Times says experiment shows Tanner's heart for the tunnel disaster is estimated at \$100,000. The pay of the men who were killed and left families will be given right along to the families. Arrangements were made last evening for pumping out water, but the pump failed for the accident will probably delay the work of removing the bodies.

THE WORLD'S WASHINGTON despatch states that a gentleman who has over 35,000 apple plants on a farm near Savannah, recently sent to the commissioner of agriculture several samples of tea. The commissioner took the samples to New York, and went incognito to one of the largest tea establishments there, where an expert pronounced it India tea. The plan of the tea is in the hands of the commissioner, and it is expected in a short time hundreds of thousands of plants will be growing in this country. The Commissioner exports the United States will in a few years be producing as much tea and sugar as may be needed for home consumption.

GREENSBORO, Pa., July 22.—Salome Barker, aged 14, testified here yesterday that she was abducted by some circus men on the 13th inst., at Sunnysville, and repeatedly violated. She identified three of them, who have been arrested.
—Intense indignation is felt here, and threats of lynching the offenders are freely made.

CHICAGO.—The Toronto Club defeated the Staten Island (New York) Club on the 21st by an innings and 63 runs. Score: Toronto, 115 runs; Staten Island, 20 and 32.
—It is estimated that the gross receipts during the late theatrical season at Winnipeg during which the McDowalls performed, was \$8,000.

—Four thousand three hundred and ten cattle and 2,632 sheep were shipped from Halifax from the first of the year to the 12th of July.
—The Allan steamer Ribblesdale, which sailed from Halifax on Tuesday, for England, took 3,123 boxes of preserved lobsters, valued at \$14,300.

—Sergeant Ryan, of the Manitoba Mounted Police, has gone to the North-West in charge of a party of thirty recruits for the Manitoba Mounted Police.
—The Whittby and Port Perry Railway is now being built, and is to include a fast train from Lindsay to Toronto in three hours and a half.
—On the 20th inst. at Faisley, Ont., Mrs. John McNeil, a farmer's wife, accidentally took some strychnine, and died in about an hour afterwards.

—Collector Arthur, the Republican candidate for the Vice Presidency of the United States, and Senator Conkling are at the St. Hotel, Quebec.
—Edith Stewart, aged five, granddaughter of Mr. James Woodlark, clerk of Brantford, met with an accident on Monday by scalding, which proved fatal on the 21st.
—Two hundred men of the Cape Rifles have been ordered to march rapidly into Basutoland, the British residency at Maseru being threatened by rebels.

—The Rev. N. J. Macleod, late of Guelph, was inducted to the charge of the Central Presbyterian Church, Toronto, on the 20th, in place of Rev. D. McNeill, of this city.
—Rumour does not name the names of Hon. A. G. R. Bannatyne and Hugh Sturges, who have been nominated in Selkirk, in place of Donald A. Smith, who declines to be a candidate.
—Mr. Henry Nichol, of Westminster, while mowing in the harvest field yesterday, was thrown from the seat on to the knives, and his right arm was nearly severed just above the wrist.

—It is reported at Ottawa that Sergeant Connors and a Dominion policeman have succeeded in capturing Heney, the Barbours murderer, in the woods near the scene of the tragedy.
—A fatal accident occurred at the Northern Elevator, Toronto, on the 21st. A man named Daniel Whalen had his head almost torn from his body by a rope used in the hauling of grain into the elevator.
—There are at present in the marine hospital at Quebec three cases of small-pox, the sufferers being young women of the same family who recently arrived from the north of Ireland.

—This year's traffic on the Rideau canal has been, up to the present time, almost double that of last year. The large quantities of iron ore that have been shipped have had much to do with the increase.
—A Bombay despatch says that according to a Cabul report Abdurrahman Khan is perishing from the effects of the British terms. He has the support of half of the Ghilzais and two-thirds of the Kohistanis.
—An inquest is being held by Coroner Reid, at Cuckville, on the body of John Woods, who met his death on Monday under suspicious circumstances on the railway track near Cuckville station.

—In the 20th inst. the barns of Mr. Low, at Pakenham, were struck by lightning and burned. Mr. Low, who tried to remove some grain, was so badly burned that he died in a few hours after.
—An inquest was held at Cuckville by Dr. Riddell resulted in a verdict to the effect that the man came to his death by being struck by an engine on the Credit Valley Railway, operated by his mate, and also the railway officials.

VALUABLE MILL PRIVILEGE
AND
Premises for Sale,
THE subscribers offer for sale one of the best Mill sites and water privileges on the River Moira, just outside the limits of the City of Belleville, a few rods from the Grand Trunk Railway station. The main travelled road from Belleville to the northern townships and villages runs through the premises, leaving three acres on the west side, embracing canal, excavated at a large outlay, 450 feet long, 25 feet wide, and 10 ft. deep, with water level foundation; walls of mill 100 feet long, 56 feet wide and 12 ft. thick; foundation depth 6 feet, with necessary openings for six water wheels. Ten feet head of water, with the exclusive right to use the further shore for damming, giving the sole right to the magnificent water power at any point in a length of 150 yards on the river. Any amount of water-power available nine months in the year, and on the east side of the road—a six and a half acre tract, capable of being used in connection with extensive milling or manufacturing for yard purposes, or both. The above is one of the most valuable properties of the kind ever offered for sale in this Province. For terms and particulars apply to BELL & PONTON, Vendor's Solicitors, Belleville, July 16, 1880. d&w

To Let or For Sale.
A BROADCAST House on Lewis Street, in good repair, with outbuildings, and a large acre of ground, with orchard, and hard and soft water, &c.;

Daily Intelligencer.

BELLVILLE, FRIDAY, JULY 23.

Local Notices.

Notice under this heading is a free advertisement. After the insertion of 10 lines.

The Congregation of St. John's Church have arranged for an excursion to Mill Point about the middle of August, upon the occasion of laying the corner stone of the proposed English Church in that place by the Bishop of the Diocese.

Old clothes made to look new—coats, vests and trousers. I tell you, Ladies, it is no joke; I can clean your dresses or your cloaks. Campbell St., Dickson's old stand.

Our lady says to another. How can you afford to put on a new pair of gloves every time you go out? She answers (in a low tone of voice). They are not new, I had them cleaned at Prof. Smith's, Campbell St. And the other lady went right away to Campbell St. to have her's made new.

City and Vicinity.

ARRIVAL.—The S.S. Moravian was reported at Fox River at 10:40 a. m.

MUSICAL.—Prof. Smith, of Kingston, formerly of this city, will take charge of the musical service in the Tabernacle on Sunday 23rd inst.

PORTUGUESE.—The beautiful poem written by the poet laureate, James Joyce, are for sale in all the city book stores. Every well regulated family ought to have a copy of these stirring productions.

POLICE.—One arrest was made last night. Five women of questionable character, who have hitherto lived in this city, were arrested in Trenton yesterday and will probably be sent here for trial.

LAWN FESTIVAL.—The lawn festival held on the grounds of Mr. O. L. Coleman last night was largely attended and was a success in every way. The proceeds will make a handsome addition to the funds of Christ Church.

RUNAWAY.—A team of horses attached to a carriage became frightened by the whistling of a steamboat at Sutherland's wharf yesterday afternoon and ran away. Who was the owner, or what (if any) damage the horses did, could not be ascertained.

CUSTOMS STATISTICS.—The Pictou Times says: "The Customs imports at the port of Pictou for the year ending 30th June last amounted to \$22,810; the exports to \$407,676; No. of coasting vessels reported inwards, 1079, tonnage, 169,795; vessels reported outwards, 1063, tonnage, 162,450. The duties collected amount to about fifty per cent more than last year."

THE EXCURSION.—Should the weather to-morrow night prove favorable, there is every probability that the excursion by the steamer *Alexandra*, which is for the benefit of the St. Andrew's Society's charitable fund, will be one of the largest of the season. The moon is now at its full, and nothing more pleasing than a trip on the water at night could be imagined. Besides, the worthy object for which the excursion is given has strong claims on the public.

PERSONAL.—The Berlin Daily News of the 21st says: "We had a call yesterday from Mr. Robert Matheson, Principal of the Deaf and Dumb Institute, Belleville. We are pleased to see our old friend progressing and highly successful in his very responsible position. Being an old newspaper man we are especially glad to note his success. The Institution over which he presides is in a highly prosperous condition."

THE RIFLE.—We learn with satisfaction that the match between the Prince Edward Rifle Association and the 49th Battalion has been definitely arranged. The first half of the match will be shot here on Friday, 30th inst., eight men aside—ranges 200, 500 and 600 yards—seven shots at each. It is likely that the contest will be a close one.—The contest for the 49th Battalion champion cup is taking place today.

EXCURSION.—Provided suitable boat accommodation can be had, an excursion will be given under the auspices of the congregation of Christ Church, to Mill Point, on the occasion of the laying of the corner stone of the new Church of England edifice at that place. The ceremony will be performed by the Lord Bishop of Ontario, who will be assisted by a number of clergymen of the diocese. The Rev. Mr. Baker has issued invitations to all congregations in the Bay district. The occasion will be one of much interest and doubtless the excursion will be largely attended.

ACCIDENT TO DR. WHITEFORD.—The Ottawa Free Press of the 22nd inst., thus describes an accident to Dr. Whiteford, formerly of this city: "Dr. Whiteford met with a painful accident yesterday afternoon. He was passing the Rideau Hall cricket grounds when he was struck on and tumbled to the ground. He was taken to the hospital, and after some time, he was discharged. He is now recovering from his injuries."

PERSONAL.—Messrs. A. L. Hogg and D. G. Charles, civil engineers, late of the Credit Valley Railway, are in town, making plans for work, such as bridges, viaducts, docks &c., for the Grand Junction Railway, to be erected at once. Tenders have already been called for. Mr. Hogg has been some time past interested in a contract on the G. J. R. between Keene and Peterboro'. Mr. Charles accompanied J. O. Bailey, Esq., M. L. C. E., to Lake Nipissing, exploring in the interests of the Ontario & Pacific Junction Railway, and returned a few weeks ago. Mr. O. speaks in the highest terms of several townships on the route, and mentions the size and quality of the timber as magnificent. Moose and deer were plentiful and spotted trout and black flies were the chateaux in the ordinary section of advertisement, "too numerous to mention."

THE GALLIOWS.

Execution of Mr. Brown's Murderer.

NOW BENNETT DIED.

(By telegraph to the Intelligencer.)

TORONTO, July 23.—(By telegraph to the Intelligencer.) Mr. Bennett, who was hanged in the eastern gallows at 8 o'clock this morning. There were about 50 persons witnessed the execution. The prisoner ascended the scaffold with a firm step and addressed those present, occupying fully five minutes in delivery of his last words. He then turned to the gallows and entered the *Globe* office with the intention of shooting the Hon. George Brown, and repeatedly affirmed that he was prepared to meet his God. He lamented that the event occurred by which a noble life had been sacrificed, but that it was necessary for the good of the country. He expressed forgiveness for those who were delivered in a clear, ringing voice.

The black cap was drawn and the bolt sprung. In ten seconds the body was cut down, and life being pronounced extinct, the usual signal was held. The unfortunate man appears to have died from strangulation.

The *Globe* gives the following as to Bennett's last day and night on earth: Late yesterday afternoon a brother of the prisoner, two sisters and a young man arrived at the jail with passes signed by the Sheriff granting them leave to have an interview with the condemned man. He, however, refused to see them, saying that he was done with the world now and did not wish his attention distracted by its concerns. Shortly after their departure he sat alone and wrote a letter addressed to them, and also one to a young man residing in the city. These letters he gave to Mr. Father Egan to be delivered to the parties to whom they were addressed. The clergyman stayed for seven o'clock last night and visited him at about two hours. The prisoner was quite calm, and apparently resigned and cheerful. He greeted those who came to his cell in a hearty manner.

After dark there were two ominous arrivals at the jail. They were the coffin and the executioner. The latter will occupy an apartment in the prison over night. He may be relied upon to do his work neatly, as he has had some experience in his ghastly occupation.

Close on eleven o'clock the prisoner expressed a desire to do some more writing, and writing materials were given him, and he was then occupied for some time. A twelve o'clock bell was rung, giving instructions that he should be awakened sharp at five.

ANOTHER ACCOUNT.—The *Intelligencer* says: "It did not seem to have many friends, or if he had they were very careless as to his condition."

At midnight he retired and for a time slept quite soundly. He occupied the cell in the window of which the condemned could be seen the scaffold, and although Bennett did not seem the least concerned, Governor Green considerably him removed to the new wing and placed him in the cell known as the "debtor's room."

At about two o'clock the doomed man started suddenly up from his bed and commenced to rub his neck vigorously, and with a ghastly smile and a muttered word, sank back on the pillow, and was soon asleep again. He had been dreaming that he had been hanged.

Just as the first streak of light dispersed the shadows from the room, he again sat up and repeated the motion of rubbing his neck, his head falling to one side as if he had already taken the fatal drop. Although but half awake, he seemed at once to detect the danger, and he looked at the clock, which showed him that he had only a few minutes to live. He then looked at the clock, which showed him that he had only a few minutes to live.

A five o'clock bell arose, and making a careful toilet, took up his testament and commenced to read his prayers in an earnest and devout manner. He was then positioned by walking up and down the room. At 5:30 a. m. he was notified that his breakfast was ready, but he declined to eat anything, saying that he felt pretty well and in good spirits with partaking of any nourishment. At about six a. m. his spiritual advisers arrived, and they continued in prayer with him till the arrival of the Sheriff.

At 7:45 Mr. Sheriff Jarvis entered the condemned man's room, followed by the executioner, Mr. Langmuir, the Government Surgeon of Prisoners, Dr. McCollum, the jail surgeon, and the representatives of the press. Bennett, as the door was opened by Governor Green, was taking a few steps up and down the floor and conversing with his spiritual advisers, the Sheriff said: "Well Bennett, my poor fellow, are you ready?" "Yes, my friend," replied Bennett.

The hangman then proceeded to take his arm straps and pinned the arms of the doomed man. When it was nearly done Bennett said: "Don't make it so tight; it's not necessary to hurt a fellow." "It's all the better for you, my boy," said the hangman. "All right if you think it necessary," replied the prisoner, and the pinning was completed. Bennett held in his right hand an ebony crucifix. All being ready, Mr. Bright, who had gone outside to lengthen the rope as the condemned man stood on the drop, returned and reported to the Sheriff.

The procession moved out the room in the west wing and across the main hall of the jail to the east wing, and down the stairway to the basement and out into the prison yard. In the walk Bennett was firm and stepped out as confidently as if it were an every day occurrence. As the procession passed through the winding corridor, a few of the spectators who had not gone into the yard, crowded forward to catch a last glimpse of the doomed man. Few were there who did not feel a thrill of admiration for the manner in which the murderer conducted himself. He walked with his head thrown back, not a trace of fear being discernible in either his deportment or features.

When the Sheriff appeared at the top of the steps leading to the yard, followed by the Rev. Father, a low murmur went up from the spectators, and more than one face was blanched as they caught sight of the hapless victim, who continued to walk with firm and unflinching step.

At the foot of the gallows he paused a moment, and sighing heavily, turned his head to one side. Taking a momentary glance at the spectators, who numbered about fifty, he proceeded upwards, not failing to change his step, so as to walk in time with the constant.

Immediately upon reaching the floor of the scaffold Bennett stepped forward and addressed those present, speaking with his hand and holding a crucifix upraised in his hand. Quietly stepping on the trap door Bennett made a motion forward secured his legs by placing a strap around them between his knees and ankles. The noise was listened about his neck, the Sheriff gave the signal, England drew the bolt, and with a jerk, sickening and shuddering, the body was suspended in

RELLVILLE, MONDAY, JULY 26.

Political Notes.

RE-ACTION IN ENGLAND.
The by-elections in England and Scotland are not conforming to the Radical party, as they have so far resulted in a gain of several seats to the Conservatives. Sir William Tweed, returned two Liberals at the general election, and in the persons of Sir Dudley Coutts Marjoribanks and the Hon. H. Strutt, who have just been raised to the Lords on the death of his father Lord Palmer. Mr. Strutt's majority was 62 at the general election, and in the last election the Liberal candidate was beaten by 2.

RUINED BY PROTECTION.

Says the *North American*: "The Philadelphia *North American* puts the case in this way:—Those who imagine that the long-continued contest in this Republic in favor of a protective tariff is only the struggle of a few favored interests will be well occasionally to contemplate carefully the rapid progress of such remarkable points as the town of Patterson, N. J., which, from a comparatively small place of 16,000 inhabitants, has, in the course of twenty years, risen to be a flourishing city of 60,000 people, with sixty silk factories, besides great locomotive works and other industries." No doubt Sir Richard Cartwright could prove to them that they are quite ruined by the protective process, but they are too blind to see it."

THE COAL TRADE.

The *Halifax Herald* says:—"It was said by the *Chronicle* and others of the same ilk that it would require a duty of \$2.50 per ton to secure to our coal owners the markets of the Upper Provinces. This has now proved to be a gross misconception. Last year, notwithstanding the depressed and disabled condition of our coal mines, consequent on the five terrible years of the Mackenzie-Cartwright famine, and notwithstanding the abnormally low price of American coal, we—in the nine months immediately following the change of tariff—increased our sale of coal in the Upper Provinces by 40,000 tons. This year the increase will be much greater—in fact our sale of coal in Quebec and Ontario are only limited by our capabilities of production and transportation. The success of the National Policy in the revival of our coal trade is universally admitted, and hundreds of men who two years ago were doubtful and disbelieving, to-day frankly confess their error.

BUSINESS REVIVAL IN MONTREAL.

The *True Witness* is assured that business has experienced a decided revival in Montreal. It says: "There can be no mistake as to the revival of trade, in so far as Montreal is concerned, and we sincerely believe, in the Dominion of Canada as a whole. It is a fact that must be admitted, if figures are of any earthly use. The Internal Revenue receipts for the month ending June 30th are \$86,982, against \$36,147 for the same month of 1879. The increase of vessels in port from sea for the same month compared with June of last year is 15 vessels and over 30,000 tons. There have arrived this month sixteen more steamers than in June last year. The Ontario receipts for June, 1880, are \$573,363.86 against \$248,997, for June 1879, an increase of \$324,366.25. For the fiscal year ending June 30th, 1880, the total amount is \$5,232,806.19. There were 20 vessels laden with sugar this month against seven in this month last year. But leaving figures out of the question, the most casual observer walking our streets, except he is a Crit politician, must confess that Montreal is as prosperous as during any time within the past decade. The business men themselves are the last to acknowledge that the depression is over, for the reason that the past stagnation has made them cautious, and inclined them to be pessimists. Those who have eyes, however, can see. They can notice the vast difference that exists between the summer of 1880 and that of 1878, especially in the outward appearance of the workmen, and the comparatively small numbers of them forced to remain idle spectators on the corners of the streets. Whether this hum of industry is an effect of the national policy or not, we are not to enquire; it is there and we are satisfied, but we certainly think the national policy has done no harm.

A FABRICATION.

The following, which is extracted from the *Lindsay Post* of the 23rd inst., is a fair sample of paragraphs on the same subject which have been widely circulated by the Grit press recently:—"The N. P. is doing one grand thing. It is bringing out at the public expense three or four thousand navvies from England to work on the Pacific railway. To be logical and consistent the N. P. apostles at Ottawa ought to put a tax on new comers so as to protect the laboring man from the pauper labor of Europe." It is not true that the "three or four thousand navvies" are being brought from England at the public expense. The passage money for the men is simply advanced by the Government to the contractors who employ them, and it is to be

repaid out of the money accruing due to the contractors. This has previously been explained, but when falsehood will serve him better than truth, the average Grit editor sticks to the former. The assertion that the N. P. has anything to do with the matter is unworthy of any one whose intellect is above the level of an ordinary grasshopper. Were it true, however, as the free traders contend, that protection has enhanced the price of the necessities of life "from 25 to 60 per cent.," without increasing wages, not a solitary navvy would be foolish enough to leave England for Canada.

The Minister of Customs.

The *Kingston News* says:—"The following paragraph, which appeared originally in the *Halifax Chronicle*, Grit and anti-Confederation, is going the rounds: "Mr. Bowell is moving about the Maritime Provinces. If the Liberals were in power, Mr. Bowell would be found in full force, running a double-edged dagger through the ribs of the Liberal cause, to give trouble to the Government. But since Orangemen have elected him to a position for which he is not fitted, and he has been in the same stall as Mr. Languevin, he finds it convenient to have no friends in the Liberal ranks on the 12th of July. The Orangemen ought to be able to appreciate the value of Mr. Bowell. "And if Mr. Bowell had come west on the 12th of July and attended an Orange demonstration, the same journals which now attack him would have called upon the Roman Catholic supporters of the Government to make a note of the fact. The Orangemen will not be satisfied. Nothing will please them. No matter what the Minister collectives for its individual members, as such a thing as fair and honest dealing is not to be expected from the organs of the men whose professions in Opposition and acts in power were notoriously false at variance.

"As to Mr. Bowell's alleged 'unfitness' for the position, all we can say is, that he has proved himself one of the best and certainly the most industrious Minister of Customs Canada has had." The *St. John Globe* has also been attacking the Minister of Customs, but with a success equal to that of its Halifax contemporary, as the following from the *Ottawa Citizen* shows:—"The *St. John Globe* has often written rather an awkward mess over its attack on the Minister of Customs. It published the most vulgar article that has for a long time appeared in the press, and the *Telegraph* and *News* have had to repudiate the piece as a forgery and a piece of the article. Of course Mr. Ellis, of the *Globe*, is a very capable man, but he has made a very serious mistake by his article on Mr. Bowell, and that will be more fatal to him than the article will be to the Minister. Articles never kill unless they are true, and the *Globe's* was not true."

The Murray Canal.

The *Mail* states that the Dominion engineers have completed a survey of the proposed route of the Murray Canal. The distance to be cut through the isthmus is about 5,500 feet. A water level through the creeks could then be obtained by means of dredging, the cutting varying from three to eight feet, and it is estimated could be accomplished in a couple of seasons. The engineers report that there are no special difficulties in the way of constructing the canal, if the country should deem it at any time necessary to proceed with the undertaking.

It is certainly to be hoped that the Government will give this enterprise their favorable consideration. Should the proposed arrangement as to transferring the construction of the Pacific Railway to a Company be carried out, there will be an excellent opportunity for the construction of the Murray Canal, the claims of which can hardly be overlooked.

A BRUTAL OUTRAGE.—A London paper says:—"A girl of eighteen, named Jennie Dalton, came with her mother before Squire Peters to-day and laid an information against a young farmer named John Nixon for having outraged her. She said that on the 6th of June last she attended church in London township, and after service was invited for a drive by young Nixon. After making a tour around they drew up at the church, and the young man asked her to alight. She did so, and was conducted around to the rear door, through which she was asked to enter. She refused, and Nixon then dragged her in, and after a long struggle succeeded in outraging her person. She cried and pleaded to be taken home, but he refused, and repeated his assaults four or five times. Shortly after 9 o'clock in the morning he allowed her to depart, and an hour afterwards she reached her home in the city exhausted and badly bruised. A warrant was issued. Nixon is said to be well off."

HORRIBLE DEATH.—A horrible accident happened about a mile from Woodham on Friday last in the township of Uxbridge. The victim was a little 3-year old daughter of Mr. Martin. Her sister, a young woman, took the little one and went to the field where her father and brother were working. When she started to return the child was missing and she thought it had gone home itself. The brother resumed work and began driving the reaper around the field. A cry of anguish arrested him, and when he descended to see what was the matter he was horrified to discover his little sister lying on the ground sweltering in her own blood. The reaper had severed her feet (a little below the swell of the legs) from the body. He immediately carried the child home and two doctors from Exeter were speedily summoned. Although the little girl lost a very great quantity of blood, she is now doing well.

FORGOTTEN WAREHOUSE RECEIPTS.

—A telegram from Port Hope says:—"Well-remembered rumors are being circulated respecting the alleged forged warehouse receipts by a well known local grain buyer, the Bank of Montreal proving the victim. The matter being kept quiet so that the amount advanced by the bank is not easily discovered. The culprit has skipped to the States, but efforts are being made to get his family connections, who are numerous and wealthy, to settle the matter."

THE TORONTO AND OTTAWA RAILWAY.

—Mr. J. Bailey, chief engineer, Toronto and Ottawa Railway Company, with a staff of assistants, commenced on Monday, the 26th inst., to make a thorough survey of the route between Peterborough and Toronto.

OBITUARY.

ABRAHAM DIAMOND, ESQ.

On Saturday evening the city was startled by the announcement that Abraham Diamond, Esq., barrister, and lately Police Magistrate of this city, lay in a dying condition at his residence on William Street. Those who had seen Mr. Diamond during the day could scarcely credit the statement, but it was unfortunately true, as he expired about half past 11 o'clock from a cerebral hemorrhage of the choroid, despite the strenuous efforts of several physicians who had been summoned and exerted their utmost skill to ward off the fatal result. The facts of the case, as related to us on the day of his death, were as follows: About 2 o'clock deceased returned to his home and stating that he was tired and needing sleep, and that he would remain at home for the remainder of the day, he retired to his bed-chamber, where he administered a dose of chloral to him. He lay down with the intention of seeking repose, and Mr. Diamond went down stairs, leaving him sleeping, and engaged in the discharge of his household duties. Somewhat later in the day, and he was accompanied with him for some time. Shortly after 3 o'clock he heard a noise up stairs as of a person falling, and going at once to his husband's room found him on the floor in a seemingly stupor. He raised him up, and laid him on the bed, and he was unable to see distinctly. Mr. Diamond laid him on the bed and discovered that he was becoming insensible, upon which he examined the medical bottle and found it had been abstracted. It was then evident that Mr. Diamond had arisen from his bed and taken the whole remaining contents of the bottle, whether in one or more doses it is of course impossible to say, the first dose having been taken in the morning. He may have been stated that Mr. Diamond had been in the habit of taking large doses of chloral, and that when he found an insufficient effect from one dose he would supplement it by taking more. This habit was known to some of his friends, and he had on several occasions removed bottles of that medicine from his room, in order to prevent his taking what might prove to be an overdose. Mr. Tracy, who has attended him professionally, states that he has frequently known a similar case of chloral which to one unaccustomed to its use would have been dangerous. Another bottle, which had contained a decoction of Jamaica dogwood, a new and mild narcotic, was also on the table, but had been upon, so that it did not seem probable that any of its contents had been taken, and even if so a medical examination showed that this drug would not have had a deleterious effect. Mr. Tracy, at once despatched for several physicians, and on their arrival they gave no ground for hope, although efforts were made during the evening to counteract the effects of the dose, but without effect, as the patient remained insensible throughout and death ensued at the hour above stated.

Abraham Diamond, who was the grandson of a U. E. Loyalist, and son of Mr. John Diamond, now of this city, who survives him at the age of 89, was born in the Township of South Fredericburg, on the shores of Hay Bay, on the 5th of May, 1823, consequently he was in his 57th year. He attended Victoria College for a term and completed his education at the Victoria College, at which institution he carried off the \$100 prize offered for competition by the Governor General of that time. He commenced the profession of teaching at Thorn Hill, near Toronto, and subsequently engaged in the same occupation at Bloomfield, Prince Edward. Thence he removed to Belleville in 1853, and succeeded Mr. Hammond, on his death, as assistant to the late Mr. Burdon in the law office of Messrs. Burdon, Schell and Co. He continued to occupy this position with much success, some time in the year 1858, when he resigned and entered upon the study of the law in the office of C. P. Simpson, Esq. He was called to the bar at Hilary Term in 1862, and at once commenced the practice of his profession in this city, as a partner of W. W. Dean, Esq., now County Judge of the County of Victoria. He was severely endeared for some years, when it was dissolved, and Mr. Diamond became a partner with Geo. D. Dickson, Esq., until his brother Wellington passed his examination, when he became head of the firm of Diamond & Diamond, which partnership has only terminated by the lamented death of the senior member of the firm.

Mr. Diamond succeeded the late C. G. LeVoe as member of the Town Council for Kitchener Ward, on the 1st of January, 1867, and was a very useful member of that body, in which he filled the important position of Chairman of the Harbor and Town Property Committee. In September, 1868, he was appointed by the *Suffield* Government to succeed the late Smith Bartlett, Esq., who died in that year. This responsible position he occupied until the 1st of July in the present year, when his resignation, which had been some time before handed in, took effect. It is not too much to say that deceased was one of the most competent Police Magistrates in the Province. The bent of his mind was eminently judicial, and he was so fair and impartial as between litigants that very few of his decisions were appealed against, and in most cases when appeals were taken the Magistrate's judgment was sustained.

Deceased was also a member of the Board of Education for several years past, he being one of the members appointed by the County Council and subsequently by the City Council. As an old teacher he took a deep interest in educational matters, and his services were of much value to the Board, especially when questioned a legal character arose. He will be much missed in this capacity.

In military matters he also, for many years took a prominent part, having been appointed Lieutenant of No. 6 Company of the 15th Battalion when the city regiment was organized. He served with his company at Prescott during the Fenian raid, and continued his connection with it some years, finally retiring from the active force and being commissioned Captain of No. 7 Company of the Reserve Militia on the 20th of February, 1869, and this position he held until his death.

He was a member of the Masonic fraternity being connected with Moira Lodge No. 11, F. M. C., in which Lodge he filled various offices during several years past. He was also a Director of the Grand Junction Railway Company and was the first President of the native Canadian Society.

Deceased was for several years a power in political circles in this part of the country, as in 1856 he became editor of the *Halifax Chronicle*, then the organ of the "Reform party" in the County of Hastings, which connection he maintained until his appointment as Police Magistrate in 1865, or

for twelve years. As a writer Mr. Diamond was argumentative, logical and convincing, without perhaps being so forcible as some of his contemporaries, and being also a fluent and able speaker, he did his party yeoman service with both pen and tongue. When the Reform party was divided by the secession of the late Hon. George Brown from the Government, the *Chronicle* remained faithful to the position of the Government, and was a prominent figure in the Reform Convention for West Hastings in 1867, when he declared the views of his section of the party, and was largely instrumental in securing the nomination and election of Messrs. James Brown and Ketchum Graham as the Government candidates to the House of Commons and the Ontario Legislature respectively in opposition to the Reform nominees, who were the late Dr. Holden and T. D. Parley.

Mr. Diamond married in 1860, to a daughter of Mr. A. G. Coleman, and leaves a widow and a family of eight children surviving him. Generous, cordial and kind hearted, and most indulgent of fathers—the grief of the stricken family at being deprived thus suddenly of their friend and protector can be imagined better than described. In the death of Abraham Diamond, the city has lost one of the most intellectual—one of the most popular of her residents, and the hearty sympathy of the whole community will be extended to the family and relatives, mingled with deep regret at the taking of one who was a kind friend and an engaging and pleasant companion.

He will be particularly missed by his brethren of the legal profession, amongst whom he occupied a deservedly high position and with whom he was long and intimately connected. There was, we are informed, an insurance of \$5,000 upon the life of the deceased.

News Condensed.

—Yellow fever is increasing in Havana.
—Hon. M. Bowell arrived in Ottawa on Saturday.
—Shipments of grain this year show a great increase.
—The hardware trade in Montreal is improving.
—An address to Bradshaw is being signed in Montreal.
—The cotton spinners at Lowell, Mass., are still on strike.
—There are more than 60 Frenchwomen studying music in Paris.
—Electric light excursions are the order of the day now in Montreal.
—The Quebec Legislature was prorogued on the 24th inst.
—The rainfall in New York on the 23rd was the heaviest in eighteen months.
—The fourteenth anniversary of the oldest parliamentary assembly in the world.
—The Bishop of Ontario will shortly lay the corner stone of a new church at Mill Point.
—The new M. E. Church in Ottawa is rapidly approaching completion. It will cost \$20,000.
—The sales of Picton coal from the 1st of January to the 11th of July, this year, were 156,276 tons.
—Smoking furnaces are to be erected at St. Jerome, where a valuable discovery of iron has been made.
—On the night of the 25th inst., five stores in London were entered by burglars and a quantity of goods carried off.
—Cape news indicates a speedy outbreak and a fresh war. This exacerbates the feelings of the opponents of Sir Bartle Frere.
—Mrs. Mason, wife of the Hon. L. R. Mason died at Terrebonne on Saturday afternoon after a long illness.
—Immense quantities of ice are being exported from Montreal ice houses to the United States and the result is a scarcity of ice in Montreal.
—A well executed counterfeit of the ten dollar bill of the Merchants' Bank of Halifax was paid into the Picton Bank at New Glasgow last Tuesday.
—Imports for June, \$6,660,493; duty collected thereon, \$1,378, 902. Exports for month: Produce of Canada, \$3,684,226; produce of other countries, \$2,364,201.
—The export trade of St. John, N. B., for last year shows an increase of \$19,242 on the year previous, the increase being accounted for by the sale of timber in Britain.
—On the 24th, Mr. Atkins and his servant, Miss Dillon, were severely burned in Hamilton by the explosion of coal oil. The latter's injuries will probably prove fatal.
—The Cobourg Car Company is building two sleeping cars for the Canada Central Railway, which will be run between Ottawa and Toronto as soon as a night train is started.
—The knitting factory of Clay & McCosh, Paris, was destroyed by fire on the 24th inst. Ninety hands, mostly covered by insurance.
—The fire returns give the value of diamonds exported from the South African district in 1879 as \$18,428,000, the value of those obtained in 1878 being \$15,423,555.
—A young man from Scotland has invented a repeating rifle or magazine gun, which is believed to be superior to any now manufactured. It throws 13 shots in as many seconds, or about thirty per minute.
—The Directors of the Halifax sugar refinery have decided on issuing \$100,000 more stock, in addition to the original amount of \$300,000. This, it is expected, will be taken up by the present shareholders.

MORNING DESPATCHES.
AMERICAN.
COLUMBIA, O., July 26.—Albert Crippen on Saturday filed a petition to set aside the sale of the Columbus and Gallipolis Railroad to the Ohio and West Virginia Railroad for \$38,000, on the ground of fraud and irregular proceedings.

NEW YORK, July 26.—A prominent Canadian bank is credited with purchasing a million dollars worth of U. S. bonds last week. The pigeon race from Columbus, Ohio, to Jersey City, 500 miles, was won by Eaton in 44 hours, the quickest time on record.

Bertie Kenehan, aged 21, has become insane from religious excitement experienced at revival meetings at Talmage's Tabernacle, under the direction of Thos. Harrison, Evangelist. He has attempted suicide three times. A sail boat containing Capt. Robertson and two friends ran into a school of sharks in the bay yesterday. The sharks attacked the boat furiously, damaging it badly. After a lively battle with their assailants, during which one of the men narrowly escaped being bit, a breeze carried the boat out of danger.

Some fishermen caught four sharks in the bay yesterday with a hook and line. Benjamin Staines, one of the original abolitionists, died in New York yesterday, aged 82.

NOTICE is hereby given that a Court will be held, pursuant to the

"Voters' List Act,"

by His Honour the Judge of the County Court of the County of Hastings, at the Shire Hall, Belleville, on the

Second day of August, 1880,

at Eleven o'clock, to hear and determine the several complaints of errors and omissions in the Voters' List of the Municipality of the City of Belleville for 1880.

All persons having business at the Court are required to attend at the said time and place.

Dated the 23rd day of July, 1880.

H. NEWBERRY, Clerk of the said Municipality.

OTTAWA LADIES' COLLEGE. Conservatory of Music, WILL Re-open September 1st, with a full staff of Teachers in all the Departments. For Calendar and information, apply to the Principal, the Rev. A. F. KEMP, L.L.D., July 21.

THE THOUSAND ISLAND PARK, SEASON 1880. ON WELLSVILLE ISLAND, ST. LAWRENCE RIVER, NEAR CLAYTON, ALEXANDRIA BAY, N. Y., AND GRANVILLE, CANADA.

THE THOUSAND ISLAND PARK, SEASON 1880. ON WELLSVILLE ISLAND, ST. LAWRENCE RIVER, NEAR CLAYTON, ALEXANDRIA BAY, N. Y., AND GRANVILLE, CANADA.

PRIVATE FUNDS TO LOAN. A LARGE amount of private funds has been placed in the hands of the subscribers to

REAL ESTATE. at the lowest rates of interest, and upon terms to suit borrowers.

VALUABLE MILL PRIVILEGE AND Premises for Sale.

THE subscribers offer for sale one of the best Mill sites and water privileges on the River Moira, just outside the limits of the City of Belleville, a few rods from the Grand Trunk Railway station. The main travelling road from Belleville to the northern townships and villages runs through the premises, leaving three acres on the west side, embracing canal, excavated at a large cost, 400 feet long, 25 feet wide, and 10 ft. deep, with water time foundation; walls of mill 100 feet long, 6 feet wide and 4 ft. thick; foundation depth 6 feet, with necessary openings for six water wheels. Ten feet head of water, with the exclusive right to use the further shore for damming, giving the sole right to this magnificent water power at any point in a length of 150 yards on the river. A large amount of water-power available nine months in the year, and from 30 to 40 horse-power the rest of the year. On the east side of the road are six and a half acres of land, capable of being used in building log or being used in connection with extensive sawing and planing for yard purposes, or both. The above is one of the most valuable properties of the kind ever offered for sale in the Province. For terms and particulars apply to

TO Let or For Sale. A ROUGHCAST house on Lewis Street, in good repair, with outbuildings, and half an acre of ground, with orchard, and hard and soft water, &c.; next to house occupied by James Ross, Esq., License Inspector. Apply to

TO LET. THOSE premises on Front Street, in the City of Belleville, lately occupied by Alexander Morrison & Co., as a warehouse, first door north of Robinson's Bookstore. Apply to

 For Belleville—Daily, at 8 a.m., and 2 p.m.
 For Madison—Daily, at 2 p.m.
 For Bridgewater, Tupper, & Daily, at 2 p.m.
 For Trenton—Daily, at 3 p.m.
 For Pictou—Daily, at 3 p.m.
 The stages arrive in Belleville about noon each day.

Daily Intelligence.

BELLEVILLE, MONDAY, JULY 26.

Local Notices.

Notices under this title, at a time each insertion. After six insertions 5 cts. a line.

City and Vicinity.

CITY COUNCIL.—The Council will hold a regular meeting to-night.

POLICE.—Business has been very light since Saturday—only one arrest being made.

POLICE COURT.—As a mark of respect to the memory of his predecessor, the Police Magistrate to-day adjourned the business of the Police Court until to-morrow.

DEPUTY JUDGE.—Mr. E. B. Frazer, barrister, who has been appointed deputy County Judge for the time being, presided in the Division Court at Sidney Town Hall to-day.

STORM.—Heavy thunder storms passed to the northward of the city yesterday morning and afternoon, and in the evening there was a vivid display of lightning to the southward.

EXCURSION.—The steamer *Farnha* has been secured on behalf of the congregation of Christ Church, for their excursion to Mill Point on the occasion of laying the corner stone of the new Church of England being laid there.

A SUCCESS.—The excursion on the *Alexandra* on Saturday afternoon, for the benefit of the St. Andrew's Society's charitable fund, was a most gratifying success. The weather was fine, the attendance large, and all went merrily as a marriage bell.

NEW COMPANIES.—Application has been made for the incorporation by letters patent of "The Trenton and Bay of Quinte Navigation Company." Application has also been made for the incorporation of the "Decorative Navigation Company," with headquarters at Mill Point.

MORE BIG ENGINE.—There are now ten of the six-wheeled locomotives on the Grand Trunk, six of which are stationed at Belleville and four at Trenton. This class of engines has given the almost satisfaction, and additional ones are being turned out of the Company's workshops at Point St. Charles as rapidly as possible.

REPORTS UPON MECHANICS' INSTITUTES.—The Globe says: "It is intended by the Minister of Education that as soon as he can obtain the requisite information for adopting a uniform system of reports, Public School inspectors will be instructed to inspect and report upon Mechanics' Institutes in their districts."

THE THROUGH ROUTE.—In a communication to the Globe, Mr. D. S. Hutton, of Peterborough, writes: "As soon as the Midland Railway get their elevators at work at Midland and Port Hope and the Grand Junction at Belleville, there will be such a stream of grain over those roads as well as other products as will astonish those not conversant with the trade."

HOMES AGAIN.—The large excursion party which left here on the 12th by the steamer *Alexandra*, reached here yesterday morning by the Hastings, which was specially chartered to convey them from Rockport, some twenty miles west of Brockville, to this city. They report having had a most delightful trip, the only drawback to which was the melancholy death of Miss Potter at its commencement.

GRAND TRUNK EXCURSION.—The employees of the Grand Trunk at Belleville station will have their annual excursion next, the train will leave Belleville at 7:30 a.m., Montreal time, and will start on the return at 6 p.m. An extensive programme of sports and amusements has been provided, and as the Railway men are unequalled in this department, a most enjoyable time may be expected.

THE HANDFORD SCANDAL.

What the "Grass Widow" Says.

Toronto, July 25.—To the general regret, it appears that the Handford scandal about to break out afresh. The complaining deacons in this charge against Mr. Handford charged him with criminality with one Mrs. G., a grass widow, rather than in appearance. When the examination came on this lady had to be called to break out afresh. The complaining deacons in this charge against Mr. Handford charged him with criminality with one Mrs. G., a grass widow, rather than in appearance. When the examination came on this lady had to be called to break out afresh.

THE MARILLA EARTHQUAKE.

A dispatch from Marilla says another earthquake shook the town on Sunday, doing much damage. No details have been received. The total loss by the earthquakes is estimated at \$30, including 200 Chalmers. All most every family is homeless.

MIRAGE NOTES.

Mr. Kennedy, mining engineer, who was one of the most active mining engineers at the time of the first gold excitement at Madoc, returned to this village last Saturday. Mr. Miller, who represents a number of capitalists at St. Catharines, has commenced gold mining on lot 19, 9th Con. Mr. G. J. Pusey has leased 100 acres. Messrs. Geo. R. Henderson and A. H. Wallbridge part of Lot 2, in the 2d Con. of Madoc, on which there is a large deposit of magistral ore. He has commenced working the mine. Mr. Pusey will pay a royalty of 25cts. per ton on all ore raised.

Trenton Notes.

An elopement from here was nipped in the bud, on last Sunday afternoon, by the stern parent. A youth from the Bay City figured in the case. The names of the parties are withheld. Messrs. Gilmour & Co., intend, this fall, to erect another mill for the manufacture of saw, boards and blinds. Then they will have four different mills within the same yard.

Peter Ford has enlarged his paper mill to twice the capacity, on account of his increasing business under the new tariff.

On Wednesday night the barn of Mr. Emory Cooley, on the York Road, was broken open by some miserable scoundrel, who cut in pieces a new silver plated harness and also cut the top of his buggy. This is the second time such an outrage has occurred.

Thousand Island Park.

(From Our Own Correspondent.)

Thousand Island Park, N.Y., July 23rd, 1880.

We have been favored with most delightful weather here; a stiff breeze from the south west has been continuous and as it blows directly from the lake and river across the Park, it reduces the temperature to a refreshing and invigorating point.

To-day, I doubt not, is a hot one in Belleville, but at any rate of the park contiguous to the river the heat is tempered by the breeze that existance is a delight.

SWIMMING.

There are splendid facilities for bathing and swimming here, indeed to me one of the chief pleasures of the place are those same facilities. There is an admirable swimming bath for both sexes, but as one using it must necessarily go into the water in a bathing suit, I prefer to seek a nook where impediments may be discarded. I have just come out of the river after a half hour's swim. The water is just now at the right temperature. The feeling of lassitude, which bathing at this season in the dirty hot water of the Bay of Quinte produces, is not experienced; but on the contrary the whole physical system is toned by it. While I prefer bathing in the sea at Orchard Beach on account of the effect produced by salt water, apart from that and for downright pleasure, I choose the St. Lawrence.

BOATING AND FISHING.

The facilities for boating and fishing cannot be surpassed. Every evening about 700 boats are seen returning from trolling with well filled baskets of fish—chiefly pickerel, occasionally a few black bass and sometimes a mackinaw. A boat may be obtained for a whole day for a dollar and for a half day and by the hour in proportion.

The grounds are now well lighted at night, trees have been planted and beautiful flower beds have been laid out by Vick of Rochester. The square in front of the office and dining room is now very attractive and hundreds of loungers are continually enjoying the scene. A favorable place of resort too, particularly in the evening, is the promenade at the dock. During these lovely moonlight nights the place is crowded.

I have noticed that some American ladies, I suppose fearing that the air here might lead to kiss the blush of health upon their cheeks, have supplied themselves with rouge and powder and supply what nature has denied them, a good color and clear complexion. Painted cheeks and colored hair are such miserable counterfeits as are such easily detected forgeries that it is astonishing that women resort to such fantastic tricks.

THE SERVICES.

Two Canadian preachers, Rev. M. L. Pierson of Ottawa and Rev. D. V. Lucas of Montreal discoursed on Sunday. Several lectures on scientific subjects have been delivered this week. They were of a high order and well worth hearing.

RECREATION.

Lectures at Alexandra Park, distant from this place about 6 miles, this afternoon, should I go I shall make a few notes for the benefit of your readers.

THE TENTH REGIMENT TO GO TO CANADA.

A cable dispatch says: "There is a report that the United Service Club that the 100th Canadian regiment, which is to be sent home at an early date, and will form one of the new regiments for permanent service in the Dominion of Canada."

Captain John Pender of the steamer *Decorado*, plying between Napanee and Pictou, and so well known among the mariners on Lake Ontario and other places, died after a short illness at Napanee on the 26th inst.

Mike Carrell, the convict who drowned Chief Power of Winnipeg, a native of Ontario, was looked upon by the police as the hardest character in the city. He has been mixed up in shooting affrays and spent a term in the Central Prison.

Mike Carrell, the convict who drowned Chief Power of Winnipeg, a native of Ontario, was looked upon by the police as the hardest character in the city. He has been mixed up in shooting affrays and spent a term in the Central Prison.

A Wonderful Discovery.

For the speedy cure of consumption and all diseases that lead to it, such as tubercular cough, neglected Croup, Bronchitis, Hay Fever, Asthma, pain in the side and chest, dry hacking cough, tickling in the throat, Hoarseness, and all other chronic or lingering diseases of the throat and lungs, Dr. Kline's New Discovery has no equal and has established for itself a world-wide reputation. Many leading physicians recommend and use it in their practice. The formula from which it is prepared is highly recommended by all medical journals. The clergy and the press have complimented it in the most glowing terms. Go to your druggist and get a trial bottle free of cost or a regular size for \$1.00. For sale by J. A. Clarke & Co.

BUCKLEY'S ARTIFICIAL SALVE.

The Best in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give perfect satisfaction in every case or money refunded. Price 25 cents per box. For sale by J. A. Clarke & Co.

MARRIED.

On July 25th Rev. A. Martin, at the residence of C. W. Lawrence, of Bidney, Mr. JOHNATHAN SMITH, of Bradford, to Miss MARY ELIZA BERRY, of Bradford.

Trains run by Belleville time.
R. H. BRENNAN, Superintendent.
May 31st, 1880.

MAN-HOOD: HOW LOST, HOW RESTORED.

WE have recently published a new edition of Dr. Oliverwell's Celebrated Essay on the Cause and Cure of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excess.
Price, in a sealed envelope, only 6 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.
Address:—
THE OLIVERWELL MEDICAL CO.,
41 Ann St., New York.
Post Office box 4586 501y

Arrive from Hastings, Campbellford and Stirling, at 10.30.
Trains are run by Belleville time.
K. H. BRENNAN, Superintendent.
May 31st, 1880.

MANHOOD: HOW LOST, HOW RESTORED.

We have recently published a new edition of Dr. Culverwell's Celebrated Essay on the radical and permanent cure (without medicine) of Nervous Debility, Mental and Physical Incapacity, Impediments to Marriage, etc., resulting from excess.
Price, in a sealed envelope, only 6 cents, or two postage stamps.
The celebrated author, in this admirable Essay, clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure so simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.
This Lecture should be in the hands of every youth and every man in the land.
Address: THE CULVERWELL MEDICAL CO., 41 Ann St., New York.
Post Office box 4586 501

THROAT & LUNG INSTITUTE.

253 Woodward Avenue, Detroit, Mich.
M. Hilton Williams, M. D. PROPRIETOR.
(Graduate of Victoria College at Toronto, and Member of the College of Physicians and Surgeons of Ontario.)
Over 16,000 persons treated since the establishment of our Institute at Detroit, in the year 1870.
CHRONIC LARYNGITIS.
The prominent symptoms of this disease begin with those of an ordinary cold, only that it is always attended with more or less hoarseness. It is scarcely ever an original disease, but is the result of a cold, or of an inflammation of the throat, or of a disease of the lungs, or of a disease of the stomach, or of a disease of the bowels, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or of a disease of the bladder, or of a disease of the uterus, or of a disease of the vagina, or of a disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or of a disease of the vas deferens, or of a disease of the ureter, or disease of the prostate, or of a disease of the testis, or of a disease of the epididymis, or of a disease of the spermatic cord, or

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, JULY 28

Local Notices.

Notice under this head, a five-cent insertion. After the first insertion, 2 1/2 cts. a line.

We are glad to see the people of Belleville with smiling faces again. They have learned how to save money, as economy is the key to wealth. Just step to Smith's, Campbell St., and get your old suit done over to look like a new one. Now is the time, while money is scarce and time is hard to save yourself from buying a new suit if you can.

City and Vicinity.

To PAINTERS.—Tenders are asked for the painting of the Grand Junction Railway bridge at Campbellford. See the advertisement.

CITY COUNCIL.—A special meeting of Council will be held to-night. There is a good deal of important business for transaction.

BARLEY.—The first barley of the season—500 bushels—has been sold in Peterboro to Mr. Calcutt. It was grown by Mr. Alex. Roseborough, in the township of Smith, and is, besides being unusually early, a very fine sample.

DOGS.—So far, 161 dogs have been registered. A large addition will shortly be made to this number, as the police are notifying owners of canine property that they must register and pay the tax upon the same.

BURGLARY.—Between 6 and 6 o'clock yesterday a burglar entered the office of the Ontario Business College, but fortunately found no reward for his enterprise. A drawer had been forced, but as nothing of value had been found, the thief had evidently retired in disgust.

LIFE ASSURANCE.—The following practically illustrates the benefit derived from a policy in the London and Lancashire Life Assurance Co.: Policy 9624 J. H. Hamly, \$3,000, premiums paid \$186.48, showing an actual profit, on this investment of \$2313.52.

CRICKET.—A match was played at Napanee yesterday, between Pictou and Napanee, the score standing: first innings, Pictou 51, Napanee 47; Pictou second innings 74, Napanee 37, with four wickets down when time was called. The match was decided by the first innings.

WORSE THAN BELLEVILLE.—The Belleville City Council has been noted for its long-winded discussions and lengthy sittings, but Kingston is getting even worse. At its meeting on Monday evening the Council had, what may be called a regular field night, the session lasting until five minutes to two o'clock in the morning.

ATHLETICS.—Those clever, but by no means too honest athletes, Duncan C. Ross and E. W. Johnson, are in Boston, where they have made a "match" with Lynch and Daly, of New York, to contest fifteen items, including heavy and light weight competitions. As the two Irish athletes are of the same kidney as the Scotchman and the Canadian, the affair is beyond doubt a hippodrome.

ENGAGING MEN.—The Peterborough Review says:—"One of the gentlemen who has a contract for a section of the Grand Junction Railway has been in town for several days engaging men to work on it. He experiences considerable difficulty in procuring the right sort, most of them seeking employment near having done any work of the kind before. The wages paid are, we understand, \$1.12 per day, having been recently raised from \$1 to that figure. There are now altogether about 200 employed on the line."

IMPROVEMENTS AT THE STATION.—Two new lamps have recently been erected within the Grand Trunk station yard, one being placed near the foot entrance and the other near the platform of the freight shed. These, with the other lamps, will give ample light to all parts of the yard used by the public. Recently considerable improvement has been made to the flower garden at the east end of the station—the grass, which is kept close cut, is in capital condition—there is a large tank in which numerous gold fish sportively play in their native element—and the flower beds are filled with beautiful plants, and flowers in full bloom. Evidently considerable care is taken in keeping this fine plot in order.

THE TORONTO AND OTTAWA RAILWAY.—The Peterborough Review of Tuesday says:—"Messrs. J. G. Bailey and A. L. Hogg, the engineers who have charge of the survey now being made for the Toronto and Ottawa Railway, from Peterborough to Toronto, are at present in town. During a conversation with Mr. Bailey, our reporter learned that the party under his charge have already surveyed the proposed line for about three miles from town. He expresses himself as sanguine of the early commencement and completion of the line, and says the gentlemen at the head of affairs now, evidently mean business, and informed him that they intend to construct the road from Toronto to about two or three weeks."

YACHTING NOTES.—The Katie Gray will leave on Saturday for a cruise amongst the Thousand Islands. The Globe of yesterday says:—"The yacht Bloodhound arrived in Toronto harbor on Sunday evening, from Trenton. She is commanded by Captain Cuthbert, the builder. The vessel was brought up by appointment with some gentlemen from Chicago, who intend to purchase her. But their engagement compelled them to leave before the yacht arrived. The Bloodhound is a sixty-ton craft built of first-class materials; displays fine and graceful lines; and is altogether, a handsome vessel. There is cabin accommodation for fourteen persons. The yacht draws five feet of water. The Oracle and Bloodhound are expected to start to-day or to-morrow for Chicago, to enter for the yacht race there."

ROWING CLUB.—The next race in single and pairs, for the championship of the Rowing Club will take place on Friday afternoon at 4 o'clock. A good deal of practice rowing is being indulged in, and interesting contests are likely to result.

G. T. READING ROOM.—Immediately opposite the platform of the Grand Trunk Station is the Reading Room and Library belonging to the Railway employees at Belleville. It is a large and commodious room, with comfortable chairs and lounges, having in the centre a table on which can be found most of the leading papers of the Dominion, with several British and American illustrated newspapers, and a number of popular periodicals and magazines. The Library contains over three hundred volumes, embracing works on science, engineering, history, biography, travel, novels, &c., and judging from their well-worn appearance, evidently are not allowed to accumulate much dust. The Reading Room has about two hundred subscribers, and affords a good source of enjoyment and benefit to the large number of railway men who make Belleville their home.

RAY OF QUINTE NAVIGATION.—Notice is given in the Canada Gazette of an application for the incorporation of "The Quinte and Bay of Quinte Navigation Company." The objects for which incorporation are sought are: to purchase and own steamers, and to run the same on the Bay of Quinte, and other navigable waters of Canada, and to construct and purchase land, docks, wharves and warehouses situated on said bay and navigable waters. The operations of the company are to be carried on in the Province of Ontario and the Province of Quebec, and the chief place of business of the said company is to be at Trenton, in the County of Hastings, and Province of Ontario. The capital stock of the said company is to be \$50,000, in 425 shares of \$20 each. The applicants are as follows: Jonathan A. Pote, of the village of Trenton, master of the steamer Parnassus; James W. Anderson, Philip Roblin, Wm. G. Stafford, and John Howell, all of the township of Amherstburg, in the County of Prince Edward, in the Province of Ontario; farmers; said five to be the first directors of said company.

Board of Education.

TUESDAY, July 27, 1880.

PRESENT.—Mr. W. A. Shepard, Chairman, and Messrs. W. L. Glass, Richard, Johnson, Newbery, I. Diamond, Hudson, Rev. Mr. Burke and Dr. Tracy.

Applications for position of teacher were read from Misses Fleming, Powell and Ida Jack, as well as from several teachers, asking for reappointments.

Letters from Misses Templeton and Furnival were read resigning their positions as teachers.

The Chairman said he would omit going through the regular order of business, as it was not the intention to do more than to pass a resolution of condolence to the family of their late lamented fellow Trustee, Mr. Abraham Diamond, and then adjourn until some night next week.

Mr. Willis thereupon introduced the following resolution, remarking that in the death of Mr. Diamond the Board had lost a valuable counsellor and a useful member:

Moved by Mr. Willis, seconded by Mr. Glass,

Whereas, it has been the Divine will that our esteemed fellow Trustee, Abraham Diamond, Esquire, should be removed from our midst, and his valued counsellor be for the future lost to this Board;

Be it therefore resolved, That the sympathy of the members of the Board be tendered to his widow and family, and that we pray that the Great Comforter may alleviate her and their sorrow; and that a copy of the above be sent to Mr. Diamond.

The motion was carried unanimously.

On motion of Mr. Johnson, seconded by Mr. Newbery, the Board adjourned to meet on the morning of the 29th inst. at 8 o'clock.

STIRLING NEWS.

(From Our Own Correspondent.)

On the 26th, about 3 p.m., the normal state of the village was aroused by the alarm of fire, which proved to be true in fact, and the sufferer, Mr. Hiram Smith, has the sympathy of the people. It appears some members of the family discovered smoke in the upper rooms, and at once raised the alarm, and as the house (a very nice brick) was situated on the outskirts of the village the villagers saw the smoke issuing from the roof before word had reached them, and soon there was a rush of people to the fire with buckets, &c., and some willing hands tugged the fire engine to the scene. As the house is some distance from the mill pond, a line of water carriers was soon formed and the engine did good service by its aid and the firemen's exertions, which were put forth in order. Parts of the walls were partially saved. About all the household effects were saved, as the fire originated from a spark from the chimney. The loss will probably be covered by the insurance, which I learn is \$1,200 on building and contents.

The farmers generally complain of the "catching" weather—and very much extra work is caused by the many rain showers—besides causing an inferior quality of crop.

POLICE COURT.

(Before T. HOLDEN, Esq., P. M.)

WEDNESDAY, July 28.

THE LIQUOR LAW.

Sarah Maracle, of Mill Point, pleaded guilty to selling liquor without license and was fined \$20 and cost.

James Mackie, for selling during prohibited hours, was fined in a singular amount.

John Dunn, charged with assaulting Sarah Jane Healy, was acquitted.

A Fast Press.

30,000 an Hour.

Toronto, July 28.—The Scott Perfection Press, built for J. Ross Robertson, of the first time this press was put in operation for the first time this afternoon. It ran at the rate of thirty thousand Telegrams per hour, and is a marvel of mechanism. On the day of the Press Association visit to Toronto in August, a special exhibit of the machine is to be made for the members of the Press Association.

News Condensed.

The British will vacate Cuba in August.

Earthquakes continue in the Philippine Islands.

Moravian Missionaries have been expelled from Germany.

The Lachine Canal strikers have gone quickly back to work.

Kingston is to have its Civic holiday on the 18th of August.

Eighty-six laborers of the Canada Pacific Railway arrived by the Marquette.

On the 27th inst., Gordon Patterson, of Chatham, was gored to death by a bull.

On the 27th inst., Wm. Frookwood, of Walkerton, was gored to death by a bull.

The straits at St. Anne, Q., was visited last week by upwards of 7,000 persons.

The Canada Medical Association is to meet in Toronto on the 1st of September.

The Manitobans are excited by the arrival of the first potato-bag in their province.

The Roumanian Government has refused to grant the extradition of a number of nihilists.

On the night of the 26th inst., the store of John Cowan, Ottawa, was robbed of \$270 in money.

A Lacrosse match is to be played in Montreal on the night of the 10th of August by electric light.

Nearly three hundred upper portion of Empire City, Oregon, was burnt on Monday. The loss is over \$50,000.

The Kingston City Council has made a grant of two hundred dollars to the Midland Central Fair.

The York County Orange Lodge realized a profit of \$800 by the trip to Hamilton on the 12th July.

On the 26th inst. the steamer Capt. Cragg, of the schooner E. W. Rathbun, was drowned off Cape Cod.

Ottawa lumbermen report that the prospect for a large fall trade in sawn lumber is excellent.

All the Kingston taxes for 1879, with the exception of \$30, have been collected. The amount levied was \$80,000.

The Governor-General, it is said, will shortly make a two weeks' tour in the Maritime Provinces.

Hon. Mr. Langens inspected the Customs House, Port of Montreal, and other public buildings in Hamilton on the 26th.

The authorities of Nankin, China, have prohibited the use of American Kerosene on the ground that it is dangerous.

Mary Dillon, of Hamilton, who was injured by a coal oil accident on the 26th inst., died on the following day in great agony.

The Minister of Public Works visited the public buildings in Toronto on the forenoon of the 27th and in the afternoon inspected the harbor.

A collection of Manitoba exhibits made for the department of Agriculture, and to be sent to Great Britain, will arrive at Ottawa in September.

It is said that the Grand Trunk Railway Company are contemplating the erection in Montreal of works for the manufacture of cars and engine wheels.

It is rumored that Vanderbilt is trying to get his revenge on the Grand Trunk by promoting the St. Lawrence Tunnel and South Shore Railway scheme.

There are one hundred cases of small-pox at Camden, N. J. Fifteen new cases were reported during the twenty-four hours ending at six o'clock last evening.

On the 25th inst. three officials of the Kittymen colony at Pottsville, Pa., went down into the mine to examine its ventilation, and were choked to death by foul air.

On the 25th inst. a steamer, at Quebec, the vessel of manum shipping at that port have risen to \$15 a month. A large number of desertions are reported, in consequence.

The Grand Trunk detective at London states that Chisholm, the notorious horse thief was let out of Jackson State prison, Michigan, five months ago, and is reported to be operating near Windsor.

A proclamation has been issued by the Lieutenant-Governor offering a reward of \$250 for the arrest of William Henry, charged with the murder of John Morrison at Bearbrook county of Russell, on May 25th.

FROM INDIA.

A Great Disaster.

A British Brigade Annihilated.

LONDON, July 28.—In the House of Commons to-day, the Marquis of Hartington, Secretary for India, announced the receipt of a telegram from Bombay, which reports a terrible disaster in the annihilation of General Barrow's brigade at Candahar.

Barrow's brigade, which is a British Brigade, was sent by the Governor of Bombay, says that Major General Primrose telegraphs to-day from Candahar as follows:—"Gen. Barrow's force is annihilated. We are going into the citadel."

The Marquis of Hartington added that General Phayre has been instructed to collect what forces he can and march to Candahar. I have telegraphed to Simla to send another brigade if it is necessary.

AFTERNOON DISPATCHES.

LONDON, July 28.—At Goodwood meeting to-day the race for the Lennox stake was won by Lagrange's Phoenix, P. Lord's Parole, 2nd, Stradford's Gil Blas last. Only the three ran.

The Bolton cotton operatives at a secret meeting on Monday, resolved to continue the work under protest, and not renew contracts terminated by notices already given, so as to be prepared to take the first favorable opportunity to insist upon an advance in wages.

LONDON, July 28.—There is reason to believe that the House of Lords will not reject the Compensation Bill. The Conservative leaders are perfectly well aware that if they reject the bill, they will give a new cry to the land agitators, and are therefore disposed to shrink from the responsibility of such a serious step. It is believed that many Whig and Conservative peers will abstain from voting on the bill.

MURKIN, July 28.—A London correspondent says there is no truth in the report that Queen Victoria wrote a letter to the Sultan.

KINGSTON, Jamaica, July 28.—Rev. Enoch Dattall has been elected by a large majority of the Church of England in Jamaica, Bishop of Jamaica, in succession to Toner, resigned.

New York, July 28.—Tanner enters the 31st day of his fast in apparently bright, good spirits. In the past twelve hours he consumed less than a gill of water. During the morning, after resting from his usual drive, he marched around the enclosure in the hall 25 times; distance nearly half a mile. He ate was firm and his step elastic.

WEATHER REPORTS.

Toronto, July 28.—Probabilities for the next twenty-four hours: for the lower lakes, light to moderate winds, and fine weather, with much change in the temperature.

WINDHURST, July 28.—Indications: lower lakes, clear or partly cloudy, stationary or higher temperature.

BUCKLEY'S ARCTIC SALVE.

The Best Salve in the world for Cuts, Bruises, Sores, Ulcers, Gums, Rheumatism, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This salve is guaranteed to give permanent relief in every case of money refunded. Price 25 cents per box. For sale by J. S. Clarke & Co.

A Wonderful Discovery.

For the speedy cure of consumption and all diseases that lead to it, such as Asthma, Coughs, neglected Colds, Bronchitis, Hay Fever, Asthma, pain in the side and chest, dry hacking cough, bleeding in the throat, Hoarseness, Sore Throat, and all chronic or lingering diseases of the throat and lungs, Dr. King's New Dispensary has no equal and has established itself a world wide reputation. Many leading physicians recommend and use it in their practice. The formula from which it is prepared is highly recommended by all medical journals. The elergy and the press have complimented it. In the most glowing terms it is called a "trial" and get a trial bottle free of cost or a regular size for \$1.00. For sale by J. S. CLARKE & CO.

"TRANQUIL" the newest wonder for whitening the teeth, and giving refreshment to the mouth. To try it is to become a friend to the piquant, irresistible, popular Delicacy of the day.

DIED.

At the residence of his son in Belleville, on the evening of Tuesday, the 27th of July, JAMES DUNNETT, of Pakenham, in the 76th year of his age.

In Belleville, on Monday, the 26th July, at his late residence, Charles St., ELLIABETH ANN, beloved wife of John Corbett, aged 41 years, 4 months and 16 days.

Commercial.

Cheese Markets.

1 CORNHILL, July 27.—Only twelve factories registered 2,250 boxes, mostly first half of July make. The factories in this section have sold and shipped the first half of July, hence the small offerings. 10s and over was offered for July cheese and returned. 1,320 boxes were sold at 10s to 10s 10/10; the bulk at 10s. Cable today was 54s, being 2s less than last week.

RELEVANCE, THURSDAY, JULY 29.

POLITICAL NOTES.

A FAMILY QUARREL.

The Globe and the Hamilton Times have fallen foul of each other on the University Professors' question. The latter strong-ly attacks the course of the Minister of Education for passing over Canadian scholars, and it is said, "satisfying at the shrine of assuagement." The Globe, which of course defends Mr. Crooks, attempts to annihilate the Reform organ (Liberal wing of the party) of the Hamilton City, by applying to the Times' criticism the forcibly expressed opinion that "crystallization of refined wisdom." This is about equal to the proud scorn which was lavished on Mr. Mills when he sought to recognize the Senate, and was dubbed a "meagrely educated schoolmaster." The quarrel is a very pretty one, and as the parties to it are rivals, it will not do to let it pass. Although the public are not likely to take the side which the Times has chosen.

THE PRICE OF WHEAT.
 "Wheat is quoted at 80 cents for No. 1 hard, in Fargo, Dakota, and 85 to 90 cents in Winnipeg," says the Hamilton Spectator. "All the advantages, therefore, are not in favor of settling in Dakota in preference to our Northwest, nor are the latter likely to be tempted to make out. The price of wheat is rather an important matter to farmers, and those of Canadian territory have the advantage in it." We would also direct the attention of the Grit press to the fact that No. 2 spring wheat was yesterday quoted in Chicago at 80¢ for cash, and in Toronto at 81¢ to 81½¢, or 25¢ and 26¢ in favor of Toronto. Let them found an argument on these facts against the N. P., if they have ingenuity enough to do so.

THE COAL DUTY.
 The Halifax Herald, in replying to a local contemporary, thus effectively disposes of the howl raised by the Grit press against the duty on coal:—"If the duty is taken off coal, it will be levied upon something else that will yield an equal amount, or the revenue will be minus that sum. We have already had enough of the era of deficits,—quite as much as our credit will stand, so we cannot suppose our Government doing with any less revenue than what is sufficient to pay the ordinary expenditure of the country. So when our contemporary talks about doing away with this, that and the other duty in order to 'reduce taxation' it is simply talking unmitigated nonsense."

Afghanistan.

A fearful disaster, details of which appear in other columns, has befallen the British forces in Afghanistan. We do not say that the massacre has been invited by the abandonment by Mr. Gladstone's Government of the conquests made in Afghanistan under the direction of the late Government, but certainly the effect of the evacuation of Kabul and other important places must have given to the warlike hordes of Afghanistan the idea that Britain found their entire subjugation impossible, and have caused the previously gained courage to revive, and their native ferocity to reassert itself. There will be those who will sympathize to a certain extent with the Afghans on the assumption that they slew our countrymen in defence of their liberties and their native land; but the massacre of which they have been guilty, is not war, with the practices of which their recent experiences in combat with the British troops have given them a thorough acquaintance. The destruction of General Burnes' force is not, perhaps, to be placed on the same level as savage brutality as the Khyber Pass massacre, or the massacre of Cavagnari, the British Ambassador, and his retinue at Kabul, but it is a most horrible occurrence—a slaughter by wholesale of defenceless of the rules of war, and as such will call for a stern reckoning. And we now deem that Afghanistan must be placed under British rule as conquered territory, after its bloodthirsty inhabitants have been taught the lesson which they so richly deserve, and upon which the British nation will insist.

The Professional Sculling Race.

TISDALE AN EASY WINNER.

A sculling race, which was announced as for \$1000 a side, but which was in reality only an exhibition affair, took place at Redwood yesterday evening. The competitors were Joseph Tisdale, of this city, and James R. Russell, of Redwood. The course was laid out from two lines a short distance west of Redwood to two other places, a mile to the eastward, and return. There was but a small attendance of spectators, of whom a few were from this city.

The race took place between 7 and 8 o'clock, when the water was beautifully smooth and scarcely a breath of air was stirring. A fair start was effected, and after the first couple of strokes had been pulled it was apparent that Tisdale could win by a large margin. The time given out was 17m 45 sec, and at the close of the several oars the Belleville visitors made the best of their way home.

THE RIVER.—The match between the Prince Edward and the Association of the 40th Battalion is to take place here to-morrow. The Prince Edward will arrive per steamer *Arcton*, at about 10:30, and so soon after their arrival as possible the match will commence.

An ounce of prevention is worth a pound of cure, don't wait until you are troubled with a disease that may take months for you to recover from.—Boston Globe.

CITY COUNCIL.

WEDNESDAY, July 28.

A special meeting of the City Council for general purposes, was held this evening at eight o'clock.

Present: His Worship the Mayor, Aldermen Jas. Smith, St. Charles, Lingham, Grant, Vanousen, Ostrom, Earley, McIninch, Grant, Hamilton, Wallbridge, A. L. Smith, Petrie, Cantello, Jellett and Robertson.

The minutes of the last meeting were read and approved.

COMMUNICATIONS, &c.

The following were presented and read: From Thomas Hamilton, tendering his resignation as Alderman for Ketchikan Ward.

From H. K. Lee & Co., of Madoc, offering to supply salt for the wants of the city for payment or road purposes.

From Joseph Hill, of the Six Nations Indian, asking a grant in aid of the Grand Memorial Fund.

From the Toronto General Hospital, giving the rate per day for treatment therein.

From A. G. Northrup asking for payment for lots used in the cemetery by the city.

From James Brown and others, asking for the grading of the street near the Grand Junction Railway, between Ashley and Brown Streets.

From Albert Stapely praying for remission of taxes.

From George Boulter to a like effect, or an abatement thereof.

From Frank Dolan and others requesting the erection of a fire stand near Pringle's place.

A large variety of accounts were presented, and with the exception of the communications of Messrs. Holden, Boulter and Brown, which were allowed to lie on the table, all were referred to their respective Committees.

REPORTS.

The Finance Committee reported that Hardy's petition was referred to the Collector; that S. Holmes be refunded a fine imposed under the provisions of the snow by law; that T. R. Bentley be paid \$2 per day for his services; that the Street Surveyor repair the sidewalks and crossings throughout the city where necessary; that the contract for lumber be given to Flint & Holton, and that for labor be awarded to J. W. Walker. A number of accounts were recommended to be paid, and \$8,000 was asked to be voted for the use of the Board of Works.

The Board of Works' report asked for the payment of some accounts; also the petition of Downey & Preston for permission to lay down a side-track to their warehouse was accepted, to provided it was put on the north side of the warehouse.

From the Printing Committee, recommending the payment of several accounts, and stating that the contract for printing the receipts and expenditures had been given to McCullough & Co.

INQUIRIES.

Ald. Holden asked when the Harbor and City Property Committee would be called to meet. He did this because a Government official was now here who was anxious to know the views of the Council in regard to improving the harbor.

Ald. Robertson said he had been in daily conversation with the Government engineer on this subject.

Ald. Holden said the official wanted the opinions of the Council and the practical men of the city in regard to the harbor and particularly in regard to the island.

Ald. Robertson said the engineer could do nothing until the logs were out of the harbor.

And then said the ratcatchers generally were anxious to get information relative to what would be done.

Ald. Holden was quite willing to call the Committee together to consider this matter.

Ald. Ostrom asked if the Board of Works were going to do anything this summer.

Ald. Lingham answered that they would.

Ald. Robertson asked when the estimates would be introduced.

Ald. Jellett said he was at work on them now, but he could not complete them until he had learned the receipts from harbor dues and the sum that would be given the Board of Works for expenditure.

Ald. Petrie asked if there was a prospect of the Water and Gas Committee being called together, as the residents of Foster Ward were desirous of obtaining a supply of water.

He had been put off before and had been playing on the old buoy since last spring with the hope of having his request granted, and now he wanted something done to alleviate the wants of the thirty souls in his Ward.

Ald. Hamby said he would ask the Committee to meet the Hon. Robert Read and confer with him for the purpose of obtaining a supply for a part of Foster Ward from the spring on his premises on Dundas Street.

Ald. Petrie said he had been told that the hospital had been lately wrecked by boys, but lately it had been nailed up and made secure.

NOTICES.

Ald. Petrie gave notice of a motion authorizing the Treasurer to pay the policemen their monthly salaries on the first of each month.

Ald. Jellett said the motion was altogether out of order, as the Council had nothing to do with the force; the Commissioners were the persons who made the requisitions for the men. He raised a point of order.

Ald. Ostrom gave notice of a motion asking the Finance Committee to investigate certain accounts and claims made for and against the city.

MOTIONS.

Ald. St. Charles moved, seconded by Ald. Robertson, that this Council at this meeting hereby express its sympathy with the family of the late Alderman Proctor, who was always a zealous representative of the City. Carried.

Ald. Jellett moved, seconded by Ald. Robertson, that Thomas Holden's resignation be accepted.—Carried.

Moved by Ald. Jellett, seconded by Ald. Robertson, that in paying with Mr. Holden, this Council express its regret at his severance from this body.

The motion was carried.

Ald. Jellett moved, seconded by Ald. Hamby, that in view of the vacancies now existing in Coleman and Ketchikan Wards, the Mayor instruct the Clerk to take the necessary steps to have them filled.—Carried.

WAYS AND MEANS.

Council went into Committee of the whole on Ways and Means—Ald. Lingham in the Chair.

All the classes in the report of the Finance Committee, with the exception of the last of \$8,000 for the Board of Works, were passed without comment.

News Condensed.

The strike on the Lachine Canal works continues.

The Winnipeg lock bridge was completed yesterday.

The Hon. Mr. Aikins is acting Minister of the Interior.

The crops from Southern Manitoba are very favorable.

The Silver Lake mine is turning out quantities of rich ore.

—Louisbourg Governor Wilnot left Ottawa yesterday for Alexandria Bay.

—It is said that Mr. Latham will be the Reform candidate for West Toronto.

—Captain Scott, of Winnipeg, is in the field as the Conservative candidate for Selkirk.

The Treasurer of the town of Longueville is delinquent in his cash to the amount of \$2,485.

—A Mr. Cross at Newmarket, committed suicide on the 27th inst by taking Paris Green.

—Captain Murray has obtained the Government contract for dredging Toronto harbor at \$7,500.

—To transport \$2,000,000 of silver coin from Philadelphia to San Francisco, it costs \$30,000.

The Hon. Mr. Baby is acting Minister of Justice during the absence of the Hon. James McDonald.

—Over four hundred chicanes recently arrived at Victoria, B. C. from the land of the Colonies.

The Fenian had a great meeting at Manchester on the 28th inst. The speeches were full of blood and thunder.

—A man named Ryan, employed by Hamilton Bros., on the Ottawa, was drowned while driving logs near the Desert. His body has been recovered.

—The town of Seaford had a grand celebration on the occasion of opening their water works on the 27th inst. The water works cost \$12,000.

—A hail storm which visited portions of Wisconsin on Sunday, killed thousands of prairie chickens and destroyed a large amount of grain. Hailstones were picked up which weighed a pound.

—A table of stations on the Port William section of the Canada Pacific Railway shows that it is 110 miles from Port William to Selkirk, and 490 to Winnipeg.

—Dr. McKechnie has been in New Brunswick enquiring into the cause of the death of cattle in that Province. He believes the disease is one that can be kept within local bounds. A large number of cattle have died.

—The French astronomer Flammarion, accompanied by his wife and four sons, started from Paris late on Tuesday night in a balloon on a long aerial trip, which is to last two nights and a day. They proceeded in the direction of Germany.

—A terrible fight occurred on the 26th inst. at Lucan. A young man named James Feeley, a witness in the Biddulph case, came into the village and beat an ineffective old pedlar named James Feeley, who was the proprietor of the hotel and kicking him in a brutal manner. The proprietor, Mr. Fields, interfered and was in turn brutally assaulted.

MORNING DESPATCHES.

AMERICAN.

NEW YORK, July 29.—During the past two days Rockaway Beach, almost its entire length, has been strewn with garbage and drift thrown from dumping scows, and floated in by the tide. The stench is intolerable.

The damage caused by the army worm on Long Island is small compared with the mischief done by the cabbage worm and another pest, which has attacked the hedges.

Tanner yesterday, contrary to the advice of physicians, drank some mineral water. He weighed 2 lbs. less the day before, and showed more than ever before the effects of the terrible strain his system is undergoing.

The Tribune's Washington despatch says the losses of the National Banks during the six months ending March 31, aggregated \$5,300,000, of which \$1,500,000 was accounted for depreciation of premium in U. S. bonds held by the Banks. The aggregate losses were considerably less than in any of the preceding six months for the last two years, the average being nearly double that reported above.

Arrived, City of Bristol, from Liverpool. SANTA FE, July 29.—Advices from Mexico state that on the 21st inst. Col. Valles, in command of 370 cavalry and 100 infantry Federal troops, of Mexico, attacked the Apaches, under Victoria, 40 miles from Fort Quitman. The battle was indecisive. The Mexicans lost 3 men and 10 horses.

The Indians lost four warriors and six horses. On the 26th the Mexicans again attacked the Indians in the Pine Mountains, fifty miles from the line. After a long fight the Indians retired; their loss is not known. The Mexicans followed and killed Col. Valles.

CHICAGO, July 29.—Preparations on a magnificent scale have been made for the reception of the Knight Templars at the Triennial Conclave here, beginning August 16th. The procession will number 15,000 to 25,000, and a hundred thousand invitations have been issued to a grand ball at the Exposition building. \$4,000 in prizes will be awarded for drilling.

The St. Lawrence Tunnel.

Vanderbilt's Rumored Connection with the Scheme.

MONTREAL, July 27.—It now appears that Vanderbilt is the power behind the throne in the matter of the South Shore Railway and Tunnel Company's projected bore through the bed of the St. Lawrence from Hochelaga to Longueville. That is, if the money runs through South Eastern Railway sources to be relied upon. The story goes that the great railway king burns for a chance to get even with Manager Higginson for having ennobled him by getting an independent entrance to Chicago, and is determined to have a tunnel line with the G. T. R., even if the tunnel should cost six or eight millions. The Toronto and Montreal, would give him what he wants (so his friends claim), and this story is Vanderbilt's claim. Whether it will prove to be so or not time must decide. In the meantime the people interested are anxious to see ground broken for that tunnel, which the G. T. R. people believe it never will be broken. At present comes into the picture the Department of the Interior, which is claimed to be a real road across a Dominion highway, just as the Ottawa Bridge is, and the Dominion Government alone is held to be the complete power to grant a charter for such a work. Should this latter proposition be the case, then Vanderbilt and Mr. Reidley Barlow may have Vanderbilt to produce for another check from Manager Higginson, whose power at Ottawa is well known.

Wants.

Twenty-five words under this head 25 cents first insertion. Each additional insertion 10 cts.

CAST ON THE WORLD:

The Border Marriage.
A STORY OF THE GREAT GLASGOW BANK ROBBERY.

CHAPTER XXXVII.

AN EXCITING INTERVIEW—THE BARGAIN—THE JOY TRIAL.

The window shutters had just been closed and the gas lighted, and the room was well illuminated, and the tall form and decided features of Mrs. Reynolds were clearly seen by the group within as, with a firm tread and a bold, steady gaze, she approached close to where they sat.

Her agitation was gone now, or, if not gone, carefully suppressed under a show of the greatest composure, and there was that in the evident settling of her form and bearing into an almost ideal boldness which indicated the exercise of an excessive resolution not naturally felt in the circumstances, but forced by her strong will.

She looked at no one but Philip and Lydia, but these she steadily gazed on with her dark, piercing eyes, as she stood waiting for their astonishment to pass before she addressed them.

'Philip Reynolds, do you not know me?' she at length slowly asked, on seeing no look of recognition, came into either of their faces.

'Isabella Joyce so changed that she cannot be recognized by the acquaintances of her youth.'

'Arabella Joyce!' ejaculated Lydia, 'is it possible?'

'Good heaven, yes, I recognize you now,' said Philip, 'but unless you had announced yourself I would never have known you.'

'I had not wondered at,' returned the woman, with a bitter smile. 'I more than twenty years since we met, and these years have changed us more—changed me most of all.'

'They have indeed,' rejoined Philip with a pitying sigh.

'By that tone and sigh I divine you understand the degraded position to which I have fallen. I am no longer the young girl with whom you danced and dined in our days of balls and parties—the girl who loved you passionately and without return.'

'Has time, with its opportunity for reflection, not convinced you that I was altogether blameless?' said Philip gently.

'You mean, has it shown how vain I was to expect any serious intentions on the part of Philip Reynolds?' she asked, with a look of scorn.

'I have not sought your presence to awaken either, but to do a service to a man who is true to me. When I have named him you will not condemn me the more, but I can tell you that I will bear what I would not have borne for my own—the galling effect of your scorn.'

'You mistake, Arabella,' remarked Philip. 'Lydia and I are indeed grieved to see you in this position, but your contentment would be the last feeling to enter our minds, and you may be sure that I speak for both when I say that we shall be sincerely glad to do the utmost in our power to extricate you from—'

'What!' exclaimed the woman, with vehement fierceness, 'receive favors from me for myself—never! Low as I have fallen I have pride still—pride which forbids starvation, misery, death, to the acceptance of benefits from you. Even the service I am here to seek for another I will require. You deem that impossible. You do not believe that a degraded wretch like me can render you a boon; but I can and one which you will not spurn. This, she added, turning her piercing eyes towards Charles, 'this I propose to the young man who is able to give material evidence evidence against Jim Mackoul!'

'Mackoul!' echoed Philip, 'are you connected with such a notorious and desperate character?'

'Spare your epithets,' she imperiously interrupted. 'What Mackoul may be is not the point to be determined. Enough that I am connected with him and devoted to his interest. My object here now is to secure this young man's absence from the trial.'

'This is impossible,' replied Ravensworth. 'He is a principal witness.'

'I know it.' 'His testimony is perhaps necessary to secure Mackoul's conviction.'

'I know that also, and why would I do so much to keep it back?'

'But it cannot be kept back,' said Philip. 'The bank people know how important it is, and will without doubt insist on his appearance in the witness box.'

'He can go out of the way if you choose to have it so.'

Philip shook his head very decidedly. 'That may not be,' he replied, in a tone so decided. 'Your connection with this man brings him into the witness box, and the enormity of his offences, or you could not expect this request to be complied with. Duty to society, no less than to me, forbids it.'

'What have I to do with duty or morality either?' she asked, with a sudden burst of impatience. 'I ask not this as a favor neither to me or to him, but as something for which I will give you a return. I did not come here trusting to your generosity, or desiring to invoke it. Let this young man be kept back as a witness which you will tell me of all things to know.'

'This cannot be, Arabella,' returned Ravensworth. 'Lydia and I will make any effort to do you a real substantial good; but merely to assist this criminal to escape from well-merited punishment—'

'And what is that to you whether his punishment is merited or not? Is it more to you than to learn that which I can tell you?'

'What can you tell us Arabella?' asked Lydia, pitiously.

'Oh, how can I dream of your child,' Mrs. Reynolds nodded.

'Good gracious, woman,' cried Philip springing forward, and vehemently grasping her arm, 'do you know what became of our child?'

'I will tell you what became of her,' replied the woman.

'What!' shrieked the distracted mother. 'Ah, it is too soon to give the information. My lips I shall not unsil until after the trial, and only if the young man does not appear.'

'Oh, pity, Arabella—oh, have pity. Think of a mother's grief and sorrow, and tell me what you know of my daughter.'

'You have heard my terms,' she would reply. 'If your grief and sorrow are so great, you can prevail on your husband and the youth to comply with me.'

'This is—this is a cruel, a cruel, a cruel trick to play on me, Arabella. You would take advantage of your knowledge of our irreparable loss many, many years ago, to prevent the giving of evidence which he and you know is conclusive of his guilt.'

'I swear to you that it is no trick,' replied Arabella. 'Your doubt is an insult, but I must do as I require. I will tell you what became of your child.'

TO BE CONTINUED.

Women never think!

If the crabbled old bachelor who uttered the sentiment could but witness the intense thought, deep study and thorough investigation of women in determining the best medicine to keep their families well, and would not their sagacity, as the most useful and best of all, be the best and demonstrating it by keeping their families in perpetual health, at a mere nominal expense, he would be less likely to utter such sentiments as these.

False Impression.

It is generally supposed by physicians and the people generally that Dyspepsia can be invariably cured, but we are pleased to say that Green's August Flower has never, to our knowledge, failed to cure Dyspepsia. It is a perfect remedy for all the forms, such as Sour Stomach, Costiveness, Sick Headache, Flatulence of the Stomach, Indigestion, etc.

One of the most remarkable men of the Duke of Kent, the father of the Prince of Wales, the city house where he lived in Quebec is now used for office purposes. The Duke was a practical man, and his life was in accordance with his principles. It is not strange, then, that his city house should be preserved. Further along the same street the old house where the body of General Montcalm was laid on the closing day of 1775. Opposite the St. Louis Hotel, which adjoins the Kent House, at the corner of La Rue des Jardins, stands the building where Montcalm convened his military council. In fact, all about this region is historic. The monument to Wolfe, on the Plains of Abraham, and that to Wolfe harbor, and the Port St. Jean, are so many points of attraction to visitors; and if anyone should be taken sick, why drug store can supply Dr. HERRICK'S SUGAR COLORED PILLS, which are as real, and more useful in such straits, than any of our monumental celebrities.

THE PAIN-KILLER

Is recommended by Physicians, Ministers, Missionaries, Managers of Factories, Work-shops, Plantations, Nurses in Hospitals, in short, everybody everywhere who has ever given it a trial.

TAKEN INTERNALLY, it cures Dysentery, Cholera, Diarrhoea, Cramp and Pain in the Stomach, Bowel Complaint, Filth's Colic, Liver Complaint, Dyspepsia or Indigestion, Headache, Cough, Sore Throat, Croup, etc.

USED EXTERNALLY, it cures Blisters, Pains, Burns, Bruises, Scalds, Old Sores and Swellings of the Joints, Toothache, Pain in the Face, Neuralgia and Rheumatism, Chapped Hands, Frost-bitten Feet, etc.

THE PAIN-KILLER is put up in 2 oz. and 6 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheaper.

PERRY DAVIS & SON & LAWRENCE, PROPRIETORS, MONTREAL AND PROVIDENCE, R. I.

CONSUMPTION CAN BE CURED

IS A FACT ATTESTED BY THE HIGHEST MEDICAL AUTHORITIES IN THE WORLD.

A careful observation of the laws of health, and the systematic and persistent use of SCOTT'S EMULSION OF PURE LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA will accomplish this. The preparation has all the virtues of the most valuable specific in a form perfectly palatable, and acceptable to the most delicate stomach, and we make the unqualified statement that it is the most reliable and most effective remedy for Consumption, and all the diseases leading to it, such as Chronic Cough, Bronchitis, Scrophulous, Anemia, General Debility and the Wasting Disorders of children, and all other chronic diseases. The rapidity with which patients improve on this food medicine diet, is truly marvellous.

SEE WHAT PHYSICIANS AND THE PEOPLE SAY ABOUT IT.

Messrs. Scott & Bowne, 86 West Thirty-sixth Street, New York, September, 1878. 'Gents,—I have frequently prescribed Scott's Emulsion of Cod Liver Oil with Hypophosphites during the past year, and regard it as a valuable preparation in scrophulous and consumptive cases, palatable and useful. I have used it in the treatment of children. I am, Sir, very respectfully, A. H. SEXTON, M. D., Baltimore.

Messrs. Scott & Bowne, 'Gentlemen,—Within the last year I have used in my own family and in my private practice prescribed very extensively Scott's Emulsion of Cod Liver Oil with Hypophosphites and found it a most valuable preparation, especially in diseases of children. It is agreeable to the most delicate stomach; which renders it a very reliable agent as a nutritive remedy in consumptive and scrophulous cases. I have used it in the treatment of children. I am, Sir, very respectfully, J. SIMONAUD, M. D., New Orleans, La.

I am, Sir, very respectfully, J. SIMONAUD, M. D., New Orleans, La.

Messrs. Scott & Bowne, 'Gentlemen,—In September, 1878, my health began to fail and my physician pronounced it spinal trouble; under his care I got some relief from pain, but my general health was so low that I could not do any work. I was then advised to take Scott's Emulsion of Cod Liver Oil with Hypophosphites, and after taking a few bottles I began to feel better. I then took a dozen bottles and have taken all the following result: Cough subsiding, night sweats stopped, appetite returned, peace in my mind, strength returning and my weight increased from 118 to 140 pounds in sixteen weeks. I have taken no other medicine since commencing with your EMULSION and shall continue to use it until I am perfectly well. I frequently meet some friend on the street who says, "I have been cured of my spinal trouble by taking your Emulsion of Cod Liver Oil." I have not been cured of my spinal trouble, but I am getting better. I have given a bottle and he has taken it and says it is food and medicine for him. He was given up by his doctor, but my recovery is entirely due to your Emulsion. I am, Sir, very respectfully, H. F. SLOCUM, Lowell, Mass.

Messrs. Scott & Bowne, 'Gentlemen,—I have used in my own family and in my private practice prescribed very extensively Scott's Emulsion of Cod Liver Oil with Hypophosphites and found it a most valuable preparation, especially in diseases of children. It is agreeable to the most delicate stomach; which renders it a very reliable agent as a nutritive remedy in consumptive and scrophulous cases. I have used it in the treatment of children. I am, Sir, very respectfully, J. SIMONAUD, M. D., New Orleans, La.

MANHOOD

HOW LOST, HOW RESTORED.

We have recently published a new
edition of Dr. J. C. Mansel's "Colo-
rectal History on the radical and per-
manent cure (without operation) of Nervous
Debility, Mental and Physical Incapacity,
Impotency, to Marriage, etc., resulting from
excesses."
Price, in a sealed envelope, only 6 cents,
or two postage stamps.
The celebrated author, in this admirable
treatise, clearly demonstrates, from thirty years'
successful practice, that alarming ex-
cesses may be radically cured without the
dangerous use of internal medicine, or
application of the knife, pointing out a mode
of cure at once simple, certain, and effectual,
by means of which every sufferer, no matter
what condition may be, may cure himself
cheaply, privately and radically.
This Lecture should be in the hands of
every youth and every man in the land.

DOMINION IRON LADDER WORKS.

KINGSTON.

Patent Iron Ladders with Fire
Escape attached.

THE subscriber has been manufacturing
the above ladders with the fire escape,
attached for a number of years past and has
placed them on the best private residences, on
several churches, on all public schools, hotels,
banks, hospitals, charitable institutions,
county buildings, military colleges, and other
Government buildings in Kingston and Ot-
tawa.

In this city I have placed my ladders on the
private residences of John Bell, Esq., W. H.
Ponton, Esq., T. S. Carman, Esq., T. C. Wall-
bridge, Esq., in the corner of E. Barrall, on the
Roman Catholic Church, and Convent.
Parting wishing to have my ladders, can
do so by leaving their orders at the hardware
store of James Smith (late Gillett & Co.) of
this city, where they will see sample of lad-
ders, and testimonials from parties who have
them in use.

I place my ladders on the building, with
Fire Escape attached, firmly fixed and painted,
for 40c per running foot.

All orders promptly attended to.

GEORGE A. RUMRILL

Surgeons of Ontario.)

Over 16,000 persons treated since the establish-
ment of our Institute at Detroit,
in the year 1870.

CHRONIC LARYNGITIS.

The preliminary symptoms of this disease be-
gin with those of an ordinary cold, only that it
is always attended with more or less hoarseness.
It is scarcely ever an original disease, separate
and distinct in itself, but is usually an extension
of a cold, or of a more or less hoarseness.
It is caused by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused
by a cold, or by the use of the voice, or by a
chronic inflammation of the larynx, which may be
caused by a cold, or by the use of the voice, or
by a chronic inflammation of the larynx, which
may be caused by a cold, or by the use of the
voice, or by a chronic inflammation of the larynx,
which may be caused by a cold, or by the use of
the voice, or by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused
by a cold, or by the use of the voice, or by a
chronic inflammation of the larynx, which may be
caused by a cold, or by the use of the voice, or
by a chronic inflammation of the larynx, which
may be caused by a cold, or by the use of the
voice, or by a chronic inflammation of the larynx,
which may be caused by a cold, or by the use of
the voice, or by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused
by a cold, or by the use of the voice, or by a
chronic inflammation of the larynx, which may be
caused by a cold, or by the use of the voice, or
by a chronic inflammation of the larynx, which
may be caused by a cold, or by the use of the
voice, or by a chronic inflammation of the larynx,
which may be caused by a cold, or by the use of
the voice, or by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused
by a cold, or by the use of the voice, or by a
chronic inflammation of the larynx, which may be
caused by a cold, or by the use of the voice, or
by a chronic inflammation of the larynx, which
may be caused by a cold, or by the use of the
voice, or by a chronic inflammation of the larynx,
which may be caused by a cold, or by the use of
the voice, or by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused
by a cold, or by the use of the voice, or by a
chronic inflammation of the larynx, which may be
caused by a cold, or by the use of the voice, or
by a chronic inflammation of the larynx, which
may be caused by a cold, or by the use of the
voice, or by a chronic inflammation of the larynx,
which may be caused by a cold, or by the use of
the voice, or by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused
by a cold, or by the use of the voice, or by a
chronic inflammation of the larynx, which may be
caused by a cold, or by the use of the voice, or
by a chronic inflammation of the larynx, which
may be caused by a cold, or by the use of the
voice, or by a chronic inflammation of the larynx,
which may be caused by a cold, or by the use of
the voice, or by a chronic inflammation of the
larynx, which may be caused by a cold, or by
the use of the voice, or by a chronic inflamma-
tion of the larynx, which may be caused by a
cold, or by the use of the voice, or by a chronic
inflammation of the larynx, which may be caused

REVELLEVILLE, SATURDAY, JULY 31.
A Significant Defeat.

The election of a member in the House of Commons for Berwick-upon-Tweed, which took place recently, proved to be a much more serious check to the Government than was indicated by the result of the poll.

The result of the poll, at the general election, Berwick returned two Liberals. One of these gentlemen, the Hon. Henry Strutt, was elected to the House of Lords on the death of his father, Lord Belper, to whose rank and title he succeeded and a new election was rendered necessary. The candidates were, on the Liberal side, the Hon. John McLaren, an influential member of the Government, as Lord Advocate for Scotland, and on behalf of the Conservatives, three Capt. D. Milne Home. This latter gentleman had represented the borough during the last Parliament, but when the general election took place he stood lowest on the poll, having received about 80 votes less than were recorded in favor of Sir D. C. Marjoribank, who headed the poll. Mr. McLaren had, it will be remembered, been defeated in the Wigton burghs when he offered for re-election after assuming office, so the weakness of the Government may be imagined by their seeking in England a seat in the Commons for the only Scotch Minister. The Lord Advocate, who is a member of the Government, and the Government, and challenged the verdict of the constituency on the policy of the Administration. In his speech at Spittal-a-Village forming part of the Parliamentary borough—he said:

"Now, gentlemen, if I cannot advance my personal claims to your consideration, except perhaps that I have already endeavored to combat a seat for the party, yet in coming here as a member of Mr. Gladstone's Government, and as a representative of his policy of his Government and of the Liberal party, I feel that I am on strong ground."

In spite, however, of Mr. McLaren's undoubted abilities, of his position in the Government, and of his influential relationship, he was defeated, and that by a gentleman who three or four months before had been in a minority of 80. This the policy of the Government has been pronounced emphatically against by the electors of the old border burgh, and the same sentiment now undoubtedly prevails at all events in the north of England and in Scotland. The Gladstone administration, despite a large majority in Parliament, does not seem destined to be long lived.

Madoc Slate Quarries.

Some eight or some ten years ago, parties who were prospecting in the Madoc slate quarry, came across a ledge of slate-like looking rock on the farm of O. F. Aylsworth, and uncovered the surface near the northern edge of the ledge, finding some apparently good slate. They made an effort to obtain the property; but the figures asked, we believe, were out of their reach, and the work was abandoned. Not until some time this spring was the property again examined, and this time attracting the attention of some practical miners, a thorough exploration was made, pits were dug, a satisfactory lease obtained, and a company organized, who a short time ago commenced active operations. The company is composed of Messrs. H. K. Lee, Cornelius Gromberg and E. B. Frazer. At first, and until about a week ago, the work was carried on without the aid of machinery, but after going to the depth of fifteen feet, the value of the quarry was demonstrated beyond question, and steps were taken to erect the erection of a derrick. The derrick was built by Mr. Gromberg, one of the owners of the mine, and who is a practical miner, having had several years experience in the slate quarries in the eastern Townships, was completed about a week ago, and is now doing its work effectively. The mast is 56 feet high, with a boom of 45 feet—almost the standing rigging and guys are 1 inch wire rope, and the hoisting rope is of English steel.

This quarry is situated on lots 5 and 6, and is about one mile and a half from the village of Madoc on the Hastings Road, and only about 100 yards from the railway track, from which there is a good road direct to the mine. The ledge of slate rock outcrops for a distance of over one thousand feet, and varies from one hundred to one

hundred and fifty feet in width. Where work is now being done, there is an opening of about 60 feet wide with a depth of 15 feet. On the surface, and to the depth of about 12 feet, the slate, owing to atmospheric action, is not suitable for anything but rough flagging, but after that depth has been reached, a superior quality of roofing slate is found. It is said to be firmer and stronger than that taken out of any other quarry in Canada. It comes out in blocks varying in size from four to eight feet, and is easily split into flags and shingles of any desirable thickness. The color is a bluish grey, and for flagging purposes, for sidewalks, cellars, &c., it is very suitable, being exceedingly tough, and apparently as hard as steel. Some very fine specimens of flagging, two inches in thickness, and level as a board have been taken out.

At present employment is given to ten men, but when the quarry has been opened wider and deeper, it is expected employment will be given to between thirty and forty operatives. Already the Company have received large orders for slate for roofing purposes, but have not been in a position to fill them. They expect to be ready, however, within a few weeks to supply the market of Western Ontario. If it turns out as valuable in quality as the development so far promises, there is evidently an inexhaustible quantity, and there is no reason why the Company should not control a very large share of the trade of the Province.

The same company have a quarry about four miles north of Madoc, on the old road, from which they are now getting out a superior quality of building stone. It comes out in fine regular blocks, which require dressing only on the edges. Good lithographic stone, equal to that found in Mar-mora, has been struck at a depth of twelve feet, samples of which have been sent to the United States to be tested. This quarry is convenient to the line of railway, being only distant about 400 yards, and the stone can therefore be delivered to any part of Ontario, at very low rates.

News Condensed.

—Crops in the vicinity of Cloyne look well.
—Mr. John Motz has been elected Mayor of Berlin, Ont.
—A fair is to be held at Marlborough on Tuesday next.

—The alleged mutiny of a native regiment in Cyprus is denied.
—Heavy rainfalls in England continue to do serious damage to the crops.

—The Napier Cement Company is filling a large order for slates for a Montreal firm.
—It is reported that the town of Yale, British Columbia, has been destroyed by fire.

—Rev. Dr. W. D. of Brockville is spending his holidays in Canada, and is at present in London.
—The Basutos are reported to be rapidly deserting the rebel chiefs and giving up their arms.

—The Princess Louise and Prince Leopold sailed for Liverpool to-day in the steamship *Polynesian*.
—Wells, of Chatham, defeated Jarvis, of Hamilton, in a two mile pull at Chatham on the 30th. Both are amateurs.

—The Board of Inland Revenue and Weights and Measures met on Tuesday next.
—The Ministry of Victoria, Australia, has resigned, and a new Administration has been formed, with Hon. Graham Berry as Premier.

—His Honor the Lieutenant Governor of Nova Scotia, Gen. Sir Patrick MacDonnell, has left Halifax for Rimouski, whence they embarked to-day for England.
—About 75 Scotch farmers arrived at Montreal on the 29th, bound for the North-West. They are all persons of means, who will make valuable settlers.

—According to a despatch from Berlin, France is resolved to withdraw her iron clads in the event of the naval demonstration against Turkey becoming a real action.
—A monster camp meeting under Methodist Episcopal auspices, is to be commenced at Under's Grove on August 13th. A tent to accommodate 2,000 people will be erected.

—It is reported that Mr. Claudio Jannet and the Count de Forcault will on their return to France endeavor to direct French emigration to the Lake St. John district in the Province of Quebec.
—It is said that some sixty-five million feet of lumber have been sold within the past week by Ottawa mill owners to American dealers. Fifty million feet of the lumber is to be delivered this fall.

—Mr. W. H. Ellis of the Grand Junction Railway, who was severely injured a short time ago by being thrown from his buggy near Keene, is now in Peterborough, and able to get around with the aid of crutches.
—Dr. Turcotte, dentist, of Hochelaga, was drowned on the 30th while driving his horse and buggy into the river, for the purpose of washing the buggy. The horse was also drowned. Dr. Turcotte's body has been recovered.

—M. W. Pray, Esq., of Nanawau, who is making a tour of Manitoba and the Northwest, has purchased about 1,200 acres of land near Emerson, and has contracted to have about 200 acres broken up at once and put in order for a crop of wheat next season.

—The Kingston branch of the Soldiers' Union have advanced wages to \$1.25 on Lake Ontario and \$1.50 through the Canal. In consequence of this the sailors on board several vessels in port struck for the advanced rate. Some claims acceded to the demands, others left port reduced crews.

—The schr. D. Freeman, owned by Downey & Co., is being rebuilt from the water line up, at Napawau.
—The "hum" has evidently struck the ship yard in St. Catharines, no fewer than three vessels being rebuilt, viz., the *Louisa*, *Janet C. Woodruff* and *Prospere* Gagnier.

—Over seventy men are now employed.
—Messrs. Downey & Co. have purchased the *David Andrews* at public auction, from the boat of their hands at the time she went ashore near Oswego. The vessel has been entirely rebuilt, and will engage in the grain trade from the Bay this season. She has been reconstructed by the *Delaware*. So says the *Napawau Beaver*.

—The steam barge *Indian* is being repaired by J. H. Grant at the *Bay* this season. It is being repaired by J. H. Grant at the *Bay* this season. It is being repaired by J. H. Grant at the *Bay* this season.

The Rowing Club's Races.

Rough Water but Good Rowing

Another of the Bay of Quinte Rowing Club's series of races for the championship of the Club in single and double sculls in rigged laproaks, took place last night. There was but little wind, but as a strong breeze had blown during the afternoon the water was quite lumpy, and the light craft in which the races were rowed danced around in a rather uncomfortable manner. The course was as usual laid out to the eastward of the Grand Junction wharf, to flags three-quarters of a mile distant and return, or a mile and a half in all.

The first event was the double scull race, which was contested by two crews only, namely Messrs. Garratt and Newberry, and Hynes and Jack. The latter pair got a slight lead at the start, which they maintained to the vicinity of the turning buoy, where a foul resulted, owing to Hynes and Jack mistaking their turning point.

The crews turned and continued their course, but the last named pair ceased rowing after pulling within half a mile from the starting point, leaving Garratt and Newberry to finish alone, which they did in 10m. 50s.

The single scull race also secured only two starters, but as Messrs. Messrs. Geo. Scherlock and Hugh Blair, the interest taken in the race was very considerable. After a few strokes had been taken Sutherland secured a slight lead, but Blair pressed hotly after him, and but a short distance separated the men at the turning buoy. From this out the race was a stern chase, Blair trying hard but ineffectually to close the gap, and Sutherland finally won by 10m. 50s. Blair's time was 9m. 30s. The time made was excellent, considering the roughness of the water, and winner and loser are entitled to much credit for the fine exhibition of skill which they gave.

North Hastings.
(From the Review.)
Dr. Loomis has secured the mining lease of Mr. H. Bull's property in this village, and a number of men have been at work taking out ore for some days past.

Messrs. Gilmore & Co., of Trenton, have understood, purchased about two acres of land near the station, in this village, part from Mr. Bull and part from Mr. McKenzie, with the intention of making this village their headquarters for furnishing their men and teams with supplies during the lumbering season. Suitable buildings for a storehouse, stables, boarding-house, &c., will be erected. This move will be of great advantage to the farmers, as the firm will purchase large quantities of grain for their own use.

On Saturday, 17th inst.,—as three children, daughters of William Allison, were returning from picking berries across a lake in the Township of Carleton, one of them, a fine girl of about thirteen years of age, met with an untimely end. It seems that she had descended about her school teacher having left the school, and told her sister that she would never see her teacher again. As they were nearing the shore she jumped out of the canoe and sank, never rising. The event has cast a gloom over the whole neighborhood. The suicide was a strange one.

Tweed Notes.
A short trip through part of Hungerford, Huntingdon and Rawdon this week has convinced us that there is no business like being a farmer and his sons and servants just now from early morn till dark improving their time in securing the crops. The sound of the reaper is every where heard and the golden grain falls into the lap of Mother earth in nice sheaves ready to be tied up and drawn to the barn. Every crop except wheat (spring) is good, say those who know the best.

Potatoes and corn look remarkably fine at this season; hardly any bugs to be seen. Cheese is still looking up; the frequent rains have a tendency to keep the grass growing and consequently a good flow of milk is the result.

Some people are just now engaged in threshing out their barley to make room for other crops.
The prospects for everything shape well for a good fall trade, even Canada thistles are a luxurious crop on most of the highways, notwithstanding the act of Parliament.

J. & A. WALLACE.
July 30, 1880.

MORNING DESPATCHES.

AMERICAN.

New York, July 31.—The *Harvard* says Hancock's letter has the merit of brevity. There is one good point very happily put in the letter, which is a clear recognition that the war is over.

English touches fraud boldly and not fresh, and has altogether made a clumsy response. The name of the Spanish steamer which boarded the American schooner *Franklin* of the Cuban coast, is believed to be *Bosco de Gary*.

150 sharks have been caught in Long Island waters during the past month.

There were three fights on Thursday in a ravine near Jersey City. Wm. Gallaway whipped Jas. Fitten in three rounds and knocked Augustus Bunting out of time in seven rounds. The contest, which lasted an hour, between John Yack and Geo. Paul, resulted in the defeat of the former.

It is stated that Garfield will leave Trenton, on Tuesday, accompanied by prominent persons, and reach New York on Wednesday evening. He will remain here until after the grand Republican conference on Thursday.

St. John, N. F., July 31.—The *Hovato* expedition steamer *Gulfair* left yesterday for Lady Franklin Bay on a trial trip. The engines worked satisfactorily, and the new corps of engineers inspired unbounded confidence in all on board. The first part of sail will be Disco, beyond which it is the opinion of old whaling captains that the *Gulfair* will be unable and unfitted to pass.

New York, July 31.—Arrived, the *Amsterdam* from Rotterdam.

North Hastings.
